VISION

The New York State Office of Fire Prevention and Control strives to be a national recognized leader in fire services, delivering the highest quality, state-of-the-art, and most comprehensive training, response, and technical assistance programs and services to emergency responders, local entities, and the citizens of New York State. The Office's programs enable: the state's fire service to become the best trained, best prepared and most effective professional emergency response force in the nation; New York State's colleges, universities, state properties and its citizens, to be the safest in regard to fire prevention and awareness; and the state to maintain arson related fires at the lowest per capita within the United States.

MISSION

The Office of Fire Prevention and Control will deliver a wide breadth of services to firefighters, emergency responders, state and local government agencies, public and private colleges, and the citizens of New York. The Office advances public safety through firefighter training, education, fire prevention, investigative, special operations and technical rescue programs. The timely delivery of these essential services enables the Office to make significant contributions to the safety of all of New York State.

ABOUT OUR TRAINING PROGRAMS

TRAINING LOCATIONS
The New York State fire service residential training courses are offered at the NYS Academy of Fire Science, in Montour Falls. Certain swiftwater/flood rescue/technical rescue courses are also available at the New York State Preparedness Training Center (SPTC). Outreach courses are offered in various satellite locations throughout the State. The location where a course is given, along with its respective course number, is listed at the end of each course description.

TRAINING AUTHORIZATION
Training Authorization Letters (Form EOSB-1654) are now required for ALL OFPC courses (not just courses requiring the use of SCBA,) except those listed below. A training authorization letter is required for courses taught at all training locations including the Academy of Fire Science, State Preparedness Training Center (SPTC) and Outreach Courses.

The following courses/programs are exempt from the Training Authorization Letters:
• Fire Safety Courses taught to the public, children, college students and OPWDD employees.
• Explorer Weekends at the NYS Fire Academy (Explorers are not allowed to attend OFPC training except for the Explorer Weekends)
• Non-OFPC Programs hosted at the NYS Fire Academy or SPTC.

The Training Authorization Letter was instituted for all courses to ensure that the student, authorizing agency representative (Chief, Training Officer or Supervisor) and the Office of Fire Prevention and Control staff know that an individual has the proper authorization to attend the training course or courses delivered by the New York State Division of Homeland Security and Emergency Services, Office of Fire Prevention and Control.

COURSE SCHEDULE INFORMATION
Please note that the courses listed within this book are not necessarily offered every year. For a complete and current schedule of courses at the Academy of Fire Science go to: www.dhses.ny.gov/ofpc/training; for the State Preparedness Training Center, go to: www.dhses.ny.gov/training/calendar/?agency=SPTC

CERTIFICATION INFORMATION
For information on both state and national certifications, go to: www.dhses.ny.gov/ofpc/training/fire-academy/certifications.cfm

FIRE SERVICE DEGREE PROGRAMS
Several colleges and universities in New York State offer Fire Service-related degree programs. In some cases, degree credit may be available for OFPC courses. Contact these institutions for further information. See listing at: www.dhses.ny.gov/ofpc/training/fire-academy/advanced-education.cfm

Emergency Medical Technician
Basic
This unique seventeen day program includes instruction in all skills necessary to provide emergency medical care at a basic life support level with an ambulance service or other specialized emergency medical service (EMS) operations. A clinical experience requirement, to be completed outside of class, is part of the course.

Designed for: All emergency response personnel
Course Length: Approx. 165 hours plus minimum 10 hours clinical experience
Prerequisites: Candidates must be at least 18 years of age by the end of the month in which they are scheduled to take the written certification examination. Prior to starting clinical time, students must also provide proof of a physical in the last year; two MMR’s or a Rubella titer within the last year; a Mantoux Test for Tuberculosis (PPD) within the last six months; a DPT within the last five years; Hepatitis B vaccination or a copy of a waiver of the vaccine, and proof of liability insurance including Medical Malpractice and Errors & Omissions (minimum $1,000,000 per occurrence/$3,000,000 aggregate). This is most often covered by your sponsoring agency.

Materials Fee: $10
Tuition fee: $775 (Waived for members of NYS DOH-recognized EMS Provider Agencies)
Course number : 01-03-0007
Course Location(s): Academy

Emergency Medical Technician Core Content Refresher
This convenient three-day course will help the Emergency Medical Technician (EMT) meet the “Core” refresher training requirements of the Continuing Education Recertification Program (Pilot Program). Topics covered will include a review of the 26 required hours of refresher content. This course will not meet the additional training hour requirement for an EMT to complete their Continuing Education Recertification Program.

Designed for: Current NYS Emergency Medical Technicians
Course Length: Varies
Prerequisite: Current NYS Emergency Medical Technician certification
Materials Fee: $10
Tuition fee: $425 (Waived for members of NYS DOH-recognized EMS Provider Agencies)
Course number : 01-03-0006
Course Location(s): Academy

NYSDOH Certified Instructor/Coordinator (CIC)
The CIC course prepares a candidate to become certified to teach didactic sessions and coordinate the administration of a NYS EMT certification course. This course is held in cooperation with EMSTAR.

Designed for: Current NYS Certified Lab Instructor’s
Course length: 20 hours
Prerequisites:
- Current certification as a NYS EMT or Advanced EMT
- Current certification as a NYS CLI
- A NYS EMT/AEMT written certifica-
FIRE/ARSON INVESTIGATION

Introduction to Fire Investigation
Provides knowledge of basic fire chemistry and observational skills necessary to judge fire cause, as well as an introduction to NFPA 921 and 1033. Students learn to determine the cause and origin of accidental and natural fires and methods of documenting the fire scene. Students also learn the concept of incendiarym evidence preservation, scene security and safety. The course provides a basic understanding of fire's behavior and its value in determining a fire's origin and cause.

Design for: Attendance restricted to those members of or perspective members of fire, police, or insurance investigator units and prosecutors.
Course Length: 40 hours
Prerequisites: Signed Fire / Arson Investigation Training Program Agency Endorsement Affidavit
Course number: 01-01-0040
Course Location(s): Academy, Locally via Outreach
Student Required Equipment/Materials: Students are required to have a copy of the most current NFPA 921, a current edition of Jones and Bartlett Fire Investigator text book and access to the most current copy of NFPA 1033.

First Responder Administration of Intranasal Naloxone to Reverse Opioid Overdose
Drug overdose from opioids (such as heroin, codeine, morphine, fentanyl and others) is a significant problem in all areas of New York State. This training video, and associated print materials, is designed to prepare Non-EMS Fire Department's to administer naloxone using an intra-nasal applicator (mucosal atomizer device) in cases of suspected opioid overdose. Naloxone is a medication that safely reverses opioid overdose. The objective is to treat and reduce injuries and fatalities due to opioid-involved overdoses when a Non-EMS First Responder (FDFR) is the first to arrive at the scene of a suspected overdose. This training will allow FDFR’s to recognize signs and symptoms of overdose, assemble a mucosal atomizer device for administering Intra-nasal naloxone, and implement opioid overdose prevention activities in accordance with NYS-approved policies and procedures.

Design for: All Non-EMS FD first responders
Course Length: 90 minutes
Course number: 01-03-0019
Course location: Locally via Outreach

NYS Certified Instructor Update (CIU)
The Certified Instructor update is designed to fill the 9-hour continuing education requirement for recertification of CLI’s and CIC’s. The program is designed to be a mechanism for communicating new information to the certified instructors throughout the State. This course is held in cooperation with EMSTAR.

Designed for: NYS CIC’s and CLI’s
Course Length: 10 hours (9 hours of instruction—3 hours per module—with breaks)
Course number: 01-03-0024
Course location: Academy. Note: Students are required to register through EMSTAR (www.emstar.org) for this course, but accommodation fees are paid separately to the Academy of Fire Science.
Fire Investigation for the Line Officer

This course discusses the legal authority, and who has the responsibility, to conduct fire investigations. Students learn about fire scene security and their role in the identification and preservation of evidence potentially relevant to a fire investigation. Participants are provided an overview of the fire investigation process to assist in meeting requirements of General Municipal Law § 204d, and so they can recognize instances where a certified fire investigator should be requested. Designed for: All fire service personnel, with emphasis toward Fire Officers and Officer Candidates.

Course Length: 6 hours
Prerequisites: None
Course number: 01-01-0039
Course Location(s): Regionally via Outreach, Academy
Student Required Equipment/Materials: None

Canine Accelerant Detection Workshop

Provides certified Accelerant Detection Canine Teams an opportunity to conduct searches under the guidance of experienced K9 Trainers as a means to hone skills on a semi-annual basis. Laboratory verified ignitable liquid prepared samples will be utilized in a variety of search environments to evaluate search techniques and canine team abilities to effectively search and locate, with constructive feedback from trainers. Designed for: Accelerant Detection Canine Teams as annually certified by OFPC

Course Length: 6 hours
Prerequisites: Current OFPC Certification as an Accelerant Detection Canine Team
Course number: 01-01-0031
Course Location(s): Academy
Note: Special circumstances apply. Call the Academy for further information.

Canine Accelerant Detection Certification

Provides extensive, highly specialized training for the development of a new canine accelerant detection team. A canine partner suitable for accelerant detection work will be screened and selected by OFPC and provided to the student handler. Student canines and their handlers will be trained using the praise and play training methodology. Teams will learn to detect families of ignitable liquids as defined by ASTM standards in addition to learning various search techniques, canine health and behavior, and environmental conditioning. Laboratory verified samples will be utilized to test the K9 Teams ability to detect appropriate ignitable liquids in both burned and unburned. A written exam must also be successfully completed. This course is for experienced fire investigators and requires a municipal / government sponsorship. Designed for: New Canine Accelerant K9 Teams

Course length: 10 weeks
Prerequisite: New York State Fire Investigator Level II Certification or equivalent, and Signed Fire / Arson Investigation
Materials fee: $750 * includes the canine, initial medical screening of the canine, and some basic equipment.
Course number: 01-01-0006
Course Location(s): Academy
Note: Special circumstances apply. Call the Academy for further information. Note: Course includes evening sessions

Canine Accelerant Detection Re-Certification

Provides for testing and re-certification of established canine detection teams for annual state certification. Advanced techniques and field methods are presented with scent recognition and testing conducted by OFPC trainers using laboratory certified samples of ignitable liquids, burned and unburned. Designed for: Investigative teams performing canine accelerant detection
Course Length: 20 hours
Prerequisite: An operating canine accelerant detection team with a certificate attesting completion of initial training by an accredited agency, and Signed Fire / Arson Investigation
Materials Fee: $100
Course number: 01-01-0007
Course Location(s): Academy
Note: Special circumstances apply. Call the Academy for further information.

