VIII. Consensus Based Codes Policy

**NYS DIVISION OF HOMELAND SECURITY AND EMERGENCY SERVICES
FEDERAL EMERGENCY MANAGEMENT AGENCY
PUBLIC ASSISTANCE PROGRAM**

PROGRAM OVERVIEW

Infrastructure Support Program

The Federal Emergency Management Agency (FEMA) Public Assistance (PA) Program provides reimbursement for the repair or restoration of infrastructure and facilities to pre-disaster condition after the declaration of a major disaster by the President. The New York State Division of Homeland Security and Emergency Services (DHSES) is responsible for the program management and administration within the State of New York.

The PA Program is voluntary. If all eligibility requirements are met and you wish to seek federal reimbursement, you must adhere to the program guidelines. If you choose not to participate, you will not be eligible for any grants under the PA Program. However, deciding not to participate in this Program does not preclude your eligibility from other federal programs, nor from participating in future declarations.

Eligible Applicants include State Agencies, Municipalities, Native American Tribal Organizations, and certain Private Non-Profit Organizations that provide essential services of a governmental nature to the general public.

Reimbursement is generally provided on a 75% Federal share, 25% non-Federal share.

For disaster expenditures to be considered as part of an eligible PA project, they must meet the following criteria:

1. The damage must be a direct result of an incident for which there is a Presidential declared disaster.
2. The damage must be within the federally designated disaster area.
3. The damage must have occurred within the designated disaster incident period.
4. Eligible damage cost for a project must meet the minimum threshold.
5. The damaged infrastructure must be owned by and/or be the legal responsibility of an eligible Applicant at the time of the incident.
6. Generally, the damage and work performed must not be eligible for reimbursement under the authority of another federal program.
7. Insurance proceeds and reimbursements from other sources are deducted from eligible cost.

The deadline for completion of emergency work (debris removal and emergency protective measures) is six (6) months from the date of the Presidential Disaster Declaration. The deadline for permanent work is eighteen (18) months from the Presidential Disaster Declaration. The State may extend the emergency work deadline for an additional six (6) months and the permanent work deadline for an additional thirty (30) months with justification. Any additional extensions must be approved by FEMA.

This Applicant's Handbook is intended to provide Applicants with general Program and Process information for DR 4472. For additional detail, please refer to FEMA's Public Assistance Program and Policy Guide (PAPPG) Version 3.1 (April 2018) which is applicable to this disaster and available on FEMA's website.

DISASTER FACT SHEET

NYS Division of Homeland Security and Emergency Services
State of New York

DISASTER NUMBER: FEMA-4472-DR-NY
TYPE OF DISASTER: Severe Storms, Straight – Winds and Flooding
DATE OF DECLARATION: December 19, 2019
INCIDENT PERIOD: October 31, 2019 to November 1, 2019
TYPE OF ASSISTANCE AVAILABLE:

- ❖ **Public Assistance:** Assistance to State and Local Governments and certain Private Nonprofit Organizations for the repair or replacement of disaster-damaged Public Facilities in:

Chautauqua, Chenango, Cortland, Erie, Essex, Fulton, Hamilton, Herkimer, Jefferson, Lewis, Madison, Montgomery, Oneida, Oswego, Otsego, Saratoga, Tioga and Warren Counties

- ❖ **Hazard Mitigation Grant Program:** Assistance to State and Local Governments for actions taken to prevent or reduce long term risk to life and property from natural hazards. **All Counties in the State of New York are eligible to apply for assistance under the Hazard Mitigation Grant Program.**

NYS DIVISION OF HOMELAND SECURITY AND EMERGENCY SERVICES ADDRESS:

New York State DHSES
1220 Washington Avenue
Building 7A, 4th Floor
Albany, New York 12242
Recovery Facsimile: (518) 322-4984
Recovery Section: (518) 292-2293
Alternate Phone: (518) 391-4575
Website: <http://www.dhSES.ny.gov/recovery>

Chief of Public Assistance: Andrew Martin
Deputy Chiefs of Public Assistance: Joseph Collorafi & Joseph Stinson
Disaster Assistance Manager (DAM): Bernadette Moran
DAM Phone Number: 518-292-2888

Deadlines:

Applicant Submit RPA to DHSES: February 5, 2020
Applicant Identification of Damage: 60 days from Recovery Scoping Meeting
Emergency Work Completion: June 18, 2020 (6 months from declaration date)
Permanent Work Completion: June 18, 2021 (18 months from declaration date)

APPLICATION REQUIREMENTS & INSTRUCTIONS

The Applicant is responsible for documenting, providing and maintaining ALL information pertaining to damage and claims.

DISASTER ASSISTANCE APPLICATION REQUIREMENTS

POTENTIAL APPLICANTS SHOULD SUBMIT THE FOLLOWING ITEMS BEFORE LEAVING THE APPLICANT BRIEFING:

1. **A completed Request for Public Assistance (RPA) form**

Can be obtained from FEMA Web Site:

<https://www.fema.gov/media-library/assets/documents/10145>

2. **A completed Applicant Certification**
3. **A completed Drug Free Workplace Certification**
4. **Federal Tax ID Form**
5. **DUNS Number Form (Dun and Bradstreet)**
6. **Additional documentation is required for Private Non-Profit Applicants. See Appendix II.**

Any authorized official of the governmental unit or organization can sign and submit the above documents.

THE RPA SHOULD BE SUBMITTED AS SOON AS POSSIBLE. APPLICANTS HAVE UNTIL FEBRUARY 5, 2020 TO SUBMIT THEIR RPA TO DHSES. FEMA WILL ONLY ENTERTAIN LATE SUBMISSIONS WHEN THE APPLICANT AND STATE CAN CLEARLY SHOW IT WAS DUE TO CIRCUMSTANCES BEYOND THEIR CONTROL.

An electronic copy of this handbook can be obtained from www.dhSES.ny.gov.

I. PREPARATION OF DOCUMENTS FOR RECOVERY

A. DAMAGE ELIGIBILITY

FEMA has implemented the New PA Model process for this disaster. Changes in FEMA personnel titles and duties have occurred. DHSES personnel continue to assist all Applicants with every phase of Disaster Recovery as needed. Applicants must establish an account in FEMA's Grants Portal to participate in this disaster. All documentation is submitted through the Grants Portal. For an expenditure to be eligible under the Public Assistance Program, all disaster related damages must meet the following criteria:

1. The damage must be a direct result of an incident for which there is a Presidential Declared Disaster.
2. The damage must be within the Federally designated disaster area.
3. The damage must have occurred within the designated disaster incident period.
4. Eligible damage cost for a Project must meet the minimum threshold.
5. The damaged infrastructure must be owned by and/or be the legal responsibility of an eligible Applicant at the time of the incident.
6. The damage and work performed must not be eligible for funding under the authority of another Federal Program.
7. Insurance proceeds and funding from other sources are deducted from eligible cost.

The Applicant is responsible for documenting, providing, and maintaining all information pertaining to damage and claims. Applicants should maintain their own Project-specific files containing all documentation necessary to support the Public Assistance Grant for each of their Projects. Keep in mind that some Projects may not close until several years after the initial obligation and a well-maintained file will help Applicants stay informed on their projects in the event of personnel turnover.

B. INITIAL RECOVERY SCOPING MEETING — PROJECT IDENTIFICATION

The Public Assistance Program gives the Applicant the opportunity for reimbursement for the costs associated with the repair of the damages sustained by the incident, based on the Applicant's identification of the damages. The development of the Applicant's Damage Inventory List identifies damages that, if eligible, can be incorporated into to a Project as the basis for all reimbursement of recovery activities after a Presidential Disaster Declaration.

1. Recovery Scoping Meeting (RSM)

The Recovery Scoping Meeting (RSM) is the initial meeting between FEMA, the State, and an individual Applicant to determine potential eligible Projects within that Applicant's jurisdiction. The FEMA Program Delivery Manager (PDMG) and the DHSES Program Disaster Assistance Representative (PDAR) will meet with the Applicant to provide detailed information, guidelines, and assistance regarding the Public Assistance Program.

The PDMG/PDAR team will assist the Applicant in preparing, documenting, and submitting Projects through the Grants Portal. All Projects will be assigned a PDMG/PDAR team to work closely with the Applicant in the preparation of the project scope of work and associated costs. The Applicant has 60 days from the date of their RSM meeting to identify event related damage. If an Applicant is unable to identify any event related damage within 60 days, their status as an eligible Applicant will be revoked by FEMA.

The RSM should include discussion regarding Section 406 Hazard Mitigation, which is any sustained action taken to reduce or eliminate long-term risk to people and property from same type event and its effects.

Projects which have been identified as technically complex in nature, such as the replacement of a School Building or Bridge, should be discussed with the PDMG/PDAR team at the RSM meeting. It may be desirable to request funding for an architectural and/or engineering design study (or other specialized study) to be conducted. In such a study one or more of the following may be required:

- a. Documentation of specific codes and design standards adopted by the community prior to the incident which are included in the final recommendation.
- b. At least three (3) viable alternatives, with estimated costs.
- c. All alternatives should address their impacts on environmental, historical, floodplain, endangered species, and coastal zones and barriers.
- d. The impact on the areas upstream and downstream of the damages must be considered.
- e. All permits (Federal, State, Local) must be obtained.

The Final Design Study must be forwarded to NYS DHSES for review and submission to FEMA for final Scope of Work approval. Funding for the Project will be held by FEMA until their final determination on the scope of work. Any Engineer Study/Work Product must be Stamped and signed by the Engineer. Any improvements/mitigation must be clearly identified and a separate cost estimate provided.

2. Categories of Work

To facilitate the processing of Public Assistance Program Grants, FEMA has divided disaster related work into seven Categories of Work. These categories are listed below.

Emergency Work

Category A: Debris Removal

Clearance of trees and woody debris; building wreckage; sand, mud, silt, and gravel; vehicles; and other disaster-related material deposited on public and, in very limited cases, private property

Category B: Emergency Protective Measures

Measures taken before, during, and after a disaster to save lives, protect public health and safety, and protect improved public and private property from an imminent threat. Emergency Protective Measures may include providing emergency generators, EOC operations, sand bagging, search and rescue, emergency access routes, Rip Rap on embankments and others.

Permanent Work

Category C: Roads and Bridges

Repair of Roads, Bridges, and associated features, such as Shoulders, Ditches, Culverts, Lighting, Curbs, Sidewalks and Signs on non-FHWA roads.

Category D: Water Control Facilities

Repair of Irrigation Systems, Drainage Channels, and Pumping Facilities. Repair of Levees, Dams, and Flood Control Channels fall under Category D, but the eligibility of these Facilities is restricted.

Category E: Buildings and Equipment

Repair or replacement of Buildings, including their contents and systems; Heavy Equipment; and Vehicles.

Category F: Utilities

Repair of Water Treatment and Delivery Systems; Power Generation Facilities and Distribution Lines; and Sewage Collection and Treatment Facilities.

Category G: Parks, Recreational Facilities, and Other Items

Repair and restoration of Parks, Playgrounds, Pools, Cemeteries, and Beaches. This Category also is used for any repair work to a Facility that cannot be characterized adequately by Categories C-F.

Consensus Based Codes, Specifications and standards for Public Assistance (FEMA Recovery Interim Policy FP-104-009-11)

This policy supersedes the FEMA Required Minimum Codes and Standard subsection in the FEMA Public Assistance Program and Policy Guide (PAPPG). It imposes mandatory requirements to apply consensus-based codes, specifications and standards identified in Appendix A to all permanent work projects that involve buildings, electric power, roads, bridges, potable water and wastewater. The Applicant must provide proof of compliance by submitting a written, stamped and signed certification from a registered engineer, design professional or other qualified individual that the project was designed and constructed with the applicable consensus-based codes, specifications and standards identified. (See Appendix VIII)

3. Special Considerations

The term “Special Considerations” is used to describe issues other than program eligibility that could affect the Scope of Work and funding for a Project. These issues include Insurance, Hazard Mitigation measures, and compliance with other Federal Laws and Regulations, such as those pertaining to environmental protection, Floodplain Management and historic preservation.

The Applicant has a critical role in identifying — and quickly resolving — special consideration issues based on their knowledge of the community. By considering the issues below before meeting with State-Federal staff, the Applicant can speed the reimbursement process. As part of the project development, the PDMG/PDAR team will discuss the following nine (9) special consideration questions for each project with the Applicant. Every Project will be reviewed for applicable Special Considerations and the Applicant will receive guidance and instructions based on results of that review.

Insurance

Does the damaged facility or item of work have insurance and/or is it an insurable risk? (e.g., buildings, vehicles, etc.)

Floodplain

Is the damaged facility located within a floodplain or coastal high hazard area or does it have an impact on a floodplain or wetland?

Coastal Barriers

Is the damaged facility or item of work located within or adjacent to a Coastal Barrier Resources System Unit or an Otherwise Protected Area?

Environmental Impact

Will the proposed facility repairs/reconstruction change the pre-disaster condition? (e.g., footprint, location, capacity, use or function).

Hazard Mitigation

Does the Applicant have a Hazard Mitigation Proposal or would the applicant like technical assistance for a hazard mitigation proposal?

Historic Preservation

Is the damaged facility on the National Register of Historic Places or the State Historic Listing? Is it older than 50 years? Are there more, similar buildings near the site?

Historic properties may not be obvious to the casual observer, and may include districts, buildings, structures, objects, landscapes, archeological sites, and traditional cultural properties that are included in, or eligible for inclusion in, the National Registers of Historic Places. These are not just old buildings or well-known historic sites, but places important in Local, State or National history. Facilities as diverse as bridges, culverts, and water treatment plants may be considered historic.

Pristine or Natural Areas

Are there pristine or undisturbed areas on, or near, the project site? Are there large tracts of forestland?

