

## **Underwriters Laboratories Adds International Fire Code Search Engine to Its Site**

Underwriters Laboratories Inc. is pleased to introduce an enhancement to the new online tool for regulatory authorities. The 2006 International Fire Code (IFC) has been added to the database.

The “Category Code/Model Code Database” is a powerful search engine that links Code sections to UL product categories.

To view this new database, visit:

<http://www.ul.com/regulators/codelink/>

To use this database, select the 2006 International Fire Code from the pull down menu of model codes, enter a corresponding code section number and you will be automatically linked to the corresponding UL product category and Listing information.

In addition to the 2006 IFC, the above page has code correlation databases that cover various editions of the International Building Code (IBC), International Fire Code (IFC), International Mechanical Code (IMC), International Fuel Gas Code (IFGC) and the National Electrical Code(r) (NEC(r)).

The database also provides hyperlinks to the UL Guide Information and other specific information pertaining to each UL Category Code.

For more information, contact Bob Eugene in Seattle by phone at 1-360-593-2152; or by e-mail at:
