

NIST AND USFA NEWSLETTER AT FIRE.GOV

Since 2001, NIST and USFA have teamed up to produce an on-line newsletter at FIRE.GOV that contains easy to read articles describing ongoing research activities around the world. The newsletter contains contact information and links to the specific researchers and organizations involved in the research.

A new issue of the Fire.Gov Newsletter is now available on the web site, <http://www.fire.gov/newsletter/index.htm>. Archives of previous issues of the newsletter are also available on this page.

The web site has been expanded to provide training materials, videos, fire reconstructions, and research reports that may be of interest to the fire service. The FIRE.GOV electronic newsletter is still an important part of the website.