Hazardous Materials

Are there any hazardous materials at or adjacent to the damaged facility and/or item of work?

Controversy

Are there any other known environmental or controversial issues associated with the damaged facility and/or item of work?

It is always the responsibility of the Applicant to obtain the necessary work and environmental permits prior to beginning any repair or reconstruction work. In New York State, agencies which could have a role in issuing the various permits include (but are not limited to) the following:

1. New York State Department of Environmental Conservation
2. Adirondack Park Agency
3. Catskill Park Agency
4. County Soil and Water Conservation Agencies
5. County Drainage Agencies
6. Utility Companies
7. US Army Corps of Engineers
8. US Environmental Protection Agency
9. New York State Office of Parks, Recreation, and Historic Preservation
10. Local building departments which could include considerations of Americans with Disabilities Act provisions
11. Endangered Species under the jurisdiction of the US Fish and Wildlife Service
12. Beaches – Coastal Zone Management under the New York State Department of State
13. County Health Departments

II. PROJECT MANAGEMENT AND FUNDING INSTRUCTIONS

A. REIMBURSEMENT AND PAYMENT PROCEDURES

Two different payment methods have been established for Public Assistance Program grants. Small Projects can be paid on estimate *when FEMA obligates the Project* and Large Projects are paid on actual cost *after* project completion. FEMA has established \$3,300 as the minimum amount of damage, on each Project, required for a Project to be eligible for PA funding.

1. Small Project (under \$131,100)

Small Projects are funded using an initial estimate of costs. Once FEMA obligates a Small Project, FEMA generally does not adjust the approved amount of an individual Small Project. This applies even when FEMA obligates the Project based on an estimate and actual costs for completing the eligible SOW differ from the estimated amount. FEMA only adjusts the approved amount on individual Small Projects if one of the following conditions applies:

- The Subrecipient did not complete the approved SOW;
- The Subrecipient requests additional funds related to an eligible change in SOW;
- The Project contains inadvertent errors or omissions; or
- Actual insurance proceeds differ from the amount deducted in the Project.

In these cases, FEMA only adjusts the specific cost items affected.

FEMA does not require a final inspection of completed Small Projects; however, the Applicant must certify, and the State must provide reasonable assurance that the Applicant completed the approved Scope of Work in compliance with all applicable laws, regulations, and policies. FEMA will require this documentation on all completed Small Projects. (Applicant signed P4 form)

NYS DHSES will process payment for the **authorized Federal and Non-Federal shares (if applicable)**.

Small Projects are **not** usually eligible for cost overruns. **HOWEVER**, if a **major omission or error** in the Scope of Work is identified, the Applicant has a limited time to request an Appeal for a Small Project Reconciliation. (See Cost Overruns, below)

2. Small Project Validation

The intent of validation is to reduce the overall administrative costs associated with the Public Assistance Program and to get reimbursement funds into the Applicant's hands quickly. Validation applies to all Small Projects (including Emergency Work, Permanent Work and Small Projects with special considerations) written by the Applicant and submitted to the PDMG/PDAR team.

During validation, FEMA reviews the Applicant's small projects to confirm that they have accurate Scopes of Work and cost estimates and that the Applicant has sufficient documentation to support the project eligibility and cost.

It is imperative the Applicant documents all work submitted for reimbursement. The Applicant's method of estimating the costs to accomplish the eligible Project and related costs must be documented. Any work already completed on the Project should be reflected as the actual costs incurred. The documentation for these actual costs must be available for the review. All claimed expenses must be for work completed because of the incident.

In addition to the required paper documentation, photographs of damages and work sites before the repair work begins, during repair or reconstruction, and as soon as the work is complete are an effective way to support the cost documentation for the repair efforts. Photographs accomplish three (3) things:

- a. Verify the extent of damages,
- b. Verify that the work had been accomplished,
- c. Provide documentation of the repaired condition if a subsequent disaster was to destroy the facility or road after it was repaired.

For particularly vulnerable sites or facilities, an Applicant may wish to take photographs annually to establish the pre-disaster condition. This makes it easier to prove damages occurred as a result of a subsequent event.

3. Large Projects (\$131,100 and over)

Reimbursements for Large Projects are based on the **actual documented costs incurred** in the completion of the approved scope of work following all applicable laws, regulations and procurement practices. The steps for processing a Large Project are described below:

- a. A Project is prepared by the PDMG/PDAR team working with the Applicant. FEMA approves funding using the estimate and obligates the Federal Share of the funds to the State.
- b. When the Project is complete, the Applicant submits a completed P4 form for that Project to DHSES to trigger the closeout process. The State performs an accounting based on documentation provided by the Applicant and, where appropriate, information developed from site visits. The State then submits a report on the completed Project to FEMA, recommending reimbursement for actual costs incurred in the completion of authorized, eligible work.
- c. After reviewing the State's recommendation, FEMA will determine the final eligible costs for the Project and adjust the obligation accordingly.

While proceeding with the Project, the Applicant must ensure that grant funds are used only for eligible work. Payment on a Large Project can only be processed for work has been completed, documented and paid for.

The cost estimating methodology that is used in the development of large projects is called the **Cost Estimating Format (CEF)**. This allows for a better estimate of the total cost of Large Projects. The CEF is a forward-pricing model that allows FEMA to account for all possible costs associated with a construction Project. FEMA uses experienced Cost Estimators and Construction Engineers to apply the CEF.

Cost Overruns:

Sometimes the actual costs incurred by the Applicant during performance of the work exceed the approved estimated amount. This situation is known as a **Cost Overrun**. When this occurs, the Applicant must determine the reason for the cost overrun. Overruns are usually caused by one of the following:

- **Variations in unit pricing:** The unit prices used in the cost estimate may have been lower than those the Applicant was charged.
- **Change in the scope of work:** While performing the work, the Applicant may find that additional eligible work or changes in the prescribed work are necessary. If this occurs the Applicant must notify the State immediately and request assistance in developing a Scope of Work Change Request for submission to FEMA. Scope of Work changes must be approved by FEMA **prior** to initiating work.
- **Delay in starting or completion times:** Problems beyond the Applicant's control may contribute to delays in starting or completing work.

The Applicant should evaluate cost overruns on large projects. The Applicant should notify NYS DHSES promptly if an anticipated cost overrun significantly exceeds the approved amount. If the additional costs are justified, the Applicant can request additional funding. The Applicant should contact the State to ensure that proper guidelines for documenting any additional costs are followed. When necessary, the State will forward requests for additional funding to FEMA. Such requests must contain documentation to support that the additional costs were incurred during the performance of eligible work.

Small Projects are handled differently. Cost overruns are not handled on a Project-by-Project basis; rather, the Applicant may submit an Appeal through the State to FEMA to request supplemental funding for a net cost overrun for all of its Small Projects. An Appeal should be submitted only when the total actual costs for **all** Small Projects combined exceed the total cost approved for all Small Projects. **The Appeal must be submitted within 60 days of the completion of that Applicant's last Small Project.** The Appeal must include documentation of actual costs correlated to each line item in the Scopes of Work. This includes Projects with under runs as well as those with overruns. An explanation of all cost and quantity differences with the approved Scopes of Work should be included.

4. Large Project Progress Payment Procedure

Applicants may request Progress Payments based upon documented expended costs. The Applicant will need to provide supporting documentation such as, Permits, Procurement Documentation, Contracts, Proof of Payments, and a description of the work completed on the Project. DHSES will then review the submitted documentation and may grant a Progress Payment as appropriate.

5. Alternate Project

If an Applicant decides that the public welfare would not be best served by repairing, restoring or reconstructing a damaged facility to its pre-disaster condition, an Alternate Project may be requested which allows the Project funding to be applied to a different scope of work. Eligible costs for an Alternate Project are capped at the approved cost estimate for the original Project's scope of work.

NYS DHSES and FEMA must approve this option prior to construction. To obtain this approval, the Applicant must submit a Scope of Work Change Request to DHSES which should include the following: description of the proposed Alternate Project, a schedule for completing the proposed Project, and the total projected cost of the proposed Project. If the Alternate Project cost estimate exceeds the capped amount, indicate the source where the balances of funds for the Project will come from. In developing an Alternate Project, it is necessary to supply assurance of compliance with special requirements including, but not limited to, floodplain management, environmental assessment, Hazard Mitigation, protection of Wetlands, and general hazard or flood insurance. DHSES will provide technical assistance to the Applicant in the development of Alternate Project documents and forward the State's recommendation to FEMA.

Examples of possible Alternate Projects include:

- a. Repair or expansion of other Public Facilities.
- b. Construction of new Public Facilities.
- c. Purchase of Capital Equipment (items with an individual value of greater than \$5,000).
- d. Funding of hazard mitigation measures.
- e. Funding project shortfalls due to mandatory NFIP reductions on Applicant Buildings in the Floodplain.
- f. Supplemental funds used on an Improved Project.

Funding may not be used for operating costs or to meet the non-Federal Cost Share requirement on other Public Assistance Projects or Projects that utilize other Federal Grants.

Alternate Projects must be requested prior to beginning any repairs on the damaged facility, must be approved prior to construction, and can only be used on permanent, restorative work.

6. Improved Project

The Improved Project Funding option can be used for Projects when damaged facilities are restored to the pre-disaster condition or function, but improvements are made at the time of restoration or repair and the costs of those improvements cannot be separated from the costs of the authorized scope of repair,

or the original scope and improvements cannot be segmented for purposes of environmental or historic preservation review. The Applicant must request State approval for an Improved Project prior to beginning construction. If the proposed Improved Project scope of work significantly changes the pre-disaster configuration of the facility, the State will forward the request to FEMA to ensure compliance with applicable environmental and historic preservation requirements.

Federal funding for these Projects is limited to the Federal Share of the estimated costs that would be associated with repairing or restoring the facility to its pre-disaster condition. Funds to construct the Improved Project can be combined with a Grant from another Federal Agency. However, Federal Grants cannot be used to meet the non-Federal Cost Share associated with the Grant.

This option must be approved prior to construction and can only be used on permanent, restorative work.

7. Management Costs

Under the Disaster Recovery Reform Act (DRRA) of October 5, 2018, Applicants may now receive reimbursement for their direct and indirect administrative costs in managing their project, up to 5% of their total project costs as follows:

- a. Management costs activities such as attending Applicant Briefings, Recovery Scoping Meetings, Transition meetings, Site Visits, Project Formulation, Documentation and Closeout efforts, Travel costs and Consultant costs.
- b. The 5% is a cap. Applicants must document their actual management costs and may be reimbursed their actual documented costs up to the 5% limit.
- c. Management costs are captured on a separate Category Z Project generated by FEMA upon the Applicant's request for all obligated projects. If additional projects are subsequently obligated or de-obligated, FEMA will adjust the cap accordingly.
- d. Applicant must submit actual management cost documentation to draw down funds on the Category Z Project.

B. DOCUMENTATION REQUIREMENTS, INSTRUCTIONS AND ELIGIBILITY

Disaster reimbursement is based on verification of completed work and actual eligible costs. Therefore, proper documentation of costs and other records is an absolute requirement. It is not enough to complete the disaster work; the work must also be fully and accurately documented. Incomplete documentation could result in a municipality or organization not receiving reimbursement for which it might otherwise have been entitled.

The Applicant is responsible for documenting, providing and managing all information pertaining to damages and claims. Applicants should maintain their own Project-specific files containing all documentation necessary to support the Project Grant.

1. Documentation Forms

Realizing that a single Employee may work on more than one site in one day, and that different types of equipment and materials may be used at each site, report forms for labor, equipment, materials, and contracts, are available in Grants Portal to organize this information. To locate these forms, Open the Grants Portal Dashboard and click on the Resources tab on the left of your screen, then click on Public Assistance Process Forms. These forms are available to assist Applicants with keeping track of the actual work performed at each work-site. Use these forms to summarize all labor, materials, equipment and contract information from the original documentation.

For example, materials/supplies are ordered for repairs to a building. If the order exceeds what is required for the disaster repairs, you must subtract the pertinent information (vendor, item, etc.) and the exact amount needed for the disaster repair from the original purchase order or invoice. You must also enter this information onto the Materials Record form. The original purchase order/invoice is kept in the appropriate Project file as back up to validate the purchase.

If an Applicant has the capability to generate automated summary reports, they are free to do so. Please keep in mind that whichever method is used, the same information must be provided when requested.

2. Insurance

Public Assistance Reimbursement is only available for uninsured losses. The Applicant is responsible for providing the Insurance Policy prior to FEMA providing any funding.

In the case of insurable facilities in a Floodplain, the Applicant must have flood insurance equivalent to that issued by the National Flood Insurance Program. If the facility is not insured, FEMA will reduce the eligible costs for the Project by the maximum amount of insurance proceeds the Applicant would have received if the facility had been fully covered by an NFIP standard Flood Insurance Policy.

The applicant must provide the following to the PDMG/ (PDAR) team:

- a. Policies (general hazard and flood) currently in effect during the declared incident period;
- b. Deductible information; and
- c. Proof of Loss Statement, any settlement information and documentation of all proceeds received from the insurance carrier identifying the equipment/building which have sustained damages.

The only reimbursable expense for insured damages is the deductible plus any eligible items over and above the insurance policy limits. For example, the insurance policy is for \$5,000 with a \$500 deductible. Damage received amounts to \$7,000. Assuming the applicant received the \$4,500 insurance claim, the Project would be written for \$2,500 which covers the \$500 deductible and the \$2,000 expense not covered by insurance.

Claims with the Insurance Company MUST be filed before seeking FEMA assistance. FEMA is the funding source of last resort, not first. If an Applicant receives any insurance proceeds that reimburse costs have been included in the Public Assistance Grant, the Applicant must submit those proceeds to the State for remittance to FEMA to avoid duplication of benefits.

