ADVANCED PLANNING COURSE

Description

Planning is an essential function of an effective emergency management program and serves as a tool for emergency professionals in improving disaster management and public safety policies.

The Advanced Planning Course continues the themes of the Emergency Planning Course by providing emergency management and public safety personnel with the knowledge, skills and ability to develop or enhance their Comprehensive Emergency Management Plan (CEMP).

Participants will receive in-depth instruction on developing and implementing various functional and hazard-specific annexes, including instruction on how to narrow the scope of a comprehensive plan to a more defined and tactical multi-agency planning document.

This course will also include an overview of planning concepts that should be addressed in developing Continuity of Operations Plans (COOP).

Topics & Issues to be Covered

Participants of the Advanced Planning Workshop will receive in-depth instruction and case studies on specific critical planning issues such as:

- Evacuation Planning Elements
- How to Assemble a Registry of Disabled Persons
- Planning for Volunteers
- Terrorism Mitigation Measures for Key At-Risk Facilities
- Animals in Emergency - At Home and on the Farm
- Mental Health Planning Before and After Disaster
- HAZUS: A Planning Tool for Earthquakes
- Special Event Planning
- Planning with Business and Industry
- ICSs "Incident Action Plan"

Prerequisites

Emergency Planning Course (G-235)

Who Should Attend

Successful graduates of the SEMO Emergency Planning Course who wish to continue their education in emergency planning concepts