Electrical Fire Investigation

Provides fire investigators with the knowledge and skills to prove or eliminate an electrical fire cause. Students develop an understanding of electricity, electrical power systems including basic wiring, materials and equipment, and proper and improper installations. Students will gain knowledge in the understanding of specific charateristics of electrical arc failures including arc tracking, open neutrals, high resistance faults, small electrical appliance failures and the characteristic failures of various types of fixtures. The course is conducted in a classroom and laboratory setting and involving many hands-on demonstrations as well as practical application in the use of diagnostic meters used by the fire investigator. Designed for: Fire Investigators
Course Length: 18 hours
Prerequisites: Introduction to Fire Investigation (01-01-0040) or Fire Behavior and Arson Awareness and Principles of Fire Investigation.
Course number: 01-01-0042
Course Location(s): Academy

Note: Course includes evening sessions
Fire/Arson Investigation Seminar
Features expert speakers and presenters from government agencies, commerce and insurance. Provides information and new developments in the field of fire investigation and allows for an exchange of ideas and experiences through peer interaction. Attendance fulfills the annual New York State in-service training requirements for fire investigators.
Described for: Fire, police, Insurance SIU and municipal officials responsible for the legal investigation and prosecution of arson
Course Length: 12 hours
Prerequisites: Introduction to Fire Investigation (01-01-0040), Fire Behavior and Arson Awareness and Principles of Fire Investigation, or equivalent
Materials Fee: $10
Course number: 01-01-0018
Course Location(s): Academy

Fire/Arson Investigation Specialty-Fire Investigative Photography
Provides fire investigators with the knowledge and skills to photographically document a fire investigation scene. This hands-on program includes operation and maintenance of equipment, flash techniques, fire scene photography, digital photography.
Described for: Fire Investigators
Course Length: 20 hours
Prerequisites: Introduction to Fire Investigation (01-01-0040), Fire Behavior and Arson Awareness and Principles of Fire Investigation, or NYS Academy of Fire Science Fire/Arson Investigation, or National Fire Academy Fire/Arson Investigation
Course number: 01-01-0021
Course Location(s): Academy
Note: Course includes evening sessions

Fire/Arson Investigation Specialty-Interviewing Techniques for the Fire Investigator
Provides fire investigators with the knowledge and skills necessary to effectively interview witnesses and take statements, recognize and interpret symptoms of stress, and prepare a case for trial.
Described for: Fire investigators
Course Length: 20 hours
Prerequisites: Prerequisites: Either Fire Investigation (01-01-0041) or Fire/Arson Investigation (01-01-0017)
Course number: 01-01-0020
Course Location(s): Academy
Note: Course includes evening sessions

Youth Firesetter Intervention Program Seminar
This one-day program consisting of lectures and workshops provides information and new developments in the field of juvenile firesetter intervention and education through the exchange of ideas and information from expert speakers and presenters.
Described for: Fire, Police Educators, Mental Health and Social Services professionals and JFIP Teams.
Course Length: 6 hours
Course number: 01-01-0035
Course Location(s): Academy

Youth Firesetting Prevention and Intervention Level I
This course is a direct delivery offering of the National Fire Academy Program. The class will address the NFPA 1035 Juvenile Firesetter Intervention Specialist I standard including: Identification and Intake; Coalition Building; Budget and Funding; Development of a program handbook, resource directory, and database; and Program Evaluation. The individual will learn to develop and coordinate an intervention program and manage activities of Specialist I staff.
Described for: Individuals that have, or will have, responsibilities related to the management and/or coordination of a Juvenile Firesetting Intervention program.
Course Length: 16 hours
Completion of Juvenile Firesetter Intervention Specialist is recommended prior to JFIS II
Course number: 01-01-0024
Course Location(s): Academy

Post Blast Investigation
This course provides instruction related to explosives identification, component recognition improvised explosive devices, blast effects, and laboratory analysis services. Attendees will observe an explosives demonstration and participate in scene processing and evidence collection exercises.
Described for: All fire and law enforcement personnel, emphasis toward those with responsibility to investigate explosion incidents.
Course Length: 24 hours
Prerequisites: None
Course number: 01-01-0025
Course Location(s): Academy
Student Required Equipment / Materials:
- Personal Protective Equipment for scene processing

Vehicle Fire Investigation
Provides fire investigators with the knowledge and skills to determine the origin and cause of fires in vehicle. Students will develop an understanding of vehicle components, their common fuel packages, and the vehicle fire investigation process. The course is a combination of classroom and “hands-on” group exercises familiarizing the
student with proper investigative techniques to include the processing of a vehicle fire through the understanding of vehicle components and the fire investigation process. The course utilizes NFPA 921 as its reference text along with a OFPC student course manual.

Designed for: Fire Investigators and SIU teams
Course length: 20 hours
Prerequisites: Either Fire Investigation (01-01-0041) or Fire Arson Investigation (01-01-0017)
Course number: 01-01-0034
Course location: Academy
Materials Fee: $50
Student Required Equipment/Materials: Students are required to have a copy of the most current NFPA 921, appropriate personal protective equipment for head, eye, hands and foot protection including inclement weather fire investigations.

Note: Course includes evening sessions

FIRE EQUIPMENT MAINTENANCE

Fire Extinguisher Maintenance
Provides technical data on preventative maintenance, recharging, and periodic tests of fire extinguishers. It includes practical work sessions on low-pressure hydrostatic proof testing on extinguishers, recharging techniques, and inspection and maintenance. It is designed to improve the capability of fire department, industrial, college, and other personnel responsible for maintaining fire extinguishers. It is also designed for code enforcement officials wanting a better understanding of fire extinguisher requirements, distribution, placement along with inspection, testing and maintenance per the NYS Building and Fire Code. The course is approved with the Department of State - Division of Building Standards and Codes for in-service credit.

Designed for: Fire service personnel, code enforcement officials and others responsible for fire extinguisher inspection and/or maintenance
Course Length: 12 hours
Required Text: NFPA10 - 2018 Edition
Course number: 01-02-0009
Course Location(s): Academy

Pumper Service Testing
Contains both technical and practical information necessary to conduct a pumper service test. Students conduct an actual service test.
Designed for: Fire service personnel
Course Length: 12 hours
Course number: 01-02-0020
Course Location(s): Academy

FIRE INSTRUCTOR DEVELOPMENT

Fire Service Instructor I
This is an upper level course designed for the experienced firefighter, fire instructor candidate, fire officer candidate, or other individual who will be delivering instruction within a fire service organization. In addition to the basic knowledge, skills and abilities required for new instructors, this course prepares the candidate to meet the Instructor I job performance requirements as defined in NFPA 1041 “Fire Service Instructor Professional Qualifications,” including delivering instruction from a prepared lesson plan, instructional aids and evaluation instruments, adapting lesson plans, organizing the learning environment, and meeting record-keeping requirements.

Due to the rigorous demands of this course, students are strongly encouraged to obtain lodging at the Academy. There is a lengthy pre-course reading assignment, and students complete a pre-test, final exam, independent assignments and one presentation during the course. Course includes homework and independent study. There is a dress code for candidates attending this course.

Designed for: Fire department training officers and training program directors
Course Length: 50 hours
Prerequisite: Fire Service Instructor I
Required Text: Fire Services Instructor: Principles and Practices (Jones & Bartlett) 2nd ed.
Course number: 01-11-0052
Course Location(s): Academy

Principles of Instruction
An introductory course for individuals who will be conducting training at the company level. Topics include: qualities of a good instructor, job performance requirements, components of a lesson plan, cognitive and psychomotor lesson plans, dealing with adult learners, meeting individual learning needs, factors that affect learning, the instructor’s role in safety, new technologies in course delivery, and learning characteristics of different generations.

Designed for: Fire service training officers and company officers
Course Length: 15 hours
Course number: 01-11-0086
Course Location(s): Academy
Fire Officer I (NFPA 1021-2014 ed.)

Note: Fire Officer I is offered in two course formats. This format is the standard offering and all Fire Officer I content is delivered in one course. Students can also complete the requirements of Fire Officer I by completing the five separate Fire Officer I Modules as outreach courses in any order: Leadership and Supervision, Company Training & Community Risk Reduction, Firefighter Health and Safety, Planning and Emergency Response, and Fireground Strategy and Tactics for First Arriving Companies and then apply for a Fire Officer I certificate.

This is the first course in the Fire Officer series, addressing all of the job performance requirements found in Chapter 4 of NFPA 1021, Standard for Fire Officer Professional Qualifications. Topics include assuming the role of company officer, fire department organization, leadership, supervision, communications, building construction, pre-incident planning, and company level training. Additionally, the Fireground Strategy & Tactics for First Arriving Companies course is embedded within the Fire Officer I course and covers topics such as scene size-up, engine company operations, truck company operations, and response to non-fire emergencies.

Designed for: Current and prospective fire officers

Course Length: 63 hours
Prerequisite: Any one of the following
- New York State Office of Fire Prevention and Control courses that includes Firefighter I, Basic Firefighter Training, Essentials of Firefighting, Basic Exterior Firefighting Operations or Scene Support Operations
- Required Text: Fire and Emergency Services Company Officer 5th Edition (IFSTA)

Course number: 01-11-0014
Course Location(s): Academy, Locally via Outreach

Fire Officer II (NFPA 1021-2014 ed.)

Meeting all the job performance requirements found in Chapter 5 of NFPA 1021, Standard for Fire Officer Professional Qualifications, the Fire Officer II course builds on the skills learned in Fire Officer I. Additionally, students begin to examine the functions of a “Managing Fire Officer.” Topics include government administration, human resource management, media relations, budgeting and purchasing, origin and cause investigations, conducting accident investigations, analyzing injuries, post-incident analysis, and preparing for the future. Multi-company response scenarios are also discussed.

Testing takes place throughout this course and includes progressive skills testing leading to Pro Board National Fire Officer II certification. The course concludes with the Pro Board National Fire Officer II written examination in which all students will take the Pro Board National Fire Officer II examination regardless if seeking National Certification or not. To successfully pass the NYS Fire Officer II course and receive NYS Fire Officer II course completion, the candidate must complete all course quizzes, tests, assignments, skills, achieve a course passing grade, and achieve a passing grade on the final written examination.

Designed for: Fire officers who lead and manage firefighters and other fire officers

Course Length: 40 hours plus time for National Certification Exam
Prerequisite: Fire Officer I or Fire Officer I National Certification (Pro Board or IFSAC)
- Required Text: Fire and Emergency Services Company Officer 5th Edition (IFSTA)

Course number: 01-11-0015
Course Location(s): Academy, Locally via Outreach

Fire Officer III (NFPA 1021-2014 ed.)

This program meets all of the job performance requirements found in Chapter 6 of NFPA 1021, Standard for Fire Officer Professional Qualifications. Through a combination of reading, lecture, and group discussion, topics relevant to the successful management and operation of a fire and emergency services agency are addressed. Students are required to gather, analyze, and utilize data from their agency or department to complete the assignments that are due throughout the course. Course topics include leadership, personal and professional development, communications, legal issues, human resources, intergovernmental relations, budget and finance issues, strategic planning, working in the community, managing the code enforcement process, and emergency management and response planning.

The course concludes with the Pro Board Fire Officer III National certification written examination in which all students will take the Pro Board Fire Officer III National certification written examination regardless if seeking National certification or not.

To successfully pass the NYS Fire Officer III course and receive NYS Fire Officer III course completion, the candidate must complete all course quizzes, tests, assignments, skills, achieve a course passing grade, and achieve a passing grade on the final written examination.

Designed for: Current and aspiring Chief officers

Course Length: 64 hours plus substantial individual research time and the National Certification Exam.
Prerequisites: Fire Officer II

Course number: 01-11-0015
Course Location(s): Academy

Fire Officer 1 Modular Series: Company Training & Community Risk Reduction

The Officer Development – Company Training & Community Risk Reduction course provides current and potential fire officers with a basic knowledge of how to determine company-level training needs, teaching from a lesson plan, documentation of training activities, and different methods to conduct company-level training.
Fire Officer 1 Modular Series: Firefighter Health & Safety
The Officer Development — Firefighter Health & Safety course provides current and potential fire officers with a basic knowledge of how to determine company-level training needs, teaching from a lesson plan, documentation of training activities, and different methods to conduct company-level training. Additionally, this course covers the basic responsibilities of the fire officer as they relate to community relations, company-level building inspections, and community risk reduction. This course is based upon the requirements found in Chapter 4 of NFPA 1021, Standard for Fire Officer Professional Qualifications. Successful completion of this course, along with the Leadership & Supervision, Firefighter Health and Safety, Planning and Emergency Response, and Fireground Strategy and Tactics for First Arriving Companies courses offers the student the opportunity to apply for a Fire Officer I certificate.

Designed for: Current and prospective fire officers
Course Length: 12 hours
Prerequisite: Firefighter I, or Basic Firefighter, or Firefighting Essentials Required
Text: Fire and Emergency Services Company Officer 5th Edition (IFSTA)
Course number: 01-11-0150
Course Location(s): Academy, Locally via Outreach

Fire Officer 1 Modular Series: Fireground Strategies and Tactics for First Arriving Companies
Designed for the first arriving officer at any incident. The primary focus of this course is structural firefighting but the lessons learned are applicable for any emergency scene. Elements of this course include scene size-up, decision making, determining incident strategies, and making tactical assignments. Also included are lessons on building construction, fire behavior and growth as well lessons for operating at common non-fire incidents such as motor vehicle accidents, propane and natural gas emergencies, and other typical non-fire emergencies. In addition to lecture and classroom activities this course utilizes scenarios to allow participants to employ their newly learned skills in real time.

Designed for: Fire officers and prospective fire officers
Course length: 15 hours
Course location: Academy, Locally via Outreach
Prerequisite: Firefighter I, or Basic Firefighter, or Firefighting Essentials
Course number: 01-11-0143

ICS-100.B: Introduction to Incident Command System
This course provides the foundation for higher level ICS training. It describes the history, features, principles and organizational structure of ICS and also explains the relationship between ICS and the National Incident Management System (NIMS).

Designed for: All firefighters
Course Length: 3 hours
Prerequisite: IS-700 NIMS
Course number: 01-05-0033
Course Location(s): Locally via Outreach

IS-700.A: National Incident Management System (NIMS), An Introduction
Homeland Security Presidential Directive (HSPD–5) directed the Secretary of Homeland Security to develop and administer a National Incident Management System. NIMS provides a consistent nationwide template to enable all government, private-sector, and non-governmental organizations to work together during domestic incidents. This course will describe the key concepts, principles and benefits of using NIMS.

Designed for: All firefighters
Course Length: 3 hours
Course number: 01-14-0018
Course Location(s): Locally via Outreach

I-200.B: ICS for Single Resources and Initial Action Incidents
The complexity of incident management, coupled with the growing need for multi-agency and multifunctional involvement on incidents, has increased the need for a single standard incident management system that can be used by all emergency response disciplines. The Basic ICS course is part of the National Training Curriculum. Under Executive Order #26, March 5, 1996,
NYS Governor George E. Pataki established the National Interagency Incident Management- Incident Command System as the standard command and control system during emergency operations.

**Intermediate ICS, ICS for Expanding Incidents I-300**

The complexity of incident management, coupled with the growing need for multi-agency and multi-functional involvement on incidents, has increased the need for a single standard incident management system that can be utilized by all emergency response agencies. Use of the Incident Command System (ICS) by both public safety and private sector organizations continues to increase across the country. The ICS is designed to be used for all applications, fires (wildland and structural), hazardous materials incidents, law enforcement operations, search and rescue operations, air, ground and water accidents, mass casualty incidents, natural disasters and planned events.

**Designed for:** Fire officers, law enforcement supervisory personnel, emergency medical officers and emergency management personnel

**Course Length:** 24 hours

**Prerequisite:** Basic Incident Command System (I-200)

**Leadership, Accountability, Courage, and Knowledge (L.A.C.K)**

This program is specifically designed for the more senior level fire officers who have had opportunities to be command officers at a wide variety of emergency incidents, including fires and hazardous materials responses. Utilizing case studies, the learning objectives become more real to life and the possibility of changing the organizational culture to reduce the possibility of deaths and injuries in the future.

**Designed for:** Senior Fire officers who lead and manage firefighters and other fire officers

**Advanced ICS, ICS for Command and General Staff—Complex Incidents 1-400**

The I-400 course is a classroom-delivered program that discusses advanced management applications of the Incident Command System including Command and General Staff, Unified Command, Major Incident Management, Area Command, and Multi-Agency Coordination. Candidates for this course should have a considerable background in incident management in both academic and practical application.

**Designed for:** Fire officers, law enforcement supervisory personnel, emergency medical officers and emergency management personnel

**Fire Officer 1 Modular Series: Leadership & Supervision**

The Officer Development – Leadership & Supervision course provides current and potential fire officers with a fundamental knowledge of the duties, responsibilities, and leadership required to be successful as a fire officer. Additionally, this course covers the basic responsibilities of the fire officer as they relate to human resources management as well as common administrative functions. This course is based upon the requirements found in Chapter 4 of NFPA 1021, Standard for Fire Officer Professional Qualifications. Successful completion of this course, along with the Company Training & Community Risk Reduction, Firefighter Health and Safety, Planning and Emergency Response, and Fireground Strategy and Tactics for First Arriving Companies offers the student the opportunity to apply for a Fire Officer I certificate.

**Designed for:** Fire officers, law enforcement supervisory personnel, emergency medical officers and emergency management personnel

**Leadership so Everyone Goes Home (L.E.G.H.)**

This program is specifically designed for the more senior level fire officers who have had opportunities to be command officers at a wide variety of emergency incidents, including fires and hazardous materials responses. Utilizing case studies, the learning objectives become more real to life and the possibility of changing the organizational culture to reduce the possibility of deaths and injuries in the future.

**Designed for:** Fire officers, law enforcement supervisory personnel

**Fire Officer 1 Modular Series: Planning & Emergency Response**

The Officer Development – Planning & Emergency Response course provides current and potential fire officers with a basic knowledge of building construction, commonly found fire protection features, conducting a pre-incident plan survey, determining what elements to include in a pre-incident survey, and developing and managing pre-incident plans. Additionally, this course covers the company officer’s
 responsibilities as they relate to the post-incident analysis process. This course is based upon the requirements found in Chapter 4 of NFPA 1021, Standard for Fire Officer Professional Qualifications. Successful completion of this course, along with the Leadership & Supervision, Firefighter Health and Safety, Company Training & Community Risk Reduction, and Fireground Strategy and Tactics for First Arriving Companies courses offers the student the opportunity to apply for a Fire Officer I certificate.

Course Length: 9 hours
Prerequisite: Firefighter I, or Basic Firefighter, or Firefighting Essentials Required
Text: Fire and Emergency Services Company Officer 5th Edition (IFSTA)
Course number: 01-11-0153
Course Location(s): Academy, Locally via Outreach

Strategy and Tactics for Initial Company Operations (NFA)

STICO is designed to meet the needs of Company Officers responsible for managing the operations of one or more companies during structural firefighting operations. STICO is designed to develop the management skills needed by company officers to accomplish assigned tactics at structure fires.

Designed for: Senior firefighter who may at times assume the responsibilities of the company officer (NFPA 1001, Standard for Fire Fighter Professional Qualifications, Level II).

Course Length: 16 Hours
Course number: 01-11-0066
Course Location(s): Academy

Tactical Fireground Simulations

This course provides students the ability to practice initial command functions on a fire emergency scene utilizing real time computer based scenarios. It is not intended to teach command functions, but rather reinforce previously learned theories while giving students the opportunity to practice in the command role. Through a series of computer simulations, students will serve as both company officer and initial incident commander. A mobile classroom is available for regional deliveries.

Course Number: 01-11-0148
Course Length: 12 hours
Designed for: Students with experience in initial command functions as this course reinforces theories associated with those functions.

Pre-requisites: Fireground Strategies and Tactics for First Arriving Companies or Strategy and Tactics for Initial Company Operations (NFA)

Location(s): Academy, Locally via Outreach

Version 5 Fire Reporting Workshop

Provides the necessary training to participate in the New York State Fire Reporting System for departments using the Version 5 paper report format. It includes an overview of the Fire Reporting System, procedures for completing the Version 5 fire reporting, quality control at the local level, and an understanding of how fire department data may be used.

Designed for: Fire service personnel who prepare Version 5 paper forms
Course Length: 3 hours
Course number: 01-11-0016
Course Location(s): Locally via Outreach

FIRE PREVENTION/CODE ENFORCEMENT

Codes courses are also offered locally throughout the year. For a list of dates, locations and topics, consult the internet site:
www.dos.ny.gov/DCEA/edu_train_overview.html

Introduction to Code Enforcement Practices Part I

Regulations, Administration and Enforce-ment. This program will discuss the role of the Code Enforcement Official and the practices necessary to carry out the job for a local government, including the process — from permit issuance, inspections, records and paperwork, through enforcement actions and legal recourse. In addition, a quick historical side trip will provide a perspective for the laws and regulations that have been enacted to create a uniform statewide approach to code enforcement. This course will include a 1.5-hour final exam.

Designed for: Code enforcement officials, building and fire inspectors
Course Length: 21 hours
Prerequisite: Introduction to Code Enforcement Practices Part I and Introduction to Code Enforcement Practices Part II
Course number: 02-06-0014
Course Location(s): Academy, Locally via Outreach

Inspection Procedures for Existing Structures

This course teaches the skills required to conduct inspections of existing buildings using the Fire and Property Maintenance Codes of New York State. The course will consist of a standard lecture on a topic, followed by a virtual inspection that requires the student to utilize the lecture information. An inspection form following the course outline is included in the student handout material. This course will include a 1.5-hour final exam.

Designed for: Code enforcement officials, building and fire inspectors
Course Length: 21 hours
Prerequisites: Introduction to Code Enforcement Practices Part I and Introduction to Code Enforcement Practices Part II
Course number: 02-06-0017
Course Location(s): Academy, Locally via Outreach
General Construction Principles
This course will acquaint code enforcement officials with the systems, equipment and structural requirements of the Code of New York State. In the first module, “Systems and Equipment,” the organization, applicability and content of the Mechanical, Fuel Gas, Plumbing, Energy and Residential Codes of New York State will be addressed. The second module, “Structural Requirements,” will consist of basic load and design theory and the resulting structural requirements in the Building and Residential Codes of New York State. This course will include a 1.5-hour final exam.

Designed for: Code enforcement officials, building and fire inspectors
Course Length: 21 hours
Prerequisites: Introduction to Code Enforcement Practices Part I and Introduction to Code Enforcement Practices Part II
Course number: 02-06-0013
Course Location(s): Academy, Locally via Outreach

Residential Code of New York State
This course will address the construction requirements for one and two family dwellings and low rise multiple dwellings using the Residential Code of New York State as the compliance method. It is designed to take the student through the steps of a typical code enforcement permit process, including code research, plan review and inspection. This course will include a 1.5-hour final exam.

Designed for: Code enforcement officials, building and fire inspectors
Course Length: 21 hours
Course number: 02-06-0001
Course Location(s): Academy, Locally via Outreach

Building Code of New York State
This course will address the construction requirements for commercial structures using the Building Code of New York State as the compliance method. It is designed to take the student through the typical code enforcement permit process for a commercial project, including code research, plan review and inspection. This course will include a 1.5-hour final exam.

Designed for: Code enforcement officials, building and fire inspectors
Course Length: 21 hours
Course number: 02-06-0001
Course Location(s): Academy, Locally via Outreach

Fire Alarm Systems
An overview of the components of a fire alarm system, as well as the operation and design of such systems. It also includes inspecting existing fire alarm systems and fire department operations at alarmed buildings. The final session of this course consists of hands-on training in the fire alarm laboratory.

Designed for: Fire department, municipal and industrial fire marshals and inspectors, code enforcement officials, fire officers
Course Length: 14 hours
Course number: 01-10-0034
Course Location(s): Academy, Locally via Outreach

Fire Inspector I Course
This course is designed to follow the NFPA 1031 Fire Inspector I standard. Students will be introduced to various codes and standards in order to develop a working knowledge of their application in the inspection process. Topics addressed in this course include the fire inspector’s responsibilities and role in code enforcement, general fire prevention practices, inspection competencies, life safety considerations and enforcement, fire safety principles and requirements related to hazardous materials, special hazards of electrical, heating, and cooking equipment and systems, and fire protection systems and equipment. At the conclusion of the course, all students will complete the Fire Inspector I National Certification Examination. There is a $25 registration fee for the exam (in addition to the $25 registration fee for the course), and registration for the exam will take place on the first day of class.

Designed for: Code enforcement, building and fire inspectors
Course Length: 40 hours
Course # 1-14-0046
Course Location: Academy

Fire and Life Safety Educator I
This is an advanced course designed for emergency service personnel and other professionals who deliver fire and/or life safety instruction to the public. In addition to the basic knowledge, skills and abilities required for fire and life safety educators, this course prepares the candidate to meet the Fire and Life Safety Educator I job performance requirements as defined in NFPA 1035 “Fire and Life Safety Educator Professional Qualifications”. Course topics include: organization, injury prevention, partnerships, media, documentation and record keeping, scheduling, presentation, teaching techniques, audience characteristics, lesson plans, presentation and evaluation methods, informational programs, life safety hazards, fire behavior and fire protection.

There is a pre-course reading assignment for this course. Students are required to successfully complete assignments, a final exam, and a final presentation. This course also includes homework and independent study. There is a dress code for candidates attending this course.