FEMA requires the Applicant to obtain and maintain Insurance on any insurable facility that receives funding of over \$5,000 from the Public Assistance Program. Failure to comply may result in the loss of funding.

Self-Insurance: FEMA does not recognize self-insurance for Government Entities below the State level.

3. Funds Received from Other Sources

The Applicant is required to inform DHSES and FEMA of other sources of funding and the amounts utilized toward the repair or restoration of those damages being claimed. The amount received from other sources will be deducted from the Project amount. Examples might include funding made available from another State or Federal Program, insurance proceeds, and other grants from any source.

If duplicate funding has occurred, for example FHWA Aid or a NYS REDI Grant, the Applicant will be responsible for paying back the duplicate amount to the State.

4. Labor Requirements

a. Force Account Labor Eligibility:

Force account work is defined as using your regularly employed personnel and Applicant owned equipment to repair/restore disaster damages.

Federal regulation establishes the cost of straight-time salaries and benefits of force account labor (an Applicant's own Permanent Employees) to be ineligible when performing Emergency Work (Categories A and B); with the exception under the PA Alternative Procedures Pilot Program for Debris Removal when authorized.

Only force account labor overtime costs are eligible when performing Emergency Work except for the Debris Pilot Program where regular time is allowed; both straight time and over time force account labor costs for permanent work (Categories C-G) are eligible.

NOTE: All equipment usage must be validated by labor records for the operator(s).

Only direct additional expenses are eligible for emergency work. The basis for this federal policy is that costs associated with the Applicant's regular Employees performing emergency work would be incurred regardless of whether a disaster occurred.

NOTE: The costs associated with Superintendents, Supervisors and Foremen managing the work of employees are generally **not** eligible for reimbursement. However, if the Manager was a **"working"** supervisor (i.e., operating a piece of equipment, not delegating who does the work), that time is reimbursable. But you must document and show this! The payroll and equipment logs must also support each request.

b. Labor Documentation:

Each Employee to be claimed must be identified by name and title. The summary of labor costs must include:

- 1) Dates worked,
- 2) Hours per day,
- 3) Rate of pay (regular and/or overtime),
- 4) Applicant fringe benefits rate based on the total payroll for the applicant.
- 5) Work performed.

This information may be obtained from the individual daily time cards, payroll records, and Supervisor's field notes. It is important to consolidate this information on the Labor Record form at least once a week, if not daily. This will enable the official responsible for disaster record keeping showing exactly who did what, when, where, and for how long on each job site.

c. Temporary Personnel/Extra Hires:

When a regular Employee is sent to the field to perform disaster work, frequently a backup person fills in for them in their normal position. There are a few circumstances that affect the eligibility of the backup person:

- 1) If a backup person (full-time or part-time) is an extra hire, the cost of this extra person represents an extra cost to the Applicant. Regular salary and overtime pay of this

employee is eligible if the Employee being replaced is performing eligible Emergency Work.

- 2) If the additional person is an Applicant's regular Employee from another department who is working his/her normal shift, overtime and pay differential for work outside their normal duties are authorized if the Applicant has an established pay policy prior to the disaster.
- 3) If the additional person is a regular Employee who is called in on his/her day off (and thereby works time in addition to the regular workweek), regular and overtime are eligible because there is an extra cost incurred by the Applicant.
- 4) If the additional person is called in from vacation, only overtime is eligible. There will be no extra cost because the vacation usually can be rescheduled.
- 5) Seasonally employed personnel are budgeted costs and are considered permanently employed for the purpose of eligibility.
- 6) Regular and overtime will be determined according to the Applicant's written policies and labor union contracts in effect prior to the disaster.
- 7) The costs of salaries and benefits for individuals sent home or told not to report due to emergency conditions are not eligible for reimbursement.
- 8) Costs of contractors hired to accomplish emergency work are eligible for reimbursement.

d. Overtime Pay:

Overtime pay must be in accordance with the Applicant's policies in effect before the disaster. Overtime for disaster work is not eligible if a pre-existing overtime pay policy was not in effect.

e. Donated Resources/Volunteer Work:

Donated Resources used on eligible emergency work that is essential to meeting immediate threats to life and property resulting from a major disaster may be credited toward the Applicant's total non-Federal Share of the Applicant's Emergency Work Donated Resources may include volunteer labor, donated equipment and donated materials.

Eligibility: Donated Resources are eligible to offset the cost of the Applicant's non-Federal Share of eligible emergency work (Category A and B) costs if they meet the following criteria:

- 1) Donated Resources must be documented by a Local Public Official or a person designated by a Local Public Official. Documentation must include a record of hours worked, the work location and a description of the work for each volunteer as well as equivalent information for equipment and materials.
- 2) Donated Resources **must** apply to Emergency Work that is eligible under the Public Assistance Program. Examples of Emergency Work include the following:
 - a. Removing eligible debris.
 - b. Filling and placing sandbags.
 - c. Donating equipment to raise or reinforce a levee.
 - d. Donating materials, such as rock or sand.

- e. Search and rescue when part of an organized search and rescue operation
 - f. Professional safety inspections.
 - g. Mass food and shelter for victims, when not the mission of the organization.
- 3) Donated Resources must be documented on a separate Project for the recipient.

Pursuant to FEMA Recovery Policy dated June 25, 2018, Donated Resources are now also allowed as a credit towards the Applicant's non-Federal share for a specific Permanent Work Project.

Value of Resources: The following instruction on the valuing of donated resources is based on FEMA's Public Assistance Program and Policy Guide (PAPPG):

- 1) *Volunteer Labor:* The hourly rate placed on volunteer labor should be the same hourly pay rate (plus reasonable fringe benefits) ordinarily paid for similar work within the applicant's organization. If the Applicant does not have employees performing similar work, the rate used should be consistent with those performing the work in the same labor market. To determine the value of volunteer labor, the labor rate should be multiplied by the total number of volunteer labor hours.
- 2) *Donated Equipment:* The value of the donated equipment is calculated by multiplying the applicable applicant rate for the piece of equipment (or FEMA's equipment rate) by the total number of hours that equipment piece was used.
- 3) *Donated Materials:* Only materials donated by third party entities are eligible for credit. To determine the value of donated materials, use the current commercial rate for such material based on previous purchases or information available from vendors. Materials donated from other federal agencies are not considered "donated" for this purpose.

f. Mutual Aid/Inter-Municipal Assistance Agreements:

If costs are incurred under a written/formal mutual aid or other agreement, the applicant must pay the salaries of the jurisdiction's employees who are providing assistance. FEMA has determined that these agreements serve the same purpose as extra hires and that they are eligible costs. **HOWEVER**, if the mutual aid is provided at no additional expense to the applicant, then the value of the mutual aid provided may be treated as donated resources.

5. Equipment Requirements

a. Force Account Equipment Eligibility:

Force account equipment is the term used to identify the Applicant's own equipment used in the repair of disaster damages. Eligibility guidelines for Applicant-owned equipment allow ***operating time only: down time cannot be included. Equipment not in actual use is considered standby and is not eligible for reimbursement.***

* Repairs, maintenance and fuel costs are included in the FEMA Schedule of Equipment Rates as part of the established rate. Extraordinary repair costs due solely to damage caused by operating in the incident (e.g. operation of response vehicles in salt water) may be eligible.

b. FEMA Schedule of Equipment Rates:

The FEMA Equipment Rate List can be used for applicant-owned equipment (see Appendix IV). FEMA Schedule of Equipment Rates can also be found on the FEMA website: www.fema.gov/schedule-equipment-rates

FEMA will provide rates for any equipment not listed; the Applicant will need to provide the make, model number and any other pertinent information that may help in establishing a rate.

c. Equipment Documentation:

Documentation for Applicant-owned and rented equipment must show the following:

- 1) Equipment description and operators name,
- 2) Dates and total hours used, and labor records for associated operators,
- 3) Cost per hour with total cost for each item and,
- 4) Total cost of all equipment used and,
- 5) Work performed

Total equipment hours must be compared to appropriate personnel hours to ensure both are accurate. If a piece of equipment is used by being attached to another piece of equipment (for example, trailer hitched to a truck), this should be noted.

Equipment logs and records must identify each piece of equipment used for disaster-related work at each site. Ensure operator/dispatcher logs and other actual field records are accurately kept, copied and consolidated onto the Force Account Equipment or the Rented Equipment record forms.

d. Rental Equipment:

For rented equipment, the documentation must also show the date and amount paid, and the check number for evidence of payment. This agreement must specify who is responsible for all repairs to the equipment. A separate vendor invoice file should be established with copies of all rental agreements and invoices from equipment vendors. Also, a copy of the rental agreement must be maintained in the work site file (see Appendix III).

6. Materials Requirements (rip-rap, plywood, sandbags, etc.)

The Applicant must document all materials and supplies purchased or taken from stock and used on each job. Provide and attach invoices, receipts, purchase orders, paid vouchers, etc., showing the actual purchase and price of all materials used for disaster work. Use the Materials Record form to consolidate the information to one place (see Appendix III).

a. Purchased Materials:

If materials were purchased specifically to perform disaster work, show the documentation citing that purchase. Documentation must show the vendor, quantity, description, unit price, total price, date used, and the date of purchase and check number. Applicants can only claim the amount of material actually used to perform the approved scope of work on a Project.

b. Inventory Materials:

If materials were taken from stock, provide an invoice or voucher showing the last purchase of those items or stock, even if it was prior to the disaster. Some type of evidence of cost is required for reimbursement for all materials used. Applicants can only claim the amount of material actually used to perform the approved scope of work on a Project.

7. Contract Work Documentation & Eligibility

Contracts must be of reasonable cost, generally must be competitively bid, and must comply with Federal, State, and Local procurement standards. Contract requirements for Local Governments are outlined in the NYS General Municipal Law. All subgrantee contracts must comply with 2 CFR Pt. 200, including, where appropriate, specific contract provisions identified in 2 CFR Appendix II to Part 200 - Contract Provisions for Non-Federal Entity Contracts Under Federal Awards.

a. Competitive, Fixed Price Contracts:

The preferred and most generally accepted means to assure contract work is undertaken at a reasonable cost is to follow competitive, fixed-price procurement procedures. Firm fix-price contracts provide for an established price to maximize incentive for the contractor to control costs and perform effectively.

Fixed-price contracts are achieved by competitive bidding that includes:

- 1) Developing specific contract work specifications;
- 2) Proper advertising;
- 3) Selecting of the lowest qualified bid; and
- 4) Direct solicitation to MWBE firms (must be documented).

The above items must be documented for validation and audit purposes.

The Applicant must solicit two or more proposals from responsible suppliers, when possible, to ensure the selection of the lowest qualified bid. **IF** the lowest bidder is not awarded the contract, a written statement or justification is required as part of the documentation explaining the reason for not taking the lowest bid. Place this statement in the appropriate Project file. Use of non-competitive proposals is governed by 44 CFR 200.320(f).

For new contracts as well as contracts already in place, the Applicant must document and maintain:

- 1) Documents demonstrating compliance with Procurement Standards,
- 2) The contract.
- 3) The vendor invoice showing the charges and rates, applicable to disaster work.
- 4) Acceptance of the work.
- 5) Proof of payment.

b. Time and Materials Contract:

Time and materials contracts should be avoided but may be allowed for work that is immediately necessary after the disaster occurred in instances where a clear scope of work cannot be developed. Generally, FEMA will accept time and materials contracts with a work duration of 70 hours immediately after a disaster. The Applicant must carefully monitor and document contractor expenses, and a cost ceiling or "not to exceed" provision must be included in the contract. If a time and materials contract has been used, the Applicant should contact the State to ensure proper guidelines are followed.

c. Types of Contracts NOT ELIGIBLE are:

- 1) Cost plus or percentage of cost methods.
- 2) Contracts containing a provision which makes payment for eligible work contingent upon reimbursement.
- 3) Contracts with any contractor included on any FEMA debarment and suspension listing <http://www.labor.ny.gov/workerprotection/publicwork/PDFs/debarred.pdf>

d. Emergency Contracting Period:

An emergency contracting period usually occurs immediately following a disaster or incident AND is limited to a matter of days.

Waiving competitive procurement procedures for emergency situations or circumstances may only be accepted under limited conditions that preclude using normal procurement procedures. That is, contracts necessitated by a public emergency arising as a direct result of the declared event such as an accident or other unforeseen occurrence or condition affecting public buildings, public property or the life, health, safety or property of the inhabitants of a municipality may be awarded without competitive bid.

This emergency phase will vary depending on the disaster and the immediate threat to public health and safety. Written justification must accompany all contracts not competitively bid. Contract requirements for local governments are outlined in the NYS General Municipal Law.

C. COMPLETION OF WORK

The deadline for completion of emergency work (debris removal and emergency protective measures) is six (6) months from the date of the Presidential Disaster Declaration. The deadline for permanent work is eighteen (18) months from the Presidential Disaster Declaration. The State may extend the emergency work deadline for an additional six (6) months and permanent work deadline can be extended for an additional thirty (30) months with justification. Further time extensions must be submitted through DHSES to FEMA for approval.

1. Work/Time Extensions

Applicants must request an extension of deadlines PRIOR to assigned dates. **Requests for extensions should be submitted 90 days prior to the deadline to allow time for the request to be reviewed.** To request a time extension, please contact Disaster Assistance Manager Bernadette Moran for directions: Bernadette.moran@dhses.ny.gov or (518) 292-2888.

All requests for a time extension must include detailed justification for the request. The request must specify each Project for which an extension is requested and detail the efforts being made to complete the work prior to the established deadlines. Previous time extensions must be listed on the request.

If an Applicant does not complete the work within the established deadline, and the Applicant does not request and receive a time extension, reimbursement could be denied for any work completed after the established deadlines.

