

ON-LINE SIMULATIONS AT FIREENGINEERING.COM

Check out the new online simulation (http://www.fireengineering.com/display_article/320582/25/none/none/SIMUL/Hazmat-simulation:-Automobile-vs.-Tank-Car) now available on [FireEngineering.com](http://www.fireengineering.com). This scenario models a haz-mat incident that develops after a car collides with a train and features the use of several pieces of equipment, including a thermal imaging camera, binoculars, and a multi-gas meter. You will find this simulation and its supplemental training documents under Web Exclusives below or on the Simulations page (<http://www.pennwellblogs.com/fireengineering/simulations/>). You can also discuss the simulations at (<http://www.fireengineering.com/forum/message.html?id=2234>) in our forums.