Designed for: Code Enforcement, Building and Fire Inspectors
National Certification Available: Yes
Course Length: 40 hours
Course Number: 01-10-0020
Course Location(s): Academy, Locally via Outreach

Required Text and Reading Material:
IFSTA Fire and Life Safety Educator (3rd Edition), NFPA 1035 - Fire and Life Safety Educator Professional Qualifications
National Certification Available: Yes
Course Length: 40 hours
Course Number: 01-10-0020
Course Location(s): Academy, Locally via Outreach

14
Fire Marshals and Inspectors Seminar
Conducted annually to keep fire inspectors aware of technological and code changes and to provide background information in the field of fire prevention. It includes speakers from commerce, industry, and government agencies. Attending the courses provided in this program will meet the 24 hour in-service credit requirement.
Designed for: Fire department, municipal and industrial fire marshals and inspectors, code enforcement officials
Materials Fee: $5
Course number: 01-10-0006
Course Location(s): Academy

Fire Sprinkler Systems Workshop
An overview of wet, dry, deluge, pre-action, and residential sprinkler systems, as well as water supply and design of sprinkler systems. It also includes inspecting existing sprinkler systems and fire department operations at sprinklered buildings. The final session of this course consists of hands-on training in the sprinkler laboratory.
Designed for: Fire department, municipal and industrial fire marshals and inspectors, code enforcement officials, fire officers
Course Length: 14 hours
Course number: 01-10-0018
Course Location(s): Academy, Locally via Outreach

Fire Sprinkler Plans Review
Presents an overview of the four types of sprinkler system occupancy classifications, water supply and pressures, and determination of compliance of sprinkler designs and installations with National Fire Protection Association (NFPA) 13 and New York State Uniform Fire Prevention and Building Code requirements. It also includes choosing proper system components; determining density and performing remote area calculations, as well as utilizing K-Factor and friction loss formulas; participation in a hydraulic calculation exercise; using a plan review checklist; and conducting an actual automatic sprinkler plan review.
Designed for: Fire department, municipal and industrial fire marshals and inspectors, code enforcement officials, fire officers
Course Length: 14 hours
Required Text: NFPA #13
Course number: 01-10-0017
Course Location(s): Academy, Locally via Outreach

Alternative Fire Suppression Systems
This course will introduce the students to various agents used in alternative fire suppression systems. The course will show the chemical makeup of agents, how they work to extinguish a fire, and any potential harm that agents may have on people. Certain applications for alternative systems will also be discussed.
Designed for: Fire department, municipal and industrial fire marshals and inspectors, code enforcement officials, fire officers
Course Length: 6 hours
Course number: 01-10-0046
Prerequisites: None
Required text: None
Materials fee: None
Course Location(s): Academy, Locally via Outreach

Fire and Life Safety Educators’ Conference
Co-sponsored with the NYS Association of Fire Chiefs, this course provides a series of presentations, demonstrations, workshops, and illustrations of successful public fire prevention education programs. It offers attendees new ideas and concepts to improve planning, developing, and presenting programs for both children and adults. Various speakers from private organizations, fire service, government agencies, and industry are involved.
Designed for: All emergency response personnel, teachers, and others
Course Length: 16 hours
Materials Fee: $5
Course number: 01-10-0012
Course Location(s): Academy, Locally via Outreach

FIRE SUPPRESSION

Recruit Firefighter Training
Provides training established under Executive Law, Section 159-d, Part 426.6. It provides minimum, uniform, basic fire training for probationary and nonpermanent firefighters. Training covers basic firefighter skills, fire department organization, first aid, firefighting tactics and strategies, and physical fitness programs.
Designed for: Probationary and non-permanent firefighters of fire departments required to meet NYS Minimum Training Standards
Course Length: 500 hours
Materials Fee: $1000. A special registration form and fee are required. Please contact the Academy.
Course number: 01-05-0038
Course Location(s): Academy
Note: Special circumstances apply.
Call the Academy for further information.

Basic Exterior Firefighting Operations (BEFO) 2016 Edition
This course prepares new firefighters to operate in the exterior or non-IDLH areas of the fire scene. Students participate in learning events covering firefighter personal protective equipment (PPE), self-contained breathing apparatus inspection and cylinder changing, fire department communications, building construction and fire behavior, modern fire control research, portable fire extinguishers, rope and knot tying, ground ladders, forcible entry, tactical ventilation theory, water supply, hose and fire streams, loss control, orientation to fire origin and cause determination, fire prevention and life safety initiatives, confined space awareness, overview of first aid and buddy care, and Hazardous Materials First Responder Operations.
Designed for: Fire department personnel who, for whatever reason, will not be classified as an interior structural firefighter.
Course Length: 79 hours
Course number: 01-05-0084
Course Location(s): Locally via Outreach
SCBA / Interior Firefighting Operations 2016 Edition
This course prepares new BEFO graduates to operate as Interior Structural firefighters or in IDLH areas of the fire scene. Students participate in learning events covering firefighter personal protective equipment (PPE), self-contained breathing apparatus donning, doffing and use, SCBA air management and SCBA emergencies, basic firefighter survival techniques, modern fire control methods, building fire search and victim removal techniques, firefighter survival skills, tactical ventilation techniques and basic power saw operation, forcible entry techniques, hose line advancement, vehicle and wildland firefighting theory, vehicle firefighting techniques, coordinated structure fire interior attack and transitional fire attack, and coordinated initial company operations. Designed for: BEFO course graduates ready to perform interior structural and IDLH firefighting operations.
Course Length: 49 hours
Prerequisites: Basic Exterior Firefighting Operations (BEFO) 2016 Edition Course Completion
OR BEFO 2015 Edition AND Bridge/ refresher training course
OR Scene Support Operations Course Completion AND Bridge/ refresher training course
OR Basic Firefighter or Essentials course completion AND Bridge / refresher training course.
Medical clearance and mask fit test is required to participate.
Course number : 01-05-0045
Course Location(s): Locally via Outreach

Firefighter I - Internet Based Course
This course is designed for the highly motivated, self-directed student with access to high-speed internet who can commit to a very aggressive training schedule in a compressed time format. Students will be expected to read three chapters, complete the respective on-line interactive slide shows and score 80% on three on-line chapter tests each week. Students will be monitored and assisted by an instructor through email and on-line course contact. Corresponding skills instruction and evaluation will occur at a training facility during weeks three, eight, and nine. Students must be available to attend a four-hour orientation session, weekend units at week three, and full week of units in week eight and week nine. Final written and skills evaluation will be performed at the end of week nine in person at the training facility. As the initial entry program for firefighting personnel, this combined course introduces firefighting concepts, practices and techniques necessary for the new member to become an interior structural firefighter who can perform under the direct supervision of a company officer. Completion of this course achieves the 21 objectives of function 4.2 Interior Firefighters of the OFPC Recommended Best Practices for FD Training Programs (01/15) document. Designed for: Entry-level FD members seeking to become interior structural firefighters
Course Length: 26 units of on-site skills training & 22 units of independent on-line learning all over a 9 week period
Prerequisites: Completion of an approved CPR course.
Students must be physically capable of wearing SCBA and possess current medical clearance for SCBA use. Students not possessing this prerequisite will not be allowed to participate for their own safety.
Course number : 01-05-0066
Course Location(s): Locally via Outreach

Firefighter II
Designed as the last step in initial level training for interior structural firefighters and/or who will serve as team or group leaders under the general supervision of an officer. Introduces new more advanced areas that will be expanded in other training programs. A firefighter receives the training components equivalent to those found within NFPA Firefighter II Standard.
Firefighter II is based on objectives from NFPA Standard 1001, Firefighter Level II, and consists of performance criteria in: incident command implementation, building materials and collapse, special rescue, hydrant flow and operability, hose tools, foam operations, flammable liquid/gases, detection, alarm systems, fire department communications, pre-fire planning, special situations, strategy and tactics.
Note: Firefighter II equivalents are Fire Attack II or Advanced Firefighter
Designed for: Interior structural firefighters and/or firefighters who may serve as team or group leaders
Course Length: 42 hours
Prerequisites: Firefighter I or equivalent and students must also be physically capable of wearing SCBA and possess current medical clearance for SCBA use. Students not possessing this prerequisite will not be allowed to participate for their own safety.
Course number : 01-05-0086
Course Location(s): Locally via Outreach

SCBA Confidence
SCBA Confidence provides a solid indoctrination in emergency procedures and establishes confidence in using self-contained breathing apparatus in a crisis situation.
Designed for: All fire service personnel
Course Length: 12 hours
Prerequisite: Fire Fighter I or equivalent.
Course number : 01-05-0044
Course Location(s): Academy, Locally via Outreach

Firefighter Survival
Based on Chief John Salka’s “Get Out Alive” program, this program is designed for self-rescue and rescue of trapped firefighters. Course content will enable firefighters to recognize the types of events encountered on the fire ground that contribute to firefighter disorientation and/or entrapment, to have knowledge of what is necessary to ensure their safety and that of their partners or crew members, and perform self-rescue techniques when disoriented, separated, or when needing to exit a structure in an emergency. This course requires students to perform a number of practical evolutions with self-contained breathing apparatus (SCBA). This course includes the National Fire Academy Calling the Mayday.
Designed for: Fire service personnel
Course Length: 12 hours
Prerequisites: Firefighter I
Course number : 01-05-0076
Course Location(s): Locally via Outreach
Firefighter Assist and Search Team (FAST)  
The firefighter as a member of a FAST operation will identify the tools and staffing requirements for a FAST operation, develop a rescue plan for a missing, lost, or trapped firefighter; demonstrate rope search techniques, and demonstrate removing a firefighter/victim up a stairwell, up or down through a hole in a floor/roof, moving a downed firefighter out of a window, and lowering a firefighter down a ladder. This course requires students to perform a number of practical evolutions with self-contained breathing apparatus (SCBA).  
Designed for: Fire service personnel  
Course Length: 15 hours  
Prerequisites: Firefighter Survival, Firefighter I  
Course number: 01-05-0018  
Course Location(s): Locally via Outreach

Truck Company Operations  
This course provides instruction for using ladder company equipment including operating ground ladders. Includes duties and responsibilities of the ladder company, operating and maintaining specialized tools, ventilation, forcible entry, search, and building construction.  
Designed for: Fire service personnel  
Course Length: 24 hours  
Prerequisites: Firefighter I or equivalent and students must also be physically capable of wearing SCBA and possess current medical clearance for SCBA use. Students not possessing this prerequisite will not be allowed to participate for their own safety.  
Course number: 01-05-0046  
Course Location(s): Locally via Outreach

Apparatus Operator - Emergency Vehicle Operation  
Provides vehicle operators with a better understanding of the seriousness of emergency vehicle operation. Based on objectives from National Fire Protection Association (NFPA) Standard 1002 Fire Apparatus Driver/Operator, Chapter 2, this course stimulates the thought processes to make students aware of the potential for tragedy and financial loss and of the legal and moral responsibilities encountered when operating an emergency vehicle.  

Apparatus Operator - Aerial Device  
Designed to follow the NFPA 1002 Fire Apparatus Driver/Operator Professional Qualifications, provides the student with knowledge necessary to operate, inspect and maintain aerial devices. Course content includes emergency vehicle operations review, classification and typing, vehicle inspection, operation of various types of aerial devices including platforms and ladders, proper location of placement and setup at an incident including driving, spotting and stabilizing. Fire departments must possess an aerial device to offer this program enabling students to fully operate this device.  
Designed for: Fire service personnel  
Course Length: 24 hours  
Prerequisites: Apparatus Operator, and BEFO (formerly known as Scene Support Operations) or equivalent  
Course number: 01-05-0003  
Course Location(s): Locally via Outreach

Apparatus Operator - Pump  
Offers knowledge and skills essential to pump operation. Based on objectives from National Fire Protection Association (NFPA), Fire Apparatus Driver/Operator, Chapter 3, this course includes responsibilities of pump operators, hydraulics and friction loss, pump controls and accessories, fire streams, pumper practices, pumping from draft and pump evolutions, and using the fire pump at the fire hydrant. Demonstrations and practice sessions are included.  
Designed for: Fire service personnel  
Course Length: 24 hours  
Prerequisites: Apparatus Operator, and BEFO (formerly known as Scene Support Operations) or equivalent  
Course number: 01-05-0005  
Course Location(s): Locally via Outreach

Water Supply Operations  
Offers firefighters with information and skills in determining water supply requirements for firefighting purposes and water delivery methods. Demonstrations and practice sessions are included.  
Designed for: Fire service personnel  
Course Length: 27 hours  
Prerequisites: BEFO (formerly known as Scene Support Operations) or equivalent and Apparatus Operator - Pump  
Course number: 01-05-0080  
Course Location(s): Locally via Outreach