Applicants should not presume that their time extension requests will be approved; however, the disaster work must continue. Notification will be sent to the applicant advising them of the final determination regarding the request. An unfavorable response may be appealed with additional justification.

2. Quarterly Progress Reports

The Applicants are required to report to NYS DHSES on the status of all open large projects using the Quarterly Progress Report (QPR) form. See Appendix VI. This allows the NYS DHSES to obtain the information needed to comply with FEMA requirements and provides the opportunity to identify possible problems being incurred by the Applicants in their efforts to complete their projects.

REMEMBER all work must be completed within the approved time limitations. All costs for which the Applicant seeks reimbursement must be incurred within the approved period of performance. If work cannot be completed within the existing time limitation, a time extension **MUST** be requested. If at any time problems are encountered or concerns exist, notify Disaster Assistance Manager Bernadette Moran: Bernadette.moran@dhses.ny.gov or (518) 292-2888.

3. Approved Project Notification Folder (Blue Book)

Upon receipt of the Approved Project Notification Folder, please promptly review the package for the following information:

- a) Changes in the Scope of Work or discrepancies from the project as identified immediately following the disaster. If any discrepancies are discovered, promptly notify NYS DHSES to avoid payment problems at the time of final inspection.
- b) All open Large Projects must have a report submitted quarterly detailing the status of the projects.
- c) If a Project is no longer under consideration, notify NYS DHSES of the need to withdraw the Project from consideration.
- d) As soon as a Project is completed, the Project Completion and Certification Report (P.4 form) must be completed and returned to Disaster Assistance Manager Bernadette Moran: Bernadette.moran@dhses.ny.gov or (518) 292-2888.

4. Disapproved Project Notification (FEMA Decision Memorandum)

Upon receipt of any FEMA Decision, please review all project documentation. Receipt of this notification starts the Applicant sixty (60) day timeframe to appeal the decision.

D. FINAL INSPECTIONS

Because Federal payments are based on final inspections and validation, proper documentation of costs is an absolute requirement. The final inspection process will begin once NYS DHSES Public Assistance Section is notified by the Applicant that all work has been completed and costs associated with the project have been paid. A final inspection will be conducted on all Large Projects for which the work was not 100% complete at the time the Project was prepared.

The Applicant must promptly notify NYS DHSES upon completion of all work associated with an individual Project (Large or Small), using the Project Completion and Certification Report (P4 form). This notification consists of completing the P4 form by indicating the claimed Project cost and completion date. The Applicant's authorized agent must sign the P4 certification statement indicating the work was completed in accordance with Public Law 93-288, as required.

All correspondence should be addressed to Disaster Assistance Manager Bernadette Moran for directions: Bernadette.moran@dhses.ny.gov or (518) 292-2888.. **REMEMBER the burden of proof and the need to provide detailed justification is the Applicant's responsibility.**

E. APPEALS

An Applicant may submit an Appeal through NYS DHSES to FEMA for reconsideration of any determination (for example, funding amounts, eligibility determinations, etc.) that FEMA made related to federal assistance pertaining to the Applicant. Examples of determinations which may be appealed include:

- 1) An entity is not an eligible Applicant.
- 2) A facility or a specific Project is not eligible.
- 3) The approved eligible cost is less than what the Applicant believes is necessary to complete the approved scope of work.
- 4) Denial of a requested time extension.
- 5) Denial of a Scope of Work Change Request.
- 6) Denial of specific costs claimed for a Project.

The Applicant's written appeal request must be sent to NYS DHSES within sixty (60) days of the date of receipt of FEMA's written Determination. The appeal must include documented justification supporting the appeal, the monetary figure in dispute, and the Law/Regulation/Policy that supports the appeal (44 CFR 206.206(a)). It is the Applicant's responsibility to prepare the appropriate appeal documentation and justification to be presented to FEMA for their review and consideration. FEMA will deny late appeal submissions.

An Applicant has two (2) opportunities to appeal a FEMA decision. The First Appeal goes to FEMA Region II for a determination. If an Applicant pursues a Second Appeal, it goes to FEMA Headquarters in Washington D.C. for a determination. In lieu of a Second Appeal, certain claims may be pursued in Arbitration. Appeals are submitted through DHSES to FEMA. Each Appeal will be processed through NYS DHSES for review and comment before being referred to FEMA. If you have questions regarding the appeal or arbitration process for a Project, please contact Disaster Assistance Manager Bernadette Moran for directions: Bernadette.moran@dhses.ny.gov or (518) 292-2888.

F. AUDIT REQUIREMENTS

1. A review of all Large Projects (and Small Projects with significant cost overruns) will be conducted by the State once those projects are completed.
2. In accordance with the Single Audit Act of 1984 (P.L.98-502), as amended in 1996 (P.L. 104-156), a Sub-Recipient (Applicant) which expends \$750,000 or more of Federal funds from all sources during its fiscal year, must have an independent audit conducted in accordance with the circular. OMB Circular A-133 further requires that the final report for such audit be completed within nine (9) months of the end of the sub-recipient's fiscal year. Additionally, per the New York State Budget Policy and Reporting Manual Item I-300, State agencies that provide funds to sub-recipients pursuant to OMB Circular A-133 must obtain copies of the sub-recipient's A-133 audit reports and determine whether any audit findings affecting its programs are significant and warrant follow-up.

Therefore, all Sub-recipients (Applicants) must provide one copy of such audit report or notification that they are exempt from the requirements to DHSES within nine (9) months of the end of their fiscal year. Please submit the A-133 report or exemption notification to:

**New York State Division of Homeland Security and Emergency Services
Fiscal Monitoring Unit
State Campus, Building 7A
1220 Washington Avenue
Albany, NY 12242**

Electronic copies or a link to the report is acceptable and can be directed to: FMU@dhses.ny.gov. An e-mail response submitted to FMU@dhses.ny.gov indicating that your entity is exempt **which includes the applicable fiscal period associated with the exemption** is acceptable as well.

Failure to provide a copy of the A-133 Single Audit report or notification your entity is exempt from the requirement within nine (9) months of your fiscal year end may result in a stop payment status being placed on all DHSES awards until compliance is met. Continued non-compliance can also negatively impact future funding opportunities and/or result in disallowance of expenditures.

Questions regarding the Single Audit Requirement should be addressed to the DHSES Fiscal Monitoring Unit by submitting them to FMU@dhses.ny.gov or by calling (518) 242-5069.

3. **Important Change:** Please note that the Single Audit Requirements are now codified under CFR Title 2, Part 200 Subpart F. The effective date of the higher audit threshold is located at CFR Title 2, Part 200 Subpart F, § 200.110(b), which can be found at the link below:

http://www.ecfr.gov/cgi-bin/text-idx?tpl=/ecfrbrowse/Title02/2cfr200_main_02.tpl

Did you participate in the Federal/State Preliminary Damage Assessment (PDA)? YES NO

Private Non-Profit Organization? YES NO

If yes, which of the facilities identified below best describe your organization? _____

Title 44 CFR, part 206.221(e) defines an eligible private non-profit facility as: "... any private non-profit educational, utility, emergency, medical or custodial care facility, including a facility for the aged or disabled, and other facility providing essential governmental type services to the general public, and such facilities on Indian reservations." "Other essential governmental service facility means museums, zoos, community centers, libraries, homeless shelters, senior citizen centers, rehabilitation facilities, shelter workshops and facilities which provide health and safety services of a governmental nature. All such facilities must be open to the general public."

Private Non-Profit Organizations must attach copies of their Tax Exemption Certificate and Organization Charter or By-Laws. If your organization is a school or educational facility, please attach information on accreditation or certification.

OFFICIAL USE ONLY: FEMA - _____ -DR- _____ - _____ FIPS# _____ DATE RECEIVED _____

Instructions to Complete the Request for Public Assistance (RPA) Form

Submission of the Request for Public Assistance (RPA) form is the first step for participation in the Public Assistance Program. Any governmental entity (village, town, county, or state agency), Native American Tribal organization, or certain non-profit organizations that wish to apply must complete a Request for Public Assistance (RPA) form.

Submittal of the RPA does not make an Applicant eligible for Public Assistance under the Stafford Act. The RPA is used by a potential Applicant to indicate interest in the Public Assistance Program.

Applicants should make every effort to complete and return their RPA prior to leaving the Applicant Briefing. The RPA must be submitted with 30 days of the date of the presidential declaration. If a potential Applicant fails to submit the RPA within the specified time frame, they will be denied eligibility for Public Assistance.

The Applicant must designate their Representative(s) or point(s) of contact on the RPA. The Representative(s) should have the authority of the Chief Elected Official and should be:

- Knowledgeable of the work to be inspected,
- Knowledgeable of the location of damages,
- Easily accessible by telephone (day & evening), and
- Available for future FEMA or State inquiries.

The Representative(s) will also have the overall responsibility to:

- Consolidate the disaster documentation activities among departments.
- Ensure completion of disaster work.
- Submit applicable forms.

Completing the RPA Form: All potential Applicants must complete the Request for Public Assistance Form:

- Fill in the appropriate declaration number at the top of the form.
- Enter the date the form is completed.
- Ensure names, addresses, telephone numbers, and email addresses are clear and correct.

DUNS NUMBER
Disaster No. FEMA- _____ -DR-NY
(REQUIRED FOR ALL APPLICANTS)

In order to process your payment for disaster assistance funds, the Division of Homeland Security and Emergency Services will need to provide the Federal Emergency Management Agency with your DUNS Number. Your application cannot be processed until the appropriate DUNS number is received.

Located in the County of: _____

DUNS # (9 Digits): _____

Applicant Name: _____

Applicant Address: _____

City, Zip Code: _____

Telephone #: _____

Signature: _____ Date: _____

**Please provide this number, as it will assist us in providing
your funding in a timely manner**

Please mail or fax, as soon as possible, to:

Public Assistance/Recovery Section
Division of Homeland Security and Emergency Services
1220 Washington Avenue
Building 7A, 4th Floor
Albany, New York 12242
Phone: 518-292-2293
Fax: 518-322-4984

DUNS Number Requirement for Federal Grant Applications

Organizations are required to have a Data Universal Numbering System (DUNS) number to apply for a grant or cooperative agreement from the Federal Government.

The DUNS number is a unique nine-character identification number provided at no charge by the commercial company Dun and Bradstreet. The DUNS number is also a prerequisite for another Applicant organizational requirement: registration in the Federal Government's Central Contractor Registry. Registration in this system (CCR) is a requirement for all grantees and a current requirement for grantees applying for federal assistance through <http://www.grants.gov/>

To obtain a DUNS number in about 10 minutes, call 1-866-705-5711. Be prepared to answer the following questions:

- a. Name of Business
- b. Business Address
- c. Local Phone Number
- d. Name of the CEO/Business Owner
- e. Legal structure of the business (corporation, partnership, proprietorship)
- f. Year Business Started
- g. Primary Line of Business
- h. Total Number of Employees (Full and Part-Time)

You may also obtain a DUNS number online at the Dun & Bradstreet website, which may take up to 14 business days:

<https://fedgov.dnb.com/webform>

CERTIFICATION REGARDING DRUG-FREE WORKPLACE REQUIREMENTS

This certification is required by the regulations implementing the Drug-Free Workplace Act of 1988, 2 CFR Part 182, Subpart B. The regulations, published in the May 25, 1990 Federal Register, require certification by sub grantees, prior to award, that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the Division of Homeland Security and Emergency Services determines to award the sub grant. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants or government wide suspension or debarment. (See 2 CFR Part 180, Subpart G, 180.700, and Subpart H, 180.800)

A. The sub grantee certifies that it will or will not continue to provide a drug-free workplace by:

- (a) publishing a statement notifying employees that the unlawful manufacture, distribution, dispersing, possession, or use of a controlled substance is prohibited in the sub grantees workplace and specifying the actions that will be taken against employees for violation of such prohibition;
- (b) establishing an ongoing drug-free awareness program to inform employees about-
 - (1) the dangers of drug abuse in the workplace;
 - (2) the sub grantees policy of maintaining a drug-free workplace;
 - (3) any available drug counseling, rehabilitation, and employee assistance programs;
 - (4) the penalties that may be imposed upon the employee for drug abuse violations occurring in the workplace;
- (c) making it a requirement that each employee to be engaged in the performance of the sub-grant be given a copy of the statement required by paragraph (a);
- (d) notifying the employee in the statement required by paragraph (a) that, as a condition of employment under sub grant, the employee will-
 - (1) abide by the terms of that statement; and
 - (2) notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;
- (e) notifying the Division of Homeland Security and Emergency Services in writing within ten calendar days after receiving notice under subparagraph (d) (2) from an employee or otherwise receiving actual notice of such conviction. Such notice shall include the position title of the employee and the federal identification number of the sub grantee.
- (f) taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d) (2), with respect to any employee who is so convicted-
 - (1) taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or
 - (2) requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;
- (g) making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a),(b), (c), (d), (e), and (f).

B. The sub grantee may insert in the space provided below the site (s) for the performance of work done in connection with this grant:

Organization Name: _____ **Disaster Name: FEMA-** _____ **-DR or EM-NY**

(Please Print) Name and Title of Authorized Representative: _____

Signature: _____ **Date:** _____

FEDERAL TAX IDENTIFICATION NUMBER
(Not for use by State Agencies or Local Political Sub-Divisions)
Disaster No. FEMA- _____ -DR / EM-NY

In order to process your payment for disaster assistance funds, the Division of Homeland Security and Emergency Services will need to provide the State Comptroller's Office with your PAYEE IDENTIFICATION NUMBER.

For an individual, the Payee ID is the social security number. For corporations, including Private non-profits, partnerships and other business entities, the Payee ID is the Federal Tax Identification Number (the number used to report Federal withholding taxes to the government). In either case, it is a nine-digit number as follows:

Individual: 123-45-6789
Business: 12-3456789

Federal Tax ID #: _____

Applicant Name: _____

Applicant Address: _____

City, Zip Code: _____

Telephone #: _____

Signature: _____ Date: _____

**Please provide this number, as it will assist us in providing
your funding in a timely manner**

Please mail or fax, as soon as possible, to:

Public Assistance/Recovery Section
Division of Homeland Security and Emergency Services
1220 Washington Avenue
Building 7A, 4th Floor
Albany, New York 12242
Phone: 518-292-2293
Fax: 518-322-4984

II. Private Non-Profit Eligibility Guidelines

Private Non-Profit Eligibility (PNP) Guidelines

Facilities not owned by public entities also may be eligible for disaster assistance if certain criteria are met. The program is intended for organizations that have sustained extensive disaster losses. Obtaining disaster funding involves significant administrative effort and time which includes detailed inspections, preparation of records and documentation. Further information can be obtained by the county emergency management office.

ALL eligible private non-profit organizations, whether a school district, volunteer fire department or an alcohol and drug rehabilitation center MUST also follow the procedures regarding Documentation Requirements, Instructions, and Eligibility as noted in the Applicant's Handbook.

PNP facilities are grouped into one of two different categories:

1. **Critical PNPs** – a facility that provides a critical service which is defined as: education, utility, emergency, or medical.
2. **Non-critical PNP's** – a facility that provides a non-critical, but essential, government service AND is open to the general public such as: community centers, museums, and zoos.

The following facilities are generally eligible for assistance: educational, utilities, irrigation, emergency, medical, and custodial care facilities and facilities that provide essential government services. Those that provide "other essential government services", must be open to the general public include, irrigation facilities, museums, zoos, community centers, libraries, homeless shelters, senior citizens centers, shelter workshops, and health and safety services of a governmental nature.

To be considered as a PNP applicant: the following information is required and must be submitted BEFORE a determination of eligibility can be made. See Appendix III.

- Tax Exemption Certificate granted under sections 501(c) (d) or (e) of the Internal Revenue Code of 1954, as amended, or State certification that the organization is a nonprofit organization under State Law.
- Evidence from NYS that your organization is a non-revenue producing business.
- Organizational charter or by-laws.
- Other publications, brochures, pamphlets or literature that describe the organization and its services, purposes and functions.
- Description of membership policies or fee structures.
- Federal Tax Identification Number.
- D-U-N-S Number (Dun and Bradstreet).

Before expenditure can be considered as part of the public assistance application, it must meet the following criteria:

1. The damage must be a direct result of a Presidential declared disaster.
2. The damage must be within the federally designated disaster area.
3. The damage must have occurred within the designated incident period.
4. Eligible damage at a designated worksite must total \$3,200 or higher.

5. The damages infrastructure must be owed by and/or be the legal responsibility of an eligible applicant.
6. The damage and work to be performed must not be eligible for reimbursement under the authority of another federal program.
7. Assistance is supplemental to any insurance proceeds received.

Educational Institutions: Educational institutions are defined in terms of primary, secondary, and higher education schools. The school must satisfy the State requirements for compulsory attendance. Any elementary school as defined by section 801 of the Elementary and Secondary Education Act of 1965; or any secondary school as defined by section 801(h) of the Elementary and Secondary Education Act of 1965; or any institution of higher education as defined by section 1201 of the Higher Education Act of 1965.

PNP Medical: Any hospital, outpatient facility, rehabilitation facility, or facility for long term care.

Hospitals: Include general, tuberculosis and other types of hospitals and related facilities, such as laboratories, outpatient departments, nursing home facilities, extended care facilities, facilities related to programs for home health services, self-care units, and central service facilities operated in connection with hospitals. This category also includes education or training facilities for health profession personnel operated as an integral part of a hospital. A hospital that primarily furnishes home-based care is not considered a hospital under this definition.

Custodial Care Facility: Buildings, structures or systems which are used to provide institutional care for persons who require close supervision and some physical constraints on their daily activities for their protection, but do not require daily medical care.

Utility: Building, structures, equipment or systems of energy, communication, water supply, sewage collection and treatment of other similar public service facilities.

Emergency Facility: Buildings, structures, equipment or systems used to provide emergency services, such as fire protection, ambulance or rescue, to the general public.

Other essential Governmental Service Facility: Museums, zoos, community centers, libraries, homeless shelters, senior citizen centers, rehabilitation facilities, shelter workshops and facilities which provide health and safety service of a governmental nature.

Examples of Ineligible Services or Facilities are:

- Recreational facilities
- Job counseling or job training
- Facilities for advocacy groups not directly providing health services
- Conference facilities
- Political education
- Advocacy or lobbying
- Religious service or religious instruction or study
- Facilities for social events
- Roads owned and operated by a property owners association

Requirement for Application to the Small Business Administration (SBA) PNP facilities potentially eligible for permanent work assistance that provide “non-critical services” must first apply for a disaster loan from the SBA before applying to FEMA for disaster assistance. “Noncritical” PNPs, however, may apply directly to FEMA for emergency work costs. “Non-critical services” include educational facilities as well as those facilities defined in § 206.221(e)(7). (Facilities providing “critical services” as defined in §206.226(c)(1), including power, water, sewer

and wastewater, communications, medical treatment, fire protection, emergency rescue, nursing homes, and educational institutions may apply directly to FEMA for disaster assistance.)

The SBA loan application process for these “non-critical” PNP facilities will result in one of three outcomes:

1. If the PNP is declined for an SBA loan, the PNP may then apply to FEMA for public assistance.
2. If the SBA loan fully covers eligible damages from the disaster event, then no assistance from FEMA is available.
3. If the maximum SBA loan for which the facility is eligible does not fully cover eligible damages, the PNP may then apply to FEMA for the excess eligible damages.

Eligible PNPs are also required to apply to SBA for any 406 Hazard Mitigation costs.

III. RPA Forms for Private Non-Profit (PNP) Applicants

RPA Forms for Private Non-Profit (PNP) Applicants

- 1. RPA Form 90-49 (must include valid e-mail addresses)**
 - a. Instructions are Included*
- 2. DUNS Number Form**
 - a. Instructions are Included*
- 3. Drug Free Work Place Form**
- 4. Applicant Certification Form**
- 5. Office of the State Comptroller - Substitute Form W-9**
 - a. Instructions are Included*
- 6. NYS Tax Exempt Certificate / Letter from IRS**
 - a. Example is Included*
- 7. PNP Facility Questionnaire**
- 8. Additional Back-up Information:**
 - a. Deed/Lease**
 - b. Description of the Damaged Facility and the services provided**
 - c. Organization Charter or By-Laws**
 - d. Publications / brochures that describe your organization**
 - e. Description of membership policies or fee structures**
 - f. Valid Accreditation (Educational and Medical Facilities)**

Did you participate in the Federal/State Preliminary Damage Assessment (PDA)? YES NO

Private Non-Profit Organization? YES NO

If yes, which of the facilities identified below best describe your organization? _____

Title 44 CFR, part 206.221(e) defines an eligible private non-profit facility as: "... any private non-profit educational, utility, emergency, medical or custodial care facility, including a facility for the aged or disabled, and other facility providing essential governmental type services to the general public, and such facilities on Indian reservations." "Other essential governmental service facility means museums, zoos, community centers, libraries, homeless shelters, senior citizen centers, rehabilitation facilities, shelter workshops and facilities which provide health and safety services of a governmental nature. All such facilities must be open to the general public."

Private Non-Profit Organizations must attach copies of their Tax Exemption Certificate and Organization Charter or By-Laws. If your organization is a school or educational facility, please attach information on accreditation or certification.

OFFICIAL USE ONLY: FEMA - _____ -DR- _____ - _____ FIPS# _____ DATE RECEIVED _____

Instructions to Complete the Request for Public Assistance (RPA) Form

Submission of the Request for Public Assistance (RPA) form is the first step for participation in the Public Assistance Program. Any governmental entity (village, town, county, or state agency), Native American Tribal organization, or certain non-profit organizations that wish to apply must complete a Request for Public Assistance (RPA) form.

Submittal of the RPA does not make an Applicant eligible for Public Assistance under the Stafford Act. The RPA is used by a potential Applicant to indicate interest in the Public Assistance Program.

Applicants should make every effort to complete and return their RPA prior to leaving the Applicant Briefing. The RPA must be submitted with 30 days of the date of the presidential declaration. If a potential Applicant fails to submit the RPA within the specified time frame, they will be denied eligibility for Public Assistance.

The Applicant must designate their Representative(s) or point(s) of contact on the RPA. The Representative(s) should have the authority of the Chief Elected Official and should be:

- Knowledgeable of the work to be inspected,
- Knowledgeable of the location of damages,
- Easily accessible by telephone (day & evening), and
- Available for future FEMA or State inquiries.

The Representative(s) will also have the overall responsibility to:

- Consolidate the disaster documentation activities among departments.
- Ensure completion of disaster work.
- Submit applicable forms.

Completing the RPA Form: All potential Applicants must complete the Request for Public Assistance Form:

- Fill in the appropriate declaration number at the top of the form.
- Enter the date the form is completed.
- Ensure names, addresses, telephone numbers, and email addresses are clear and correct.

DUNS NUMBER
Disaster No. FEMA- _____ -DR-NY
(REQUIRED FOR ALL APPLICANTS)

In order to process your payment for disaster assistance funds, the Division of Homeland Security and Emergency Services will need to provide the Federal Emergency Management Agency with your DUNS Number. Your application cannot be processed until the appropriate DUNS number is received.

Located in the County of: _____

DUNS # (9 Digits): _____

Applicant Name: _____

Applicant Address: _____

City, Zip Code: _____

Telephone #: _____

Signature: _____ Date: _____

**Please provide this number, as it will assist us in providing
your funding in a timely manner**

Please mail or fax, as soon as possible, to:

Public Assistance/Recovery Section
Division of Homeland Security and Emergency Services
1220 Washington Avenue
Building 7A, 4th Floor
Albany, New York 12242
Phone: 518-292-2293
Fax: 518-322-4984

DUNS Number Requirement for Federal Grant Applications

Organizations are required to have a Data Universal Numbering System (DUNS) number to apply for a grant or cooperative agreement from the Federal Government.

The DUNS number is a unique nine-character identification number provided at no charge by the commercial company Dun and Bradstreet. The DUNS number is also a prerequisite for another Applicant organizational requirement: registration in the Federal Government's Central Contractor Registry. Registration in this system (CCR) is a requirement for all grantees and a current requirement for grantees applying for federal assistance through <http://www.grants.gov/>

To obtain a DUNS number in about 10 minutes, call 1-866-705-5711. Be prepared to answer the following questions:

- a. Name of Business
- b. Business Address
- c. Local Phone Number
- d. Name of the CEO/Business Owner
- e. Legal structure of the business (corporation, partnership, proprietorship)
- f. Year Business Started
- g. Primary Line of Business
- h. Total Number of Employees (Full and Part-Time)

You may also obtain a DUNS number online at the Dun & Bradstreet website, which may take up to 14 business days:

<https://fedgov.dnb.com/webform>

CERTIFICATION REGARDING DRUG-FREE WORKPLACE REQUIREMENTS

This certification is required by the regulations implementing the Drug-Free Workplace Act of 1988, 2 CFR Part 182, Subpart B. The regulations, published in the May 25, 1990 Federal Register, require certification by sub grantees, prior to award, that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the Division of Homeland Security and Emergency Services determines to award the sub grant. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants or government wide suspension or debarment. (See 2 CFR Part 180, Subpart G, 180.700, and Subpart H, 180.800)

A. The sub grantee certifies that it will or will not continue to provide a drug-free workplace by:

- (a) publishing a statement notifying employees that the unlawful manufacture, distribution, dispersing, possession, or use of a controlled substance is prohibited in the sub grantees workplace and specifying the actions that will be taken against employees for violation of such prohibition;
- (b) establishing an ongoing drug-free awareness program to inform employees about-
 - (1) the dangers of drug abuse in the workplace;
 - (2) the sub grantees policy of maintaining a drug-free workplace;
 - (3) any available drug counseling, rehabilitation, and employee assistance programs;
 - (4) the penalties that may be imposed upon the employee for drug abuse violations occurring in the workplace;
- (c) making it a requirement that each employee to be engaged in the performance of the sub-grant be given a copy of the statement required by paragraph (a);
- (d) notifying the employee in the statement required by paragraph (a) that, as a condition of employment under sub grant, the employee will-
 - (1) abide by the terms of that statement; and
 - (2) notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;
- (e) notifying the Division of Homeland Security and Emergency Services in writing within ten calendar days after receiving notice under subparagraph (d) (2) from an employee or otherwise receiving actual notice of such conviction. Such notice shall include the position title of the employee and the federal identification number of the sub grantee.
- (f) taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d) (2), with respect to any employee who is so convicted-
 - (1) taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or
 - (2) requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;
- (g) making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a),(b), (c), (d), (e), and (f).

B. The sub grantee may insert in the space provided below the site (s) for the performance of work done in connection with this grant:

DO NOT SUBMIT FORM TO IRS — SUBMIT FORM TO NYS ONLY AS DIRECTED

FOR OSC USE ONLY

NYS Office of the State Comptroller Instructions for Completing Substitute Form W-9

New York State (NYS) must obtain your correct Taxpayer Identification Number (TIN) to report income paid to you or your organization. NYS Office of the State Comptroller uses the Substitute Form W-9 to obtain certification of your TIN in order to ensure accuracy of information contained in its payee/vendor database and to avoid backup withholding.¹ We ask for the information on the Substitute Form W-9 to carry out the Internal Revenue laws of the United States. You are required to give us the information.