Live Fire Training – NFPA 1403, 2018 Edition  
The purpose and intent of this course is to provide the student with basic understanding of the requirements of NFPA 1403 Standard on Live Fire Training Evolutions. It is intended that the student be pro¬vided with an introduction to the necessary knowledge and tools to properly prepare and conduct live fire-training evolutions. This program provides an in-depth analysis of NFPA 1403, addressing evolutions at municipal training centers, gas fired training buildings and exterior props, vehicle fires and acquired structures and exterior class B fires. It is also designed to provide an overview of live fire training requirements, especially for responsible individuals such as commis¬sioners and chiefs who may not be directly involved with the conduct or planning of these evolutions, but with whom may rest the ultimate responsibility for training within their jurisdiction.  
Designed for: Commissioners, chief officers, presidents, members of boards of directors and elected officials who may have legal authority and responsibility for fire department live fire training activities and those who actually conduct live fire evolutions.  
Course Length: 4 hours  
Course number: 01-05-0079  
Course Location(s): Locally via Outreach
Aircraft Rescue and Firefighting
Covers specialized areas for the air transportation industry, such as airport and aircraft familiarization, firefighting agents, rescue, ventilation and forcible entry for both civilian and military aircraft.
Designed for: Fire service personnel
Course Length: 12 hours
Prerequisite: Firefighter I or equivalent
Course number: 01-05-0002
Course Location(s): Locally via Outreach

Basic Wildland Fire Suppression
Developed by the New York State Department of Environmental Conservation Forest Rangers and the New York State Office of Fire Prevention and Control for firefighters involved in wildland fire suppression. The course contents include jurisdiction and responsibilities, fire behavior, wildland fire elements and size-up, use of tools and equipment, general concepts related to fire suppression, securing the control line, and standards for safety.
Designed for: Fire service personnel
Course Length: 12 hours
Prerequisite: Basic Firefighter or Firefighting Essentials
Course number: 01-05-0007
Course Location(s): Locally via Outreach

Basic Wildland Search Skills
Developed by the New York State Department of Environmental Conservation, the Basic Wildland Search Skills Course teaches the most basic skills needed to conduct searches in the wildland environment. Topics covered in this course include, basic search organization (Incident Command System), communications, search techniques, attitude and safety. This course concludes with a field exercise to practice the type 3 search technique (grid search) discussed in the classroom. Graduates of this course will receive a “Green Card” which will identify them as having successfully completed this course. This course is also a prerequisite to other more advanced search courses offered by the New York State Department of Environmental Conservation.
Designed for: Fire service personnel
Course Length: 8 hours
Prerequisite: None
Course number: 01-05-0008
Course Location(s): Locally via Outreach

Courage to be Safe
OFPC, in partnership with the National Fallen Firefighters Foundation, is delivering this educational initiative to accomplish the goal of the US Fire administration to reduce firefighter fatalities by 25 percent within five years and 50 percent within 10 years. The program is based on 16 initiatives developed during the Firefighter Life Safety Summit.
Designed for: All firefighters, especially individuals in leadership and decision making positions
Course Length: 4 hours
Course number: 01-15-0001
Course Location(s): Locally via Outreach

Fire Mobilization and Mutual Aid Awareness
An awareness level course designed for officers and firefighters who may deploy as part of the New York State Fire Mobilization and Mutual Aid Plan or department officers who may find themselves needing to request assistance through the New York State Fire Mobilization and Mutual Aid Plan during a large scale event. Topics include: an overview of the New York State Fire Mobilization and Mutual Aid Plan, requesting and deploying resources, expectations of deploying resources, documentation, and an overview of the reimbursement process.
Designed for: All emergency response personnel
Course Length: 3 hours
Course number: 01-05-0083
Course Location(s): Locally via Outreach

Principles of Building Construction: Noncombustible (NFA)
Introduces special characteristics of noncombustible and fire resistive construction as they concern the fire service. Primary emphasis is on improving the fire officer’s ability to ensure firefighter safety by recognizing common causes and indicators of failure and other hazards related to building construction. Course material enables the fire officer to better predict the overall reaction of a building to fire conditions.
Designed for: Fire service personnel
Course Length: 12 hours
Prerequisites: BEFO (formerly known as Scene Support Operations) or equivalent
Course number: 01-05-0034
Course Location(s): Locally via Outreach

The Rules Have Changed...
The Firefighter’s Guide to Lightweight Wood Construction
This course introduces the student to the special characteristics and considerations of Lightweight Wood Construction. Topics such as manufacturing methods, component awareness, fire performance, and strategies & tactics pertaining to fires involving lightweight wood construction will be examined. Primary emphasis is on improving fire personnel’s ability to recognize the presence of lightweight wood construction and the hazards related with it. Course material enables the student to recognize the dangers, operate safely and better predict the overall reaction of a building during fire conditions. The course includes three student activities.
HAZARDOUS MATERIALS

Hazardous Materials First Responder Operations
Prepares emergency responders to effectively and safely respond to and stabilize hazardous materials incidents from a defensive position. Meets the training requirements of OSHA 1910.120 for the first responder, both at the awareness and operations levels. Includes recognizing and identifying hazardous materials, classifications and the hazards of each class, transport vehicles and associated hazards, planning for incidents, personal protective equipment and its limitations, confinement methods and decontamination procedures. Case studies identify appropriate operational procedures. This course is also contained in the Firefighter I course. Designed for: All emergency response personnel
Course Length: 16 hours
Course number: 01-09-0071
Course Location(s): Academy, Locally via Outreach

Hazardous Materials Technician Module 1: Primary Skills for the Hazardous Materials Responder
Emergency response personnel will learn basic skills to effectively and safely respond to incidents involving hazardous materials in an offensive or defensive mode. This course covers portions of OSHA 1910.120 and NFPA 472 for the Hazardous Materials Technician. Topics include terminology associated with Hazardous Materials responses, use of reference materials at a hazardous materials incident, determining appropriate decontamination methods and the selection and use of chemical protective clothing. Course uses both lecture and hands-on skill stations. Designed for: All emergency response personnel
Course Length: 24 hours
Course number: 01-09-0098
Course Location(s): Academy, Locally via Outreach

Hazardous Materials Technician Module 2: Interpreting the Hazardous Environment
This second in a series of Hazardous Materials Technician modules provides emergency response personnel with skills to interpret and better understand the hazardous environments they will be working in. This course covers portions of OSHA 1910.120 and NFPA 472. Topics include the use of chemistry for the emergency responder; monitoring, detection and identification instrumentation; proper sampling protocols and identification of special response incidents such as Clandestine Laboratories and Weapons of Mass Destruction/Terrorism incidents. Designed for: All emergency response personnel
Course length: 12 hours
Course number: 01-09-0099
Course Location(s): Academy, Locally via Outreach

Hazardous Materials Technician Module 3: Managing the Hazardous Materials Incident
OHSA 1910.120 and NFPA 472 require Hazardous Materials Technicians to be trained in the management of Hazardous Materials incidents. This third segment in a series of 5 covers the requirements of those two standards. Course topics include risk based analysis, a Hazardous Materials Technician’s role in ICS, container identification, planning a response and incident termination. Designed for: All emergency response personnel
Course length: 8 hours
Course number: 01-09-0099
Course Location(s): Academy, Locally via Outreach

Terrorism incidents.

Weapons of Mass Destruction/ Terrorism incidents.

Refresher Training
The Refresher Training course is a unique approach to fire training in New York State. It is designed to address the needs of veteran firefighters who have been trained for some time and are in need of skill refresher opportunities. A course is created by county fire coordinators to provide targeted refresher training and will include specific skills retraining by selecting a series of existing units of instruction from any of the courses listed below. Contact your county fire coordinator for further information.

Designed for: Fire service personnel
Course number and length:
01-05-0042, 2 units, 6 hours;
01-05-0043, 3 units, 9 hours;
01-05-0039, 4 units, 12 hours
Prerequisite: Firefighter I (IS) or equivalent
Courses Offered: Firefighter I, Firefighter II, Apparatus Operator - Pump, Truck Company Operations, Apparatus Operator - Aerial Device
Location: Locally via Outreach

Thermal Imaging Camera Operations
This course incorporates (8) hours of training under live fire conditions along with (4) hours of interactive lecture. Students will receive instruction on NFPA 1408 and gain the ability to evaluate their own department’s compliance. Students are encouraged to bring their own Thermal Imaging Cameras, otherwise one will be provided.

Designed for: MTOs, MFIs and Fire Company/District Training Officers with responsibilities of training administration and delivery.
Pre-requisites: Firefighter 1 or equivalent and Principles of Instruction or equivalent.
Materials Fee: $25
Course Number: 01-14-0021
Course Length: 12 hours
Course Location: Academy

The fourth module in the Hazardous Materials Technician curriculum gives the hazardous materials responder the knowledge to properly contain and mitigate the hazard posed by a hazardous material in a damaged container. This course will discuss and allow for hands-on learning on the following topics: Damage assessment and product behavior, Plugging, Patching, dome cover clamps, overpacking, Chlorine Emergency Kits A, B, C. We will also discuss the special considerations associated with pressurized containers, drums and intermediate bulk containers. Designed for: All emergency response personnel
Course length: 24 hours
Course number: 01-09-0102
Course location(s): Academy, Locally via Outreach

Hazardous Materials Incident Command

Provides the hazardous materials incident commander with the skills necessary to successfully and safely manage the incident. Includes the need for an organized approach to managing hazardous materials incidents, the required elements for an employer's emergency response plan, site-specific pre-incident emergency planning, incident analysis and the development of site safety plans, strategic goals for hazardous materials incidents, and developing a plan of action and its application and tactical objective to accomplish the strategic goals. Designed for: All emergency response personnel
Course length: 24 hours
Course number: 01-09-0033
Course Location(s): Locally via Outreach

Hazardous Materials Incident Safety Officer

This course will provide participants with information as to the role of the safety officer that is required for a hazardous materials incident under OSHA 29 CFR 1910.120. During this course students will learn the functions of the safety officer, the importance of monitoring operations of the hazardous materials operations, the need to provide information to the incident commander, and appropriate actions to be taken in order to provide for the safety of the responders and the public. With the use of scenarios, participants will fulfill the role of the safety officer at various scenes and make appropriate safety considerations.
Designed for: Incident Safety Officers at hazardous materials incidents
Course Length: 8 hours
Course number: 01-09-0034
Course Location(s): Locally via Outreach

Hazardous Materials First Responder Operations Annual Refresher

Provides training to review and refresh the competencies covered in OSHA 1910.120 HAZWOPER for First Responder Awareness and Operations Level Responders. This course provides a review of the nine classes of materials, the use of the US DOT Emergency Response Guidebook, principles of containment, confinement, and extinguishment within the scope of the duties of a first responder at the Operations Level. This training is designed to satisfy annual refresher training requirements of OSHA for hazardous materials.
Designed for: All emergency response personnel
Course Length: 4 hours
Course number: 01-09-0074
Course Location(s): Locally via Outreach

Hazardous Materials Rapid Intervention Team (RIT)

During this course, students will identify tools and staffing requirements for RIT operations during a hazmat incident. Students will learn how to develop a rescue plan for an injured or trapped responder, move a responder up and down stairs, down through a hole, or out of a window, and lower a
responder off of objects such as rail cars and cargo trucks. Students will also demonstrate various techniques to supply air to downed responders in low and no air emergencies. This course requires students to perform several practical evolutions with self-contained breathing apparatus (SCBA) and Level A PPE.

Designed for: Practicing hazardous materials technicians
Course Length: 16 hours
Prerequisite: Hazardous Materials Technician
Course number: 01-09-0082
Course Location(s): Academy

Cargo Truck Hazardous Materials Specialist
This is an advanced level course that will prepare Hazardous Materials Technicians to meet the competencies set forth in NFPA Standard 472 Chapter 13. The topics covered in handling cargo truck emergencies are extremely hazardous and employ highly skilled operations. Competencies covered include overviews of specification cargo trailers; damage assessment; leak mitigation; product removal techniques, (including flaring and transfers); and up righting overturned trailers. Responders will gain hands on experience with several trailer types, including gasoline, corrosive, propane and cryogenic trailers; and the tools/ techniques necessary to plan and implement a response. The majority of the class is outside practical evolutions.

Designed for: Hazardous Materials Technicians
Course length: 24 hours
Prerequisite: Hazardous Materials Technician
Course number: 01-09-0082
Course location(s): Academy
PPE required: Full structural turnout gear, SCBA with spare cylinder, plus work clothes to include steel toed shoes, leather work gloves, eye protection and head protection.