Any payee/vendor who wishes to do business with New York State must complete the Substitute Form W-9. Substitute Form W-9 is the only acceptable documentation. **We will not accept IRS Form W-9.**

Part I: Vendor Information

1. **Legal Business Name:** For individuals, enter the name of the person who will do business with NYS as it appears on the Social Security card or other required Federal tax documents. An organization should enter the name shown on its charter or other legal documents that created the organization. Do not abbreviate names.
2. **DBA (Doing Business As):** Enter your DBA name.
3. **Entity Type:** Mark the Entity Type doing business with New York State.

Part II: Taxpayer Identification Number (TIN) and Taxpayer Identification Type

1. **Taxpayer Identification Number:** Enter your nine-digit Social Security Number, Individual Taxpayer Identification Number (ITIN)² or Employer Identification Number.
2. **Taxpayer Identification Type:** Mark the type of identification number provided.

Part III: Address

1. **Physical Address:** List the location of where your business is physically located.
2. **Remittance Address:** List the location where payments should be delivered.

Part IV: Exemption from Backup Withholding and Certification

Generally, reportable payments made by New York State are subject to Backup Withholding. Exemption from Backup Withholding applies to government and non-United States Business Entities³. Please sign, date, provide the preparer's name, telephone and email address. The preparer should be employed by your organization.

Part V: Contact Information

Please provide the contact information for an executive at your organization. This individual should be the person who makes legal and financial decisions for your organization.

¹ According to IRS Regulations, OSC must withhold 28% of all payments if a payee/vendor fails to provide OSC its certified TIN. The Substitute Form W-9 certifies a payee/vendor's TIN.

² An ITIN is a nine-digit number used by the United States Internal Revenue Service for individuals not eligible to obtain a Social Security Number, but are required to file income taxes. To obtain an ITIN, submit a completed W-7 to the IRS. The IRS will notify you in writing within 4 to 6 weeks about your ITIN status. In order to do business with New York State, **you must submit IRS Form W-8** along with our Substitute Form W-9 showing your ITIN. IRS Form W-8 certifies your foreign status. To obtain IRS Forms W-7 and W-8, call 1-800-829-3676 or visit the IRS website at www.irs.gov.

³ In order to do business with New York State, **you must submit IRS Form W-8** along with our Substitute Form W-9. IRS Form W-8 certifies your foreign status and exempts you from United States information return reporting and backup withholding rules. To obtain IRS Form W-8, call 1-800-829-3676 or visit the IRS website at www.irs.gov.

EXAMPLE OF A NYS TAX EXEMPT CERTIFICATE

New York State Department of Taxation and Finance

Exempt Organization Certificate

ST-119

(2/14)

The organization named below is exempt from payment of New York State and local sales and use tax. **Note:** This is your organization's proof of exemption and must be retained in your organization's permanent files. If this card is saved to an electronic version, you still must retain this original card in your permanent files.

The number shown on this certificate must be entered on any Form ST-119.1, *Exempt Organization Exempt Purchase Certificate*, presented to a vendor. If this certificate is lost or destroyed, you must contact the Exempt Organizations Unit for instructions to obtain a replacement.

This certificate will remain in effect unless it is revoked or canceled. Misuse of the authority granted under this certificate will result in the revocation of exempt status and subject the organization to substantial civil and criminal penalties.

Certificate number	EX [REDACTED]
Date issued	[REDACTED]

This certificate may not be altered, changed, lent, or transferred to another organization or person.

**FEDERAL EMERGENCY MANAGEMENT AGENCY
PNP FACILITY QUESTIONNAIRE**

This questionnaire is to be used by FEMA and state personnel to help determine the eligibility of specific facilities of an approved Private Non-Profit (PNP) organization. Obtain answers to the following questions for each PNP organization. If the organization has more than one facility that incurred damage, complete a separate sheet for each facility.

Name of PNP Organization: _____

Name of the damaged facility and location: _____

What is the primary purpose of the damaged facility? _____

Who may use this facility? _____

What fee, if any, is charged for the use of the facility? _____

Was the facility in use at the time of the disaster? Yes No

Did the facility sustain damage as a direct result of the disaster? Yes No

What type of assistance is being requested? Public Assistance _____

Does the PNP organization own the facility? Yes No

If "Yes," obtain proof of ownership; check here if attached.

If "No," do they lease / rent the facility? Yes No

If "Yes," obtain a copy of the lease or rental agreement for the damaged facility; check here if attached.

Are the repairs of this facility the legal responsibility of the organization? Yes No

Is the facility insured? Yes No

If "Yes," obtain a copy of the insurance policy; check here if attached.

IV. FEMA Cost Codes/Equipment Rates

FEMA's SCHEDULE OF EQUIPMENT RATES

**DEPARTMENT OF HOMELAND SECURITY
FEDERAL EMERGENCY MANAGEMENT AGENCY
RECOVERY DIRECTORATE
PUBLIC ASSISTANCE DIVISION
WASHINGTON, DC 20472**

The rates on this Schedule of Equipment Rates are for applicant owned equipment in good mechanical condition, complete with all required attachments. Each rate covers all costs eligible under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. § 5121, et seq., for ownership and operation of equipment, including depreciation, overhead, all maintenance, field repairs, fuel, lubricants, tires, OSHA equipment and other costs incidental to operation. Standby equipment costs are not eligible.

Equipment must be in actual operation performing eligible work in order for reimbursement to be eligible. LABOR COSTS OF OPERATOR ARE NOT INCLUDED in the rates and should be approved separately from equipment costs.

Information regarding the use of the Schedule is contained in 44 CFR § 206.228 Allowable Costs. Rates for equipment not listed will be furnished by FEMA upon request. Any appeals shall be in accordance with 44 CFR § 206.206 Appeals.

THESE RATES ARE APPLICABLE TO MAJOR DISASTERS AND EMERGENCIES
DECLARED BY THE PRESIDENT ON OR AFTER August 15, 2019.

V. Recovery Scoping Meeting Checklist

Early Coordination: Exploratory Call and Recovery Scoping Meeting

This Quick Guide explains **why the Exploratory Call and the Recovery Scoping Meeting are important** to the success of FEMA Public Assistance grant development and the **responsibilities of an Applicant** in this early coordination.

The Public Assistance Program Delivery Process

What is an Exploratory Call?

An Exploratory Call is **an introductory discussion between an Applicant and FEMA staff** to discuss disaster-related damages and learn what is required to develop a Public Assistance grant. After a Request for Public Assistance has been approved, Applicants are assigned a Program Delivery Manager, who will be their central FEMA point of contact to help navigate the grant process. The Program Delivery Manager will conduct an Exploratory Call, which should occur within 7 days of assignment. During the call, an Applicant will:

- Connect with the Program Delivery Manager
- Learn about Public Assistance grants and how they are developed
- Describe incident-related damage and barriers to recovery, including impacts to critical infrastructure and funding needs
- Learn how to report damage claims
- Identify key personnel to include in future meetings
- Learn about key documentation that must be submitted in support of damage claims
- Discuss and schedule the Recovery Scoping Meeting.

Recipient

State, tribe or territory that receives and administers the Public Assistance Federal award.

Applicant

State, local, tribal, or territorial government or eligible private non-profit entity submitting a request for assistance under the Recipient's Federal award.

The Program Delivery Manager uses the Exploratory Call to tailor the agenda of the Recovery Scoping Meeting. It also allows an Applicant to prepare for and coordinate participation in the Recovery Scoping Meeting.

What is a Recovery Scoping Meeting?

A Recovery Scoping Meeting is a **detailed and in-depth working session** between an Applicant and FEMA staff to discuss the impacts of the incident and develop the strategy for Public Assistance grant development. The discussion during the Recovery Scoping Meeting establishes an Applicant's priorities and sets the tempo for the Public Assistance delivery process. The Recovery Scoping Meeting occurs within 21 days of Applicant assignment to a Program Delivery Manager.

The Recovery Scoping Meeting starts the 60-day regulatory timeframe during which an Applicant must identify and report damage.

How should an Applicant prepare for a Recovery Scoping Meeting?

An Applicant should be ready to actively participate in this working session and invite all relevant staff with knowledge of disaster-related damages and community needs, to ensure the Applicant and FEMA can develop an appropriate strategy for recovery. To prepare for the Recovery Scoping Meeting, an Applicant should consider the steps below.

Topics in Recovery Scoping Meeting

- Applicant's recovery plans and priorities
- Details of incident-related damage
- Work that has already been done
- Logically grouping damages into projects
- Documentation and information needs
- Schedule and dates for site inspections
- Potential hazard mitigation opportunities
- Insurance, environmental and historic preservation compliance requirements

- Continue to **identify and report disaster-related damages** in the Damage Inventory in Grants Portal. Applicant may develop a draft damage inventory to discuss with the Program Delivery Manager prior to uploading into Grants Portal.
- Identify **desired recovery outcomes** for disaster-related damage. Consider:
 - How do you want to fix your damaged facilities and/or infrastructure?
 - Do you have long-term community development plans?
 - Do you need help in determining your long-term plan?
- Prioritize disaster-related damages**. Consider:
 - Which facilities or infrastructure should be addressed first?
 - Do you have any funding needs?
- Identify and **invite the staff** with in-depth knowledge of disaster-related damages, such as public utilities managers, transportation department staff, or bookkeeping staff who can gather supporting documentation for disaster claims.
- Identify **representatives with knowledge** of damaged facilities or infrastructure **who will participate in site inspections**.
- Begin to **gather supporting documentation**, including pay/personnel policy, procurement Policy, relevant insurance policies, and contracts.
- Review schedule** and identify times for regular follow-up meetings with FEMA.

The *Quick Guide* series is a set of documents that explain the roles and responsibilities of Recipients and Applicants in key steps in FEMA's Public Assistance Program delivery process. The Public Assistance Program provides Federal grant funding to help communities quickly respond to and recover from major disasters or emergencies declared by the President. Read more about Public Assistance Program delivery in other Quick Guides, the [Public Assistance Program and Policy Guide](#), and resources available on [Grants Portal](#).

VI. Quarterly Progress Report Form (with Instructions)

QUARTERLY PROGRESS REPORT FORM INSTRUCTIONS

The Quarterly Progress Report form is used by the NYS Division of Homeland Security and Emergency Services (DHSES) to collect valuable information pertaining to large projects. NYS DHSES is required to obtain this information for us to report the status of these projects to the Federal Emergency Management Agency (FEMA). This form needs to be completed and returned no later than the 10th of the month following the end of each quarter. This form helps us to ascertain information in a timely manner to secure and protect you from circumstances that could jeopardize your funding. DHSES must report on all open large projects.

FOR ALL OPEN LARGE PROJECTS, COMPLETE A LINE FOR EACH PROJECT WORKSHEET.

To assist, DHSES has entered the FEMA disaster number, the ten digit/letter P.A. I.D. number (ex: 000-1XYZ2-00), the name of your agency/municipality and the Project Worksheet (PW) number (ex: 1, 23, 456 and 7890).

PROJECT MANAGEMENT:

- A. Check the appropriate boxes if a Scope of Work change or a Time Extension is needed. For other required actions, please explain in the Comments section.

****Scope of Work changes must be submitted in writing with the supporting documentation.***

****If a time extension is needed you will need to submit a request letter with the following FEMA requirements:***

- 1) The dates and provisions of all previous time extensions regarding the project.
- 2) A detailed justification for the delay explaining extenuating circumstances or unusual project requirements beyond the control of the applicant that prevented the completion of the reconstruction project within the initial time limit.
- 3) A revised timeline for project completion.

- B. Enter the amount spent to date on the project
- C. Enter estimated final cost of the project
- D. Enter FEMA approved Period of Performance end date
- E. Enter the projected date of completion of all work on the project
- F. % of **Physical** Work Completed – enter the percentage of the **physical** work that is completed. Remaining administrative work **should not be** taken into consideration when calculating this percentage. If the project is 100% complete and you have not already done so, complete a Project Completion and Certification Report (P.4), located in the project's Blue Folder, and return it to NYS DHSES.

****The P.4 must be completed and returned to DHSES for closeout/final accounting to be started. Final payment cannot be made until FEMA approves the closeout.***

- G. Work Completed – describe any major physical work component of a project that requires no further action. (see additional information below)
- H. Work in Progress - describe any major physical work component of a project that has begun but additional actions are necessary for project completion. (see additional information below)
- I. Work to be Started – describe as any major physical work component of a project that has not begun and is necessary for project completion. (see additional information below)
- J. Obstacles & Solutions – describe any current issue the project is experiencing that has delayed the completion of the project's **physical** work. What solutions are available to remedy the issue?

****If additional space is needed to provide the information requested in columns G through J, additional Word documents can be submitted with the QPR.***

- K. Comments – Complete with further information/explanation on the status of the project. (for example: permit status, engineering status, issues/comments- historic, insurance, complexities*, or concerns you want to bring to the State's attention)
- L. Complete contact information for the official Point of Contact for your organization before submitting the form(s) to DHSES. Check the box if there are any changes to the contact information i.e. Point of Contact, address change etc.

****Complex Facilities requiring special engineering considerations and correspondence (such as ; wastewater treatment, hospital, school, office bldg., power plant, dam, tunnels, pumping station, incinerator, marine terminal, unconventional designs etc.) should be very well documented and use professional standards for accounting and project management cost tracking***

ADDITIONAL DETAILS FOR COMPLETING COLUMNS G THROUGH I

- Work Completed
 - Please provide the monetary value for the work completed
 - Please describe the major components of the work that has been completed on the project
 - This information should be organized by some type of logical grouping (i.e. work site, building, bridge, road etc.) but should be labeled so DHSES staff can easily ascertain the location including site information. .
 - Please provide a date for when the work was completed.
 - When describing the work completed please provide enough detail so the magnitude is understood
 - EXAMPLE- \$8M at West Grove Building- 3 back-up generators (\$500k) have been installed, 112 windows were replaced with new impact resistant windows (\$5.5M), all interior outlets on the first floor were raised (\$2M) etc....
- Work in Progress
 - Please provide the monetary value for the work in progress
 - Please describe the major components of the work that is in progress for the project
 - This information should be organized by some type of logical grouping (i.e. work site, building, bridge, road etc...) but should be labeled so DHSES staff can easily ascertain the location including site information.
 - Please provide an anticipated date for the work in progress to be completed
 - If subsequent reports, responses should include revised dates identified in ***bold italics*** next to original date.
 - When describing the work in progress please provide enough detail so the magnitude is understood
 - EXAMPLE \$15M at Route 13 bridge crossing Blue River- complete bridge replacement be completed (4/2020)
- Work to be Started
 - Please provide the monetary value for the work to be started
 - Please describe the major components of the work that must be started on the project
 - This information should be organized by some type of logical grouping (i.e. work site, building, bridge, road etc.) but should be labeled so DHSES staff can easily ascertain the location including site information.
 - Please provide anticipated dates for the work to be started and completed
 - In subsequent reports responses should include revised dates identified in ***bold italics*** next to original date.
 - When describing the work to be started, please provide enough detail so the magnitude is understood
 - EXAMPLE- \$4M at the Fort Devers boardwalk- 35 light poles need to be installed (\$1M) (9/2020-10/2020), 55 park benches (\$750K) (10/2020-11/2020), 13 roofs and joists replaced on bathroom facilities (\$1.25M) (4/2021-6/2021) and the Northside parking lot repaved and striped (\$1M) (4/2021-5/2021)

VII. Debris Removal

1. Fact Sheet
2. Sample Right-of-Entry Permit
3. Alternative Procedures Pilot Program Debris Removal Acknowledgement

**PUBLIC ASSISTANCE PROGRAM
DEBRIS REMOVAL FACT SHEET FOR LOCAL GOVERNMENTS
FEMA-4472-DR-NY**

This Fact Sheet was prepared to provide information about how the Federal Emergency Management Agency's (FEMA) Public Assistance (PA) program can reimburse certain debris removal activities performed by eligible Applicants. Eligible Applicants are State and local governments, Federally recognized Native American Nations, and certain private non-profits (PNPs) that perform a government-like service, within Presidentially-declared disaster counties. FEMA reimbursement is made on a 75% federal--25% non-federal basis.

- Effective August 16, 2018 the NYS Department of Environmental Conservation (DEC) issued Emergency General Permit GP-0-18-005 covering emergency actions in response to the August 2018 flooding. Local governments and others seeking information on burning and handling debris, dam safety, quarantining invasive species, hazardous waste, permitting and approvals (including emergency authorizations for hurricane-related repairs), and other matters under the jurisdiction of the DEC should view the agency's website at www.dec.ny.gov or contact the appropriate DEC regional office (see www.dec.ny.gov/about/50230.html for addresses and phone numbers).
- Local governments and others doing work in waterways and other areas under the purview of the U.S. Army Corps of Engineers (USACE) are reminded that projects receiving expedited DEC permits and approvals may still require USACE coordination. Information about the USACE's Buffalo and New York Districts, including any emergency permits covering the repair of storm-damaged facilities, is available at www.lrb.usace.army.mil/ and www.nan.usace.army.mil/index.php, respectively.
- MAP-21 Emergency Relief allows FEMA reimbursement for disaster related debris removal on FHWA roads.

Under the Presidential Disaster Declaration for New York (FEMA-4397-DR-NY), FEMA may provide assistance to State and local governments for debris removal, including collection, pick-up, hauling, and disposal at a temporary site, segregation, reduction, and final disposal.

Debris Removal Basics:

1. Removal and disposal of disaster debris on public property – roads, streets, publicly-owned facilities and right of ways – is eligible for Federal assistance. Removal of debris from parks is eligible when it affects public health and safety or limits use.
2. Equipment and overtime costs are eligible for reimbursement. If an Applicant chooses to award contracts for debris operations, those costs are also eligible. Exercise care! FEMA is authorized only to assist with reasonable costs and only appropriately awarded contracts.
3. The cost of debris removal by private individuals is not eligible; however, eligible Applicants that choose to do so may be reimbursed for the removal of disaster-related debris brought to the public right of way by a private property owner providing it is made available to all owners within the Applicant's jurisdiction.

4. Only in very limited instances do FEMA's regulations allow reimbursement to eligible Applicants that undertake debris removal activities on private property. Regardless, Applicants must base decisions about debris removal from private property on life safety and property protection criteria, as they do absent a disaster declaration. Applicants with questions should contact the NYS Public Assistance Office, at 518-292-2293.

Municipalities Are Encouraged To:

- Use pre-negotiated contracts, if available;
- Consider using qualified local contractors because of their familiarity with the area;
- Request copies of references, licenses, and financial records from unknown contractors;
- Document the procedures used to obtain contractors;
- Work with their State-FEMA teams if technical assistance is needed for contracts and procedures.
- Review the guidance in "Developing and Monitoring Debris-Related Contracts for Eligible Applicants" below.

FEMA does not recommend, pre-approve, or certify any debris contractor. FEMA does not certify or credential personnel other than official employees and contract personnel assigned to the disaster by FEMA. Only FEMA has the authority to make determinations about Applicant, Facility or Scope of Work eligibility.

Eligible Contracts: Three general types of contracts may be used for debris operations:

1. **Time and Materials Contracts** may be used for short periods immediately after the disaster to mobilize contractors for emergency debris removal efforts. They must have a dollar ceiling or a not-to-exceed limit for hours (or both), and should be terminated immediately when those limits are reached. For FEMA reimbursement, such contracts should be limited to 70 hours of actual work. The contract should state that (a) the price for equipment applies only when equipment is operating, (b) the hourly rate includes operator, fuel, maintenance, and repair, (c) the municipality reserves the right to terminate the contract, and (d) the municipality does not guarantee a minimum number of hours.
2. **Unit Price Contracts** are based on weights (tons) or volume (cubic yards) of debris hauled, and should be used when the work is not well defined. They require close monitoring of pick-up, hauling, and dumping to ensure that quantities are accurate. Contracts may be complicated by the need to segregate debris for disposal.
3. **Lump Sum Contracts** establish the total contract price using a one-item bid from the contractor. They should be used only when the work is clearly defined.

Ineligible Contracts: FEMA will not provide funding for:

- Cost-plus-percentage of cost contracts;
- Contracts contingent upon receipt of State or Federal disaster assistance funding; or
- Contracts awarded to debarred contractors.

Contract Monitoring: The Applicant must monitor the contractor’s activities to ensure satisfactory performance. The State-FEMA team can provide guidance and assistance with monitoring, if necessary. If an Applicant has sufficient staff to properly monitor operations, the cost of additional staff for monitoring (or contracting for monitoring) is eligible for Federal funding.

Documentation: Applicants should keep the following information: debris estimates (type/quantity), procurement information (bid requests, bid tabulations, etc.), contracts, invoices, and monitoring information (load tickets, scale records). An Applicant must retain payroll and equipment hours if it performs debris removal. Applicants must document the debris “cradle to grave” to include; where it came from, any staging areas, and where it went to final destination/disposition.

Technical Assistance: The State-FEMA team can provide technical assistance with planning, carrying out, and monitoring of debris removal operations. Contact the NYS Public Assistance Office, at 518-292-2293, for more information.

Developing and Monitoring Debris-Related Contracts for Eligible Applicants:

1. FEMA does not certify, credential, or recommend debris contractors.
2. No debris contractor has the authority to make eligibility determinations.
3. Be familiar with FEMA eligibility and do not allow the contractor to make eligibility determinations. Eligibility information is available in numerous FEMA documents including:
 - The Public Assistance Program and Policy Guide (PAPPG)
 - The Public Assistance Alternative Procedures Pilot Program for Debris Removal (Version 5)
 - The FEMA Website www.fema.gov
4. Be certain the debris contract contains a clear and definitive scope of work, monitoring requirements, and specific language about what is required for each task.
5. Do not sign a contract until it has been thoroughly reviewed by your legal representative.
6. Always follow your organization’s own procurement and bidding procedures. Use competitive bidding if possible.
7. You are responsible for payment of services contracted, even when those services are eligible for reimbursement by FEMA. FEMA and the State are not parties to a debris-related contract executed by you and your contractor.
8. FEMA advises against time and materials contracts and limits their use to a reasonable time period. FEMA may reimburse under a time and materials contract only if all of the following apply:
 - No other contract was suitable.
 - The contract has a ceiling price that the contractor exceeds at its own risk; and
 - The Applicant provides a high degree of oversight to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.

The Applicant should define the SOW as soon as possible to enable procurement of a more acceptable type of contract.

9. All types of contracts must contain a requirement that records be kept showing the amount of debris picked up, hauled, and/or reduced to determine reasonable costs.

10. Every contract should also contain a "Termination for Convenience" clause. For example:

This contract may be terminated at any time for the convenience of (the contracting entity). If this clause is executed, (the contracting entity) agrees to pay the contractor for all work completed through the termination date, as well as any demobilization costs that were a part of the original contract.

11. The contract should contain a cap on costs. When that cap is reached, you should perform a review of work accomplished and modify the contract, if necessary.

12. Be sure the contract sets a reasonable period for the work to be done. Monitor the work to ensure compliance with the schedule for completion.

13. Be aware that many services offered for a fee by contractors may be available free from FEMA or the State.

14. Be certain that your costs are reasonable. FEMA pays only reasonable costs.

15. It may be necessary to use temporary debris storage and/or reduction sites, which can be expensive to develop and manage. Do not sign a contract for the use of such sites unless you know it is necessary. Call your NYS Disaster Assistance Representative for assistance.

16. You, not the contractor, are responsible for monitoring and certifying debris operations. Be sure you have sufficient staff deployed for that task. If you do not have enough staff, hiring additional staff is eligible for funding according to the disaster cost share (usually 75% federal, 25% non-federal); however, those costs must be reasonable.

17. Ensure you obtain any applicable permits from DEC/USACE and follow all laws, regulations, executive orders and policies pertaining to debris to include; invasive species, and floodplain/wetland management.

Questions: Contact the NYS Public Assistance Office, at 518-292-2293.

**SAMPLE RIGHT-OF-ENTRY PERMIT
(INCLUDES HOLD HARMLESS AND INSURANCE CLAUSES)**

Right of Entry Permit

Date: _____

Property Address/Description

City _____

Name (Owner or Tenant) _____

County _____

Telephone Number _____

Right of Entry

I certify that I am the owner, or an owner's authorized agent, of the property described above. I grant, freely and without coercion, the right of access and entry to said property to the (Applicant Name), its agents, contractors, and subcontractors, for the purpose of demolishing, removing and/or clearing any or all storm-generated debris of whatever nature from the above-described property.

Hold Harmless

I understand that this permit is not an obligation upon the government to perform debris removal. I agree to hold harmless the United States Government, the Federal Emergency Management Agency (FEMA), the State of New York, and any of their agencies, agents, employees, contractors, and subcontractors, for damages of any type whatsoever, either to the above-described property or to persons situated thereon. I release, discharge, and waive any action, either legal or equitable, that might arise by reason of any action of the above entities, while removing storm-generated debris from the property. I will mark any sewer lines, septic tanks, water lines, and utilities located on the described property.

Duplication of Benefits

Most homeowner's insurance policies have coverage to pay for removal of storm-generated debris. I understand that Federal law (42 United States Code 5155 et seq.) requires me to reimburse (Applicant Name) the cost of removing the storm-generated debris to the extent covered in my insurance policy. I also understand that I must provide a copy of the proof/statement of loss from my insurance company to (Applicant Name). If I receive payment for debris removal from my insurance company, or any other source, I agree to notify and send payment and proof/statement of loss to (Applicant Name). I understand that all disaster related funding, including that for debris removal from private property, is subject to audit.

Sworn and attested:

All owners must sign below.

APPENDIX - A

Public Assistance Alternative Procedures Pilot Program for Debris Removal Acknowledgement

In accordance with the Sandy Recovery Improvement Act of 2013, the Federal Emergency Management Agency (FEMA) is implementing alternative procedures for the Public Assistance (PA) Program through a pilot program.

As a representative of the Applicant, we elect to participate in the in the Debris Pilot.

1. The pilot is voluntary and the Applicant must apply the alternative procedure to all of its debris removal subawards.
2. The Applicant acknowledges that FEMA may request joint quantity evaluations and details regarding Applicant operations necessary to assess the pilot program procedures.
3. All contracts must comply with local, state, and Federal requirements for procurement, including provisions of 2 CFR Part 200.
4. The Applicant must comply with all Federal, state and local environmental and historic preservation laws, regulations, and ordinances.
5. The Office of Inspector General may audit any Applicant and/or subaward.

Signature of Applicant's Authorized Representative

BACKGROUND

Section 323 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) authorizes FEMA to require, as a condition of grant funding, that the repair or construction of private and public facilities be done in accordance with “applicable standards of safety, decency, and sanitation in conformity with applicable codes, specifications and standards.” Section 406 of the Stafford Act authorizes FEMA to provide contributions to state, local, tribal, territorial, and certain private nonprofit organizations for the repair, restoration, reconstruction, or replacement of a public facility damaged or destroyed by a major disaster and associated expenses incurred. As amended by Section 1235(b) of the Disaster Recovery Reform Act of 2018 (DRRA), Section 406(e) requires FEMA to fund repair, restoration, reconstruction, or replacement in conformity with “the latest published editions of relevant consensus-based codes, specifications, and standards that incorporate the latest hazard-resistant design and establish minimum acceptable criteria for the design, construction, and maintenance of residential structures and facilities that may be eligible for assistance under this Act for the purposes of protecting the health, safety, and general welfare of a facility’s users against disasters.”