The Challenge of Pesticides and Poisons
Develops skills necessary to safely stabilize a hazardous materials incident involving pesticides and poisons. Includes procedures to correctly identify materials, determine their toxicology, and develop strategies to manage the incident. Information on storage and distribution requirements of the Fire Code of New York State for pesticides and poisonous materials is also included. Case studies examine the dangers of these materials and the lessons to be learned from actual incidents.

Designed for: All emergency response personnel
Course Length: 12 hours
Course number: 01-09-0055
Course Location(s): Academy, Locally via Outreach

Decon Trailer Equipment
Trains firefighters and emergency services personnel to fully understand and perform decontamination of people and equipment at the scene of a hazardous materials release. Proper protection as well as procedures for emergency and formal decontamination are covered.

Designed for: All emergency response personnel who may be required to perform decontamination.
Course Length: 4 hours
Course number: 01-09-0009
Course Location(s): Locally via Outreach

Bath Salts: The Latest Threat to Responders
This course is intended to provide all levels of first responders with the basic knowledge required to recognize a potential bath salts incidents, how to safely approach and handle the effected individuals, proper personal safety precautions, and scene management.

Designed for: All First Responder Personnel
Course Length: 2 hours
Course number: 01-09-0088
Course Location(s): Academy, Locally via Outreach

Chemical Suicide: Information for First Responder
Every year dozens of people in the United States commit suicide using various types of hazardous materials, and too often first responders become exposed to these chemicals. This course is designed to give all first responders the skill set necessary to identify a suicide involving hazardous materials, safely approach the incident using appropriate personal protective equipment, and manage the scene successfully.

Designed for: All first response personnel
Course length: 2 hours
Course number: 01-09-0080
Course location(s): Locally via Outreach

Chemical Suicide: Information for First Responder
Every year dozens of people in the United States commit suicide using various types of hazardous materials, and too often first responders become exposed to these chemicals. This course is designed to give all first responders the skill set necessary to identify a suicide involving hazardous materials, safely approach the incident using appropriate personal protective equipment, and manage the scene successfully.

Designed for: All first response personnel
Course length: 2 hours
Course number: 01-09-0080
Course location(s): Locally via Outreach

Chemical Suicide: Information for First Responder
Every year dozens of people in the United States commit suicide using various types of hazardous materials, and too often first responders become exposed to these chemicals. This course is designed to give all first responders the skill set necessary to identify a suicide involving hazardous materials, safely approach the incident using appropriate personal protective equipment, and manage the scene successfully.

Designed for: All first response personnel
Course length: 2 hours
Course number: 01-09-0080
Course location(s): Locally via Outreach

Decon Trailer Equipment
Trains firefighters and emergency services personnel to fully understand and perform decontamination of people and equipment at the scene of a hazardous materials release. Proper protection as well as procedures for emergency and formal decontamination are covered.

Designed for: All emergency response personnel who may be required to perform decontamination.
Course Length: 4 hours
Course number: 01-09-0009
Course Location(s): Locally via Outreach
foam nozzles and proportioning equipment; and determining foam needs for various scenarios. There are also hands on practical activities involving vapor suppression with finished foam, confining spills, and live fire extinguishment. During live fire evolutions, foam handlines will be set up and employed for a leaking and burning tank truck. Full structural turnout gear and SCBA with spare cylinder are required for this course for all students.

**Designed for:** All emergency response personnel  
**Course Length:** 12 hours  
**Prerequisite:** Fire Fighter I or equivalent and Hazmat First Responder Operations.

**Materials Fee:** $45  
**Course number:** 01-09-0084  
**Course Location(s):** Academy, Locally via Outreach

**First Receiver Decontamination**

Trains hospital personnel to fully understand and perform decontamination of victims of hazardous materials or weapons of mass destruction incidents. Proper levels of protection as well as procedures for formal, emergency, and mass decontamination are covered.

**Designed for:** Hospital personnel  
**Course Length:** 8 hours  
**Course number:** 01-09-0075  
**Course Location(s):** Locally via Outreach

**Flammable and Combustible Liquid Emergencies**

Develops skills needed to respond to flammable liquid releases in both fire and non-fire situations. Includes familiarization with flammable liquids and their hazards, normal transportation and storage containers, and firefighting foams and their applications.

**Designed for:** All emergency response personnel  
**Prerequisite:** Firefighter 1; or Basic Exterior Firefighting Operations (BEFO) and the SCBA/Interior Firefighting Operations

**Course Length:** 16 hours  
**Course number:** 01-09-0022  
**Course Location(s):** Academy, Locally via Outreach

**Flammable Gas Emergency Response Workshop**

Develops skills needed to respond and successfully control propane and natural gas incidents. Industry representatives participate and share their ability to serve as a fire department resource. Includes classroom discussion of the properties of propane and natural gas, production and distribution, planning for and responding to fires or other incidents involving these gases. Students will participate in several live fire evolutions as a member of a fire attack team. Students are required to bring approved turn-out gear and SCBA.

**Designed for:** All firefighters and fire officers  
**Course Length:** 12 hours  
**Prerequisite:** Firefighter I or equivalent  
**Materials Fee:** $25  
**Course number:** 01-09-0023  
**Course Location(s):** Academy

**Hazardous Materials for the Code Official**

Under the Fire Code of New York State, local officials have a significant responsibility and the authority to ensure proper storage and handling of hazardous materials. Training includes the principles of hazardous materials identification, identification of the nine classes and appropriate divisions applied to hazardous materials, and proper storage. Also includes separating incompatible materials, marking facilities storing hazardous materials, and the code’s responsibility in the hazardous materials reporting requirements. OSHA 1910.120 training requirements for Hazardous Materials First Responder Awareness Level are included.

**Designed for:** All emergency response personnel with code enforcement responsibility  
**Course Length:** 6 hours  
**Course number:** 01-09-0073  
**Course Location(s):** Academy, Locally via Outreach

**High Hazard Train Fires**

This course will prepare students to respond to incidents involving High Hazard Flammable Train (HHFT), which transport a single ignitable liquid product such as crude oil or ethanol. Topics covered will include strategic (offensive vs. defensive) and tactical decision making, tank car recognition, water supply, Class B foam operations and the effective use of cooling streams. As the majority of the course will consist of outside skills evolutions, some including live fire, it is a physically demanding course and students must be prepared to work in the various environmental conditions appropriate for the season in which the course is being conducted.

**Designed for:** Fire service personnel  
**Course Length:** 16 hours  
**Prerequisite:** Firefighter I or equivalent.  
**Materials Fee:** $45  
**Course number:** 01-09-0113  
**Course Location(s):** Academy

**Personal Protective Equipment for the Hazardous Materials Operations Level Responder**

This course is designed for Operations level responders that may be required to participate in activities requiring the use of chemical protective clothing. It incorporates both classroom presentation and hands on training. Focus is on selection of proper PPE, safety, proper donning/doffing techniques and dexterity.

**Designed for:** Hazardous Materials First Responder Operations level personnel  
**Course length:** 4 hours  
**Prerequisite:** Hazardous Materials First Responder Operations  
**Course number:** 01-09-0081  
**Course location(s):** Academy, Locally via Outreach

**Recognizing Clandestine Drug Lab Operations**

Clandestine drug labs can be found in a variety of places, from a residence to a hotel room to a vehicle. They can manufacture a number of substances including methamphetamine, MDMA (ecstasy), or even steroids. The processes involved frequently utilize flammable liquids, corrosives, toxic gases, and water reactive materials. This course provides responders with the skills to recognize a potential clandestine lab situation and take the appropriate course of action. The course focuses heavily on methamphetamine production, especially the “one pot” method currently on the increase in New York State, and deals with proper
procedures for recognition, isolation, reporting, and dealing with victims and the “cooks” themselves. 

**Respiratory Protection Program**

This course is designed for the agency’s respiratory protection program administrator as defined in 29 CFR 1910.134 OSHA Respiratory Protection Standard. Curriculum content outlines the requirements of the Respiratory Protection Program standard for emergency escape de- vices, air purifying respirators (negative pressure) and self-contained breathing apparatus (positive pressure). In addition, training is provided on the procedures and equipment to conduct a quantitative fit test.

**Computer-Aided Management of Emergency Operations (CAMEO)**

Offers hands-on training using computers to assist in hazardous chemical emergencies. The Cameo program contains response information and recommendations for thousands of commonly transported chemicals, an air dispersion model to assist in evaluating release scenarios and evacuation options. CAMEO includes several easily adaptable databases and programs that will assist responders to plan for, and respond to, incidents involving chemicals used in their communities.

**Sampling Techniques for the Hazardous Materials Technician**

Prepares hazardous materials technicians to effectively collect and submit samples according to local and state protocols. This course will train technicians to collect samples that are suitable for laboratory analysis.

**Hazardous Materials Seminar**

Each year the Hazardous Materials Seminar brings New York’s Haz Mat Responders together to participate in a weekend of learning. Speakers from across the country deliver presentations on current topics of interest as well as the newest developments in the field. Attendees have opportunities to network with their peers, exchanging information and experiences. Many emergency service organizations accept attendance at this seminar as fulfillment of the annual recertification for Haz Mat Operations or Technician level training required by OSHA 1919.120.

**Advanced Sampling Techniques for the Hazmat Technician**

This advanced level course will show Hazardous Materials Technicians how to obtain solid, liquid, and gas samples for laboratory analysis from a variety of potential situations while operating in PPE. Competencies covered include techniques for sampling unity and multiphasic liquids, drums and totes, underground tanks, transport and storage tanks, railcars, ponds, rivers, soil and the air.

**Health and Safety Officer (NFA)**

Addresses the health and safety officer’s role in identifying, evaluating, and implementing policy and procedures that affect health and safety aspects for emergency responders. Risk analysis, wellness issues, and other occupational safety issues are discussed.

**Highway Safety for Emergency Responders**

Students completing this course will have an awareness of the serious nature of highway crash scenes and the hazards associated with them. Students will have an understanding of the four phases of traffic control that take place in the first hour. They will also possess the ability to select and use the appropriate traffic control devices for various crash sites. Other topics covered are: stopping sight distance requirements for vehicles across a broad range of speeds, how to establish various traffic control zones, where to stand and how to direct traffic.

**Fire Police**

Trains fire police to perform their duties more effectively. It includes defining and interpreting terms, oath of office, relation to regular police officers, general duties, maintaining safe conditions at an emergency, traffic direction and control, pre-planning, and various laws of interest to the fire service. Under the provision of General Municipal Law, Section 209-c, this course, when approved by OFPC, must be completed by every fire police officer who was appointed after September 1, 1980.

**Highway Safety for Emergency Responders**

Students completing this course will have an awareness of the serious nature of highway crash scenes and the hazards associated with them. Students will have an understanding of the four phases of traffic control that take place in the first hour. They will also possess the ability to select and use the appropriate traffic control devices for various crash sites. Other topics covered are: stopping sight distance requirements for vehicles across a broad range of speeds, how to establish various traffic control zones, where to stand and how to direct traffic.

**Health and Safety Officer (NFA)**

Addresses the health and safety officer’s role in identifying, evaluating, and implementing policy and procedures that affect health and safety aspects for emergency responders. Risk analysis, wellness issues, and other occupational safety issues are discussed.

**Highway Safety for Emergency Responders**

Students completing this course will have an awareness of the serious nature of highway crash scenes and the hazards associated with them. Students will have an understanding of the four phases of traffic control that take place in the first hour. They will also possess the ability to select and use the appropriate traffic control devices for various crash sites. Other topics covered are: stopping sight distance requirements for vehicles across a broad range of speeds, how to establish various traffic control zones, where to stand and how to direct traffic.

**Fire Police**

Trains fire police to perform their duties more effectively. It includes defining and interpreting terms, oath of office, relation to regular police officers, general duties, maintaining safe conditions at an emergency, traffic direction and control, pre-planning, and various laws of interest to the fire service. Under the provision of General Municipal Law, Section 209-c, this course, when approved by OFPC, must be completed by every fire police officer who was appointed after September 1, 1980.

**Health and Safety Officer (NFA)**

Addresses the health and safety officer’s role in identifying, evaluating, and implementing policy and procedures that affect health and safety aspects for emergency responders. Risk analysis, wellness issues, and other occupational safety issues are discussed.

**Highway Safety for Emergency Responders**

Under the provision of General Municipal Law, Section 209-c, this course, when approved by OFPC, must be completed by every fire police officer who was appointed after September 1, 1980.

**Health and Safety Officer (NFA)**

Addresses the health and safety officer’s role in identifying, evaluating, and implementing policy and procedures that affect health and safety aspects for emergency responders. Risk analysis, wellness issues, and other occupational safety issues are discussed.

**Highway Safety for Emergency Responders**

Students completing this course will have an awareness of the serious nature of highway crash scenes and the hazards associated with them. Students will have an understanding of the four phases of traffic control that take place in the first hour. They will also possess the ability to select and use the appropriate traffic control devices for various crash sites. Other topics covered are: stopping sight distance requirements for vehicles across a broad range of speeds, how to establish various traffic control zones, where to stand and how to direct traffic.
**Incident Safety Officer (NFA)**
Examines the safety officer’s role at emergency response situations. It focuses specifically on operations as a safety officer within the incident command system.

**Designed for:** Fire department safety officers

**Prerequisite:** Firefighter I

**Course Length:** 15 hours

**Course number:** 01-15-0007

**Course Location(s):** Academy, Locally via Outreach

---

**On-Scene Rehabilitation for Emergency Operations**
This course explains the why, when and how of rehabilitation for emergency responders (firefighters, hazardous materials, EMS, technical rescue, ice and water rescue, etc.). The course shows how and when to meet the requirements of National Fire Protection Association (NFPA) 1500 Fire Department Occupational Safety and Health Chapter 6-6, NFPA 1561 Emergency Services Incident Management System Chapters 2-8 and 9.

**Designed for:** Incident commanders, safety officers and emergency service personnel

**Course Length:** 12 hours

**Course number:** 01-15-0008

**Course Location(s):** Academy

---

**Traffic Incident Management**
The Strategic Highway Research Program developed a program, by responders—for responders, with the objective that nationally, responders acquire a common set of core competencies for traffic incident management. The process of coordinating resources of several different partner agencies and private sector companies to detect, respond to, and clear traffic incidents as quickly as possible to reduce the impacts of incidents on safety and congestion, while protecting the safety of on-scene responders and the traveling public.

The safety of responders and motorists, quick response, and effective communications at traffic incident scenes are highlighted.

**Designed for:** All Emergency Response Personnel, Highway, Towing, and Traffic Management Professionals

**Course Length:** 8 hours

**Prerequisite:** None

**Course number:** 01-15-0018

**Course Location(s):** Academy, Outreach

---

**PUBLIC SAFETY DISPATCHER TRAINING**

**Public Safety Dispatcher I (APCO)**
This program is designed to address the basic functional areas needed for a student to become a Public Safety Dispatcher. This course will address the following topic areas: Telephone, radio and other industry related technologies, call-taking skills, call classification and radio dispatching. The training will also discuss stress management and liability issues related to the dispatch profession. This class will follow the APCO Public Safety Telecommunicator I curriculum.

**Designed for:** All emergency service personnel

**Course Length:** 40 hours

**Course number:** 01-05-0049

**Course Location(s):** Academy

**Required Text:** APCO PST1 Student Manual. The student is responsible to obtain a copy of the text prior to class. Instructions for ordering the text will be sent when course registration is confirmed by OFPC. Allow three weeks for delivery from APCO.

---

**Public Safety Dispatcher II**
This curriculum serves to provide further education for the modern day Public Safety Dispatcher. This course will focus on current trending issues in the industry and includes the following topics: Domestic violence, handling different types of callers as well as managing the mass-casualty incident (eg. Active shooting). Also included is managing fireground communication including MAYDAY situations. A discussion of legal responsibilities and stress management for the seasoned dispatcher will also be included. Perfect for in-service training credit!

**Designed for:** Active public safety dispatchers

**Course Length:** 40 hours

**Prerequisite:** Experience as a public safety dispatcher

**Course number:** 01-05-0060

**Course Location(s):** Academy

---

**Communication Center Supervisor (APCO)**
This course is designed for current or prospective 911 and Communication Center Supervisors. Topics include: The Communications Supervisor Role, Liability Issues, Policies and Procedures, Communication Skills and Employee Evaluation and Motivation. Class will use practical and group exercises to supplement class lectures. This course will follow the APCO Communication Center Supervisor 4th Edition Text. Students are encouraged to bring a copy of their policies and procedures manuals.

**Designed for:** Students who are currently communications supervisors, or under consideration for supervisory positions.

**Pre-requisites:** Students should be experienced in communications center operations and have a working knowledge of the associated policies and procedures.

**Required Text:** APCO Communication Center Supervisor 4th Edition. Text is the responsibility of the student to acquire. Instructions for ordering text will be sent along with registration confirmation. Allow (3) weeks for delivery from APCO.

**Course Length:** 24 hours

**Course Number:** 01-05-0052

**Course Location(s):** Academy

---

**TECHNICAL RESCUE**

All technical rescue courses are based on objectives from National Fire Protection Association (NFPA) 1006 – Rescue Technician Professional Qualifications and 1670 – Standard on Operations and Training for Technical Rescue Incidents.

---

**Vehicle Rescue: Operations Level (VROL)**
Provides hands-on training in motor vehicle rescue and extrication techniques while stressing the need for scene safety and vehicle stabilization. It includes rescue theory, rescue life cycle, new technology in automotive design and rescue tools and their uses.

**Designed for:** All emergency response personnel

**Course Length:** 20 hours

**Prerequisites:** Firefighter I; Basic Firefighter; or Firefighting Essentials, or BEFO (formerly known as Scene
Alternative Fueled Vehicles and New Vehicle Technology
Provides information about the hazards of the alternate fuels, such as ethanol, E85, compressed natural gas, liquefied natural gas and propane. The course also discusses battery powered, hybrid and hydrogen fuel cell vehicles. Safety information on hazards that may be present at incidents involving an alternative fueled vehicle is also presented. The second portion of the program deals with the changing technology of the automobile, including vehicle safety standards and vehicle features. Intended to provide new information for those students who may have completed vehicle rescue training in the past and have a need to update information about changes to newer vehicles.

Designed for: All emergency response personnel
Course Length: 4 hours
Course number : 01-04-0006
Course Location(s): Academy, Locally via Outreach

Amtrak Passenger Train Emergency Response Procedures
This course is presented by Amtrak. Content includes familiarization with railroad systems, equipment, and operational procedures; operation of access and egress devices, as well as emergency operation of the equipment; power systems including locomotives, electric powered equipment; firefighting/search and rescue procedures for rail cars (this includes a practical application from a smoke filled railcar); and victim removal from rail cars using various rescue procedures. All students wishing to participate in the hands-on portion dealing with search and rescue of rail cars, along with victim removal techniques, are required to bring firefighting OSHA compliant protective equipment, self-contained breathing apparatus (SCBA), and one spare air bottle.

Designed for: All emergency response personnel

Concrete Breaching and Breaking
The purpose of this course is to provide the student the basic principles on the safe and effective operations of penetrating concrete debris and damaged slabs or walls to safely extricate trapped victims. The student shall learn the safe and proper techniques to breach, break, cut and burn to gain access through concrete, steel or other structural components during rescue operations in heavy floor, heavy wall, steel and concrete structures. The student will also learn to identify the different types of concrete construction as well as the safety hazards that present themselves to the rescuer at every collapse situation. Students will be able to rapidly identify pre and post tensioned concrete and the specific dangers each represents in a given collapse situation.

Designed for: Emergency response personnel with responsibility in structural collapse operations.
Course length: 16 hours

Confined Space Awareness and Safety
Provides identification and awareness information to allow students to make reasonable judgments in confined-space rescue situations. It includes topics such as regulations, response planning, hazard types, personal protective equipment, retrieval equipment, and air quality. Case histories and student exercises provide opportunities to practice planning skills for confined space rescue response, as well as evaluate past incidents.

Designed for: All emergency response personnel
Course Length: 6 hours
Course number : 01-04-0014
Course Location(s): Academy, SPTC, Locally via Outreach

Confined Space Rescue - Technician Level
This course provides practical training in confined-space hazards; air monitoring and ventilation; space isolation techniques; personal protective equipment, including both supplied air, self-contained breathing apparatus (SCBA), and respirators; and retrieval systems and retrieval methods. Practical evolutions enable the student to evaluate a specific confined-space incident and perform the necessary procedures to safely and effectively rescue the victim.

Designed for: All emergency response personnel with responsibilities in confined-space rescue
Course Length: 32 hours
Prerequisites: Firefighter I, Basic Firefighter, or Firefighting Essentials, Rescue Technician - Basic and Confined Space: Awareness and Safety. Signed Training Authorization
Course number : 01-04-0012
Course Location(s): Academy, SPTC, Locally via Outreach
Emergency Boat Operations & Rescue

Emergency Boat Operations & Rescue Training is designed to meet the requirements of NFPA standards for surface water boat operators. Its primary goal is to train firefighter and other emergency response personnel who respond to water rescue emergencies using small watercraft in non-moving water situations.

Designed for: Emergency response personnel with responsibility for the operation of motorized water craft in a moving water or flood environment.
Course Length: 24 hours
Prerequisite: Water Rescue - Operations Level
Course number: 01-04-0066
Course Location(s): SPTC, Locally via Outreach

Ice/Cold Water Rescue - Technician Level

Ice/Cold Water Rescue - Technician Level is a 16-hour training program. Advanced level ice rescue training including self-rescue, shore based ice rescue techniques, and go ice rescue techniques. This is a hands-on training program which includes a significant amount of on-ice time for skill practice. It also addresses the effects of cold water on victims, ice rescue techniques, off shore techniques, and ice rescue equipment. Course will include several scenarios based ice rescue exercises.

Designed for: All emergency response personnel
Course Length: 16 hours
Course number: 01-04-0021
Course Location(s): Academy, SPTC, Locally via Outreach

Medium Structural Collapse Concepts

This classroom program is designed to provide the background knowledge necessary to perform rescue operations at a structural collapse incident. The course includes instruction on: structural construction considerations such as types of construction, construction techniques, terminology and mechanism of collapse based on structure type; detailed concepts of structural shoring systems; void search and rescue operations in structural collapse incidents; structural collapse team organization and operations concepts.

Designed for: Emergency response personnel with responsibility in structural collapse operations
Course Length: 12 hours
Prerequisite: Basic Structural Collapse Operations
Course number: 01-04-0040
Course Location(s): Academy, Locally via Outreach

Medium Structural Collapse Operations: Exterior Shoring

This two-day program will thoroughly familiarize the student with the exterior shoring techniques needed to safely construct all the types of exterior shores generally needed to conduct safe rescue operations and stabilize the exterior of the structure. Students in this intensive hands-on course will be tested on the proper construction of the various shores needed to accomplish this task.

Designed for: Emergency response personnel with responsibility in structural collapse operations
Course Length: 16 hours
Materials Fee: $45
Course number: 01-04-0058
Course Location(s): Academy, Locally via Outreach

Medium Structural Collapse Operations: Tools

This two-day program will familiarize the student with the tools used in structural and excavation collapse related incidents. This is an intensive hands-on course and the students will be evaluated on the proper use of the tools provided.

Designed for: All emergency response personnel
Course Length: 16 hours
Prerequisite: Basic Structural Collapse Operations or Basic Trench Collapse Concepts or Trench Rescue: Awareness Level
Materials Fee: $45
Course number: 01-04-0057
Course Location(s): Academy, Locally via Outreach

Medium Structural Collapse Operations: Void Search and Rescue

This is a two day program with intensive practical void search training. The students participate in numerous void search evolutions with emphasis on team concepts, proper search techniques, safety operations, and size up. Simulated rescue scenarios will be conducted with students required to safely extricate victims from void spaces.

Designed for: Emergency response personnel with responsibility in structural collapse operations
Course Length: 16 hours
Rescue Technician - Basic
Rescue Technician - Basic provides a base from which to prepare students for a wide variety of possible rescue operations. This course includes an overview in areas of specialized rescue, search, technical rescue management, risks and priorities; use of ropes, knots, and rope systems in a low angle environment, and establishment of landing zones for helicopter operations. Demonstrations, practice sessions and testing are included.
Designed for: All emergency response personnel
Course Length: 24 hours
Course number: 01-04-0032
Course Location(s): Academy, SPTC, Locally via Outreach

Rope Rescue - Operations Level
Rope Rescue - Operations Level is a 32-hour training program that provides information and skills to adequately perform basic vertical rope rescue techniques in an urban/suburban environment. While many of the techniques and skills taught in this program are applicable to the wilderness environment, this is not the intent of this program. The overall objective is to improve rescuer awareness of safety concerns at rope rescue situations and to develop basic skills in rappelling and high-angle rescue systems. Topics include safety orientation, risk assessment, equipment, basic rappelling and ascending, anchoring, belaying, mechanical advantage, patient packaging, incident management, skills evaluation, and testing.
Designed for: Emergency response personnel with responsibility in rope rescue
Course Length: 32 hours
Prerequisite: Rope Rescue - Operations Level
Course number: 01-04-0036
Course Location(s): Academy, SPTC, Locally via Outreach

Rope Rescue - Technician Level I
This course provides information and skills to perform advanced vertical rope rescue techniques in an urban/suburban environment. The overall objective is to improve rescuer awareness of the safety concerns at rope rescue situations and to develop advanced skills in high angle rescue techniques and systems. Topics include ascending, pickoffs, knot passing, team operations, advanced litter packaging, rigging and lowering as well as horizontal and high/low tensioned systems. This program also includes written testing as well as skill evaluations.
Designed for: Emergency response personnel with responsibility in rope rescue
Course Length: 32 hours
Prerequisite: Rope Rescue - Technician Level I
Course number: 01-04-0037
Course Location(s): Academy, SPTC, Locally via Outreach

Rope Rescue - Technician Level II
This course provides additional information and skills required to perform advanced vertical and horizontal rope rescue techniques in an urban/suburban environment. The overall objective is to improve rescuer awareness of safety concerns at rope rescue situations and to develop advanced skills in high angle rescue techniques and systems. Topics include vertical low tensioned systems (offsets) and horizontal and steep tensioned systems (highlines). This program also includes written as well as skill evaluations.
Designed for: Emergency response personnel with responsibility in rope rescue
Course Length: 32 hours
Prerequisite: Rope Rescue - Technician Level II
Course number: 01-04-0038
Course Location(s): Academy, SPTC, Locally via Outreach
School Bus Rescue
The School Bus Rescue Course provides advanced training to personnel in the specific hazards and problems associated with performing rescues from school buses. The program focuses on many aspects of school buses including: construction; safety systems; and extrication strategies.

Designed for: All emergency response personnel
Course Length: 4 hours
Course number: 01-04-0038
Course Location(s): Academy, Locally via Outreach

School Bus Rescue Practical Skills
This is a practical training session which allows students to apply concepts presented during the School Bus Rescue Course and begin to establish proficiency in related extrication skills. Students attending this course will be provided information relating to: tool placement and staging, anatomy of a school bus, school bus stabilization, primary entry, secondary entry, patient packaging and extrication and bus rollovers.

Designed for: All emergency response personnel
Course Length: 4 hours
Prerequisite: Bus Rescue (# O/39) or School Bus Rescue
Course number: 01-04-0039
Course Location(s): Academy, Locally via Outreach

Structural Collapse Series
This course is the combination of the following OFPC structural collapse courses; MSCO: Tools, MSCO: Exterior Shoring, MSCO: Interior Shoring, MSCO: Void Search and Rescue, Rescue Heavy Rigging, and Concrete Breaching and Breaking. Separately, the aforementioned courses total 12 days of instruction. In this academy style format of back-to-back in two 5 day weeks, all course content is delivered in a 10 days.

Designed for: All emergency response personnel
Course length: 80 hours
Prerequisite: Basic Structural Collapse Operations, Medium Level Structural Collapse Concepts, and Rescue Technician Basic
Course number: 01-04-0089
Course Location(s): Academy, Locally via Outreach

Surface Water Rescue
This course is designed for water rescue in flat or slow moving water in lakes, pond, rivers and bays. It meets the NFPA 1006 standards for Surface Water Rescue at the awareness, operations, and Technician levels. This course covers all aspects of water rescue using the Preach, Reach, Throw, Row and Go methodology. The course is 16 hour long and includes classroom, a pool session, and an open water session. Students should have the ability to swim well and be in good physical condition.

Designed for: All emergency response personnel
Course length: 16 hours
Prerequisite: None
Course number: 01-04-0085
Course Location(s): SPTC, Locally via Outreach

Swift-Water/Flood - Rescue Technician
This course provides basic to advanced level swift-water/flood rescue training including self-rescue in swift-water, go rescues, boat based rescues, and rope systems for swift-water rescue. This is a hands-on training program which requires participants to spend a significant amount of time mastering water rescue skills in fast moving water. Course also includes several scenario based water rescue exercises.

Designed for: All emergency response personnel involved in water rescue emergencies
Course length: 32 hours
Prerequisites: Rescue Technician-Basic or Rescue Operations
Course number: 01-04-0051
Course Location(s): Academy, Locally via Outreach

Trench Rescue - Operations Level
This two-day program consists of intense hands-on training in the field of trench rescue. The students will be taught several ways to shore trenches, the different types of extrication techniques, proper rescue site management, as well as the proper safety concepts needed to complete a safe and successful rescue. There will be live exercises in which the students will actually extricate a trapped victim from an open trench scenario.

Designed for: Emergency response personnel with responsibility in trench collapse operations
Course Length: 16 hours
Prerequisites: Rescue Technician - Basic, Medium Structural Collapse Operations: Tools and Trench Rescue - Awareness Level
Materials Fee: $45
Course number: 01-04-0042
Course Location(s): Academy, Locally via Outreach

Trench Rescue - Technician Level
Designed to increase the skills learned in the basic trench rescue class. Rescue operations in intersecting, L-shaped, and deep trenches will be covered. Advanced trench rescue shoring techniques and concepts will also be shown.

Designed for: Emergency response personnel with responsibility in trench collapse operations
Course Length: 16 hours
Prerequisites: Rescue Technician - Basic, Trench Rescue - Awareness Level, Basic Trench Collapse Operations or Trench Rescue - Operations Level, and Medium Structural Collapse Operations: Tools
Materials Fee: $45
Course number: 01-04-0043
Course Location(s): Academy, Locally via Outreach

Trench Rescue - Awareness Level
This course will discuss problems that can and do occur in trench rescue incidents. Safety techniques, shoring techniques, proper procedures, team operations, and hazard assessment will all be discussed and explained in depth.

Designed for: All emergency response personnel
Course Length: 8 hours
Course number: 01-04-0008
Course Location(s): Academy, Locally via Outreach

Water Rescue - Awareness Level
This course provides an overview of water safety and rescue issues including: hazard assessment, responder safety, risk management, hypothermia, near-drowning, basic water search techniques, basic shore-based rescue techniques, incident
management issues, and water rescue equipment.
Designed for: All emergency response personnel
Course Length: 4 hours
Course number: 01-04-0052
Course Location(s): Academy, Locally via Outreach

Swift Water Rescue Operations
This course is designed to introduce firefighters and EMS personnel to water rescue at the operations (shore based) level of response. The course contains information on: hazards, medical considerations, incident management, on self-rescue, PPE and rescue techniques. Practical training is also provided in self-rescue and shore based rescue skills.
Designed for: All emergency response personnel involved in water rescue emergencies
Course Length: 24 hours
Course number: 01-04-0053
Course Location(s): Academy, SPTC, Locally via Outreach

SPECIAL PROGRAMS

County Fire Coordinator Conference
Includes orientation and training for new or recently appointed personnel as well as basic staff and command training for those with county-level fire service responsibility.
Materials Fee: $5
Course number: 01-14-0005
Course Location(s): Academy
Note: By invitation only

County Weekend
Several weekends are reserved each year for county weekends. A guaranteed enrollment of 150 is required for an exclusive weekend.
Designed for: All emergency response personnel
Course Length: 12 hours
Materials Fee: $5
Course Location(s): Academy

FASNY EMS Conference
This is a two-day seminar conducted by the Emergency Medical Service (EMS) Committee of the Firemen’s Association of the State of New York (FASNY).

Regional Fire Administrator Conference
The annual meeting and in-service training of Regional Fire Administrators appointed to coordinate the New York State Fire Mobilization and Mutual Aid Plan.
Materials Fee: $5
Course number: 01-14-0034
Course Location(s): Academy
Note: By invitation only

Technical Rescue Conference
The conference is open to all responders and includes lectures and practical skill sessions in a variety of subjects including rope, confined space, structural collapse, water, vehicle, machinery and trench rescue as well as incident & team management training.
Materials Fee: $5
Course number: 01-04-0071
Course Location(s): Academy, SPTC

Volunteer Fire Police Association Conference
This is a one-day conference conducted by the Fire Police Committee of the Volunteer Fire Police Association of the State of New York.
Designed for: Fire service personnel designated as fire police
Course Length: 8 hours
Materials Fee: $5
Course number: 01-14-0022
Course Location(s): Academy

Fire Service Women of New York State Training Conference
This annual training conference brings together career and volunteer women firefighters from throughout New York State and beyond. Each year a variety of workshops and classes are offered to the attendees. This training conference is co-sponsored by the New York State Office of Fire Prevention and Control and Fire Service Women of New York State, Inc.
Designed for: Female fire service personnel
Materials Fee: $5
Course number: 01-14-0012
Course Location(s): Academy
NYS ACADEMY OF FIRE SCIENCE
FEES AND REGISTRATION
INSTRUCTIONS

REGISTRATION FORMS
Academy courses require written pre-registration via mail or fax to the Academy using the approved form. Telephone reservations are not accepted. If you require additional forms, download at www.dhsses.ny.gov/ofpc or call the Academy. Contact your County Fire Coordinator or Municipal Training Officer for Outreach Program registration protocol.

COURSE REGISTRATION FEE - NONREFUNDABLE
Outreach Program: no fee
Academy:
  NYS Residents - $25; Out-of-State - $50
  Payable in advance with registration form

MATERIALS FEE
See course descriptions.
Materials fee may be paid upon arrival.
Required text books are not included in materials fee and must be purchased separately. Refer to course description and/or confirmation.

ACCOMMODATION FEE
Academy Resident: $40/day includes lodging and all meals
Academy Commuter: $8/day includes breakfast and lunch
*Resident fee shown on course schedule has been adjusted for Sunday night arrivals or Friday afternoon departures (no dinner).
*Commuter fee shown on course schedule has been adjusted for 1pm start times (no breakfast). Commuters are invited to purchase dinner meal tickets (by 11am) at $9/day if program requires mandatory evening sessions.
*Bagged lunches are available upon request for off campus courses or departing students.
Outreach Program: Student responsibility

PAYMENT METHOD
Fees may be paid by check, money order, or PO/Voucher payable to “Academy of Fire Science.” If MasterCard or VISA is being used, the registration form must include a credit card number, expiration date and signature.
Registration fee must accompany the registration form.

PREREQUISITE COURSES
Proof of completion is required for residential courses at the Academy.

ACCEPTANCE
Students receive written notification of acceptance. This notification also details mandatory registration and accommodation fees as well as any associated course material fee referenced in course descriptions.
NYS PREPAREDNESS TRAINING CENTER

REGISTRATION INSTRUCTIONS
The State Preparedness Training Center uses an Online registration system known as SNAP. To register for OFPC training Courses at the SPTC go to: http://www.dhsses.ny.gov//training/calendar/?agency=SPTC choose the course announcement for the course and follow the directions to register.

COURSE REGISTRATION FEE

NY State Residents: No fees
Out-of-state: at this time SPTC is not accepting out of state students for OFPC courses.

ACCOMMODATION FEE
Off campus lodging at local hotels is available for student. Students who live and work more than 50 miles from the SPTC and are members of a response agency from within NY State are eligible for no cost lodging provided by SPTC. Request lodging option in the registration process, if eligible you will receive lodging information in your acceptance confirmation email. Lunch is provided during classes at the SPTC all other meals are the students responsibility.

PREREQUISITE COURSES
If prerequisite course are required, they will be listed on the course announcement and in the registration process. OFPC Staff will check prerequisites before accepting students into the course. If there are questions about prerequisite courses, you may be contacted to verify prerequisites.

ACCEPTANCE
Students will receive an email to acknowledge registration shortly after completing registration. This acknowledgment is not acceptance into the course, notification of acceptance into the course will be in a separate email from STPC staff. This email will contain additional course information and lodging confirmation.

At this time SPTC is not accepting out of state students for OFPC courses. This issue is currently being reviewed and may change in the future.