PURPOSE

The purpose of the Recovery Interim Policy FP-104-009-11, *Consensus-Based Codes, Specifications and Standards for Public Assistance* (Policy) is to define the framework and requirements for consistent and appropriate implementation of consensus-based design, construction and maintenance codes, specifications and standards (*subsequently referred to as “consensus-based codes, specifications and standards” in this Policy*) for Public Assistance (PA) to promote resiliency and achieve risk reduction under the authority of the Stafford Act §§ 323 and 406(e) (42 U.S.C. §§ 5165a and 5172) and 44 Code of Federal Regulations (CFR) § 206, subpart M. These codes, specifications and standards only apply to repair and replacement of disaster damaged elements and facilities. Nothing in this Policy makes eligible the cost associated with ongoing operations and maintenance. This interim Policy supersedes the *Public*

*Assistance Program and Policy Guide (PAPPG)*¹ subsection: FEMA Required Minimum Codes and Standards.

PRINCIPLES

Application of the latest nationwide consensus-based codes, specifications and standards that incorporate hazard-resistance for PA funded projects will:

- A. Increase the Resiliency of Communities After a Disaster – Facilities restored to a code, specification or standard that includes hazard-resistant designs and criteria will be strengthened and experience fewer interruptions and less damage in the future enabling those facilities to continue to function during and after a disaster.²
- B. Protect Lives and Property – Use of consensus-based codes, specifications and standards that include hazard-resistant designs and criteria will further FEMA’s core mission to protect lives and property by increasing the safety and resilience of facilities that receive PA funding.
- C. Support the Efficient Use of Federal Dollars – Applicants using consensus-based codes, specifications and standards that incorporate hazard-resistance criteria for federally funded projects will reduce future vulnerability of disaster damaged facilities thereby reducing the need for future Federal disaster recovery funding and other assistance.

REQUIREMENTS

A. APPLICABILITY

Outcome: To establish the applicability and the parameters for the implementation of this interim Policy.

1. Applicants under disasters declared on or after the date of this interim Policy must apply the relevant consensus-based codes, specifications and standards identified in Appendix A - Consensus-Based Codes, Specifications and Standards to all permanent work PA projects for applicable facility types (buildings, electric power, roads, bridges, potable water and wastewater) for which they are seeking funding.

¹ Found in *FEMA’s Public Assistance Program and Policy Guide, FP104-009-2/April 2018. Chapter VII.B.2 Permanent Work Eligibility: Codes and Standards; FEMA Required Minimum Codes and Standards.*

² In identifying standards for incorporation into this policy, FEMA considered resilience to mean: Able to prepare for anticipated hazards, adapt to changing conditions, and withstand and recover rapidly from disruptions. *Presidential Policy Directive 21 (PPD-21): Critical Infrastructure Protection and Resilience.*

2. Applicants who fall into any of the following categories may submit to FEMA a written request to opt-in (example provided in Appendix B – *Opt-in Notification for Consensus-Based Codes, Specifications and Standards for Public Assistance*) to the guidelines of this interim Policy. If the PA funded construction has started or is complete, FEMA will not provide PA funding for any duplicative work as a result of opting into this Policy.
 - a. incidents declared between August 1, 2017, and the date of Policy publication,
 - b. projects associated with incidents declared before August 1, 2017, but had not been obligated based on a finalized cost estimate as of the date of Policy publication,
 - c. projects that have an accepted fixed cost estimate (Section 428)³, that have not been obligated, and the Applicant has submitted its written notification to FEMA, can be considered under this Policy. The Applicant must accept the revised scope of work and fixed cost estimate related to codes, specifications and standards within 90 days of FEMA’s receipt of its written notification. If the Applicant does not accept the fixed cost estimate within the 90-day timeframe, the project will retain its original accepted fixed cost estimate,
 - d. projects associated with a cost estimate on appeal as of the date of Policy publication, or
 - e. Applicants where the disaster has been declared and they have not yet participated in the Recovery Scoping Meeting (RSM), the 60-day timeline will start from the date of the RSM.

For a, b, c, & d the Applicant must submit the written notification within 60 days of the publication of this Policy and must identify the disaster(s) and facility(s) for which they are opting in.

Projects that have an obligated accepted fixed cost estimate (Section 428) will not be considered under this Policy.

For work completed Applicants will have to demonstrate compliance with all applicable local, state and federal environmental and historic preservation laws, regulations and executive orders. Additionally, the Applicant will need to show compliance with all procurement requirements as laid out in 2 CFR part 200.

³ FEMA’s PAAP Pilot Guide for Permanent Work (Version 4) is located at <https://www.fema.gov/media-library/assets/documents/162756>.

3. With the exception of building restoration projects, where FEMA already has an existing minimum codes and standards policy, Applicants for all other infrastructure that fall under A.2 and who opt-in to this interim Policy can choose the facilities to apply the provisions of this Policy to within that disaster declaration.
4. This interim Policy applies to permanent work projects for the facilities where the consensus-based codes, specifications and standards are identified in Appendix A. Funding for locally adopted codes, specifications and standards for facilities not included in Appendix A or where the locally adopted codes, specifications or standards are more stringent or provides for more hazard resistance than the FEMA identified code or standard, is eligible if it meets the five criteria under 44 CFR Part 206.226(d) as implemented in the PAPPG.⁴

B. IMPLEMENTATION

Outcome: Applicants understand the key implementation guidelines of this interim Policy.

1. When triggered in permanent work projects funded under the PA Program, FEMA will *require* Applicants to incorporate consensus-based codes, specifications and standards in the planning, design and execution of eligible repair, replacement, or new construction⁵ projects.
2. If the Applicant identifies different locally adopted codes, specifications or standards that are the equivalent to or more stringent than the consensus-based codes, specifications and standards, FEMA requires the Applicant's engineer, design professional or other qualified individual to justify that the hazard-resistant design criteria in the locally adopted code, specification or standard is equivalent to or more stringent than those approved under this Policy.
3. FEMA may deviate from this interim Policy in circumstances where utilization of the consensus-based code, specification or standard is technically infeasible and would create an extraordinary burden on the Applicant or would otherwise be inappropriate for the facility such adversely affecting a facility that has been listed on the National Register of Historic Places.

⁴ Eligibility criteria found in FEMA's Public Assistance Program and Policy Guide, FP104-009-2/April 2018. Chapter VII. Permanent Work Eligibility: Codes and Standards; or the most recent update to these criteria in the PAPPG.

⁵ This includes improved and alternate projects. Per 44 CFR § 206.203(d), funding for improved and alternate projects is capped at the cost to restore the facility to its pre-disaster design and function in accordance with codes and standards, including the required codes and standards referenced in this section, that would otherwise be applicable to the facility if rebuilt as it existed.

C. IDENTIFICATION REQUIREMENTS

Outcome: Identify the applicable consensus-based codes, specifications and standards.

1. The Applicant will be responsible for identifying and applying the applicable consensus-based codes, specifications and standards used in each PA project.
2. This interim Policy is limited to the following facility types: buildings, electric power, roads, bridges, potable water and wastewater.
3. The Applicant will use the consensus-based codes, specifications and standards outlined in Appendix A as the minimum design criteria for eligible projects.
4. The Applicant must use the following criteria when implementing any of the consensus-based codes, specifications and standards identified in Appendix A:
 - a. The consensus-based codes, specifications and standards apply to the damaged facility, element or component, as appropriate, based on the work required to restore the facility to pre-disaster capacity and function.
 - b. If the Applicant elects to rebuild to an alternate or improved project that alters the pre-disaster function or capacity of the facility, the Applicant must incorporate any applicable consensus-based codes, specifications and standards to the new capacity or function of the facility.
 - c. In the case where the consensus-based codes, specifications and standards are being applied and require an upgrade to an entire structural facility, including undamaged elements/components, the upgrade is only eligible for PA funding if there is a direct relationship between the upgrade work and eligible damage.
5. FEMA will update Appendix A of this interim Policy periodically to incorporate additional consensus-based codes, specifications and standards. FEMA will only consider design and construction codes, specifications and standards that incorporate hazard-resistant design.
6. When the consensus-based code, specification or standard allows for discretion or for variances in the facility design to be appropriate for the facility's location, these adjustments need to be identified, documented and submitted to FEMA for approval.

D. VERIFICATION REQUIREMENTS

Outcome: Compliance with the requirements must be established by the Applicant and will be validated FEMA

1. Upon completion of the project, the Applicant must provide proof of compliance with the applicable consensus-based codes, specifications and standards.
2. Acceptable forms of proof include but are not limited to written certification by a registered engineer, design professional, or other qualified individual that the project was designed and constructed in compliance with the applicable consensus-based codes, specifications and standards identified.
3. Failure to include these consensus-based codes, specifications and standards or their equivalent in the planning, design and construction of eligible PA projects, when required or requested, will result in the denial or deobligation of FEMA project funding.

E. ADDITIONAL ELIGIBLE WORK AND COSTS

Outcome: Identify additional work and costs associated with implementing consensus-based codes, specifications and standards that are eligible under the PA Program.

1. Eligible work and costs include engineering evaluation and analysis of the damaged elements/components of a facility that require consensus-based codes, specification and standards under this interim Policy along with PA eligible work to comply with law or regulation.
2. Funding for capped projects (improved, alternate, and alternative procedures) will be based on the estimated amount to restore the facility to its pre-disaster capacity and function including any eligible work such as work required by the consensus-based codes, specifications and standards in Appendix A.
3. The scope of work will be based on pre-disaster capacity, unless the adopted code or standard requires an increase to that capacity.

F. OTHER CONSIDERATIONS

1. Repair versus replacement calculation. When evaluating whether a facility is eligible for replacement under 44 CFR § 206.226(f), upgrades to meet the identified consensus-based codes, specifications and standards under this interim Policy will be treated in the same manner as locally adopted codes, specifications and standards for the purposes of calculating repair and replacement costs.

FEMA

2. When a consensus-based code, specification or standard offers discretion in design, FEMA will fund the least expensive alternative unless FEMA determines, after demonstration by the Applicant's engineer, design professional or other qualified individual that another alternative provides greater risk reduction to the facility. In making a determination, FEMA will consider the additional risk reduction, the additional cost, technical feasibility, and whether the alternative is better achieved through other programmatic options, such as mitigation funding.

ADDITIONAL INFORMATION

REVIEW CYCLE

This is an interim Policy and will be followed by additional implementation guidance. In conjunction with publishing the interim Policy, FEMA is requesting comments from the public to inform future Policy development. FEMA is particularly interested in identifying additional consensus-based codes, specifications and standards that incorporate hazard-resistant criteria. FEMA will consider adding consensus-based codes, specifications and standards to Appendix A based on the information submitted.

To help ensure continuous improvement in the process of implementing this interim Policy and subsequent updates, FEMA may request performance information and documentation from Applicants. FEMA will evaluate this performance information and the implementation of this interim policy in terms of its effectiveness in increasing the resilience of communities after a disaster, protecting lives and property. FEMA will periodically perform an in-depth review of this Policy.

DRRA 1235(b) requires FEMA, in consultation with other Federal agencies, to issue a final rulemaking by April 5, 2020, to define the terms 'resilient' and 'resiliency'. This time period applies only to the applicability of the definition of resilient and resiliency. FEMA is not using this interim Policy to issue a new definition for the terms "resilient" or "resiliency." Further, prior to the enactment of the DRRA, the Stafford Act already provided FEMA the authority to require certain standards through the establishment of minimum standards under Section 323 and to require hazard mitigation under Section 406. As such the latest standards FEMA adopts in this interim Policy and any successor versions of this Policy will be effective regardless of whether a final rulemaking defining resilient and resiliency has been completed.

AUTHORITIES

Sections 323 and 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. §§ 5165a & 5121, *et seq.*, as amended.

DEFINITIONS

Consensus-based codes, specifications and standards: National or international voluntary codes, specifications and standards that incorporate the latest hazard-resistant designs.

Hazard-Resistant: Designs which take into account the probability of occurrence of hazards, within a reasonable recurrence interval, to decrease vulnerabilities.

FEMA

Appendix A: Consensus-Based Codes, Specifications and Standards as of November 6, 2019

The latest published edition of the codes, specifications and standards published by the following organizations at the time of the disaster declaration will be incorporated into the design and construction of applicable facilities (currently limited to buildings, electric power, roads, bridges, potable water supply and wastewater) as described in this interim Policy. These codes, specifications and standards only apply to repair and replacement of disaster damaged elements and facilities. Nothing in this Policy makes eligible the cost associated with ongoing operations and maintenance.

Eligible building projects involving substantial improvement or new construction in flood hazard areas must meet, at a minimum, the floodproofing or elevation requirements as described in 44 CFR § 9.11(d), or the International Code Council's International Building Code, International Existing Building Code, International Energy Conservation Code, or International Residential Code, whichever is higher.

When triggered by the codes, specifications and standards identified by FEMA in this Policy, Applicants will incorporate the latest applicable criteria including, but not limited to the following:

- In areas where tornado shelter design wind speeds are 250 mph or greater, the Applicant must incorporate a storm shelter or safe room (designed to International Code Council (ICC) 500 standards) for elementary and secondary schools with an occupant load of 50 or more, Emergency Operations Centers (EOCs), 911 call stations, fire stations, rescue stations, ambulance stations, and police stations.
- Concerning requirements for wind, seismic, flood, temperature, ice and snow, and wildfire the Applicant must incorporate applicable design and construction standards contained in the International Building Code (IBC), International Existing Building Code (IEBC), International Residential Code (IRC) and their referenced standards [e.g., American Society of Civil Engineers (ASCE)/Structural Engineering Institute (SEI) 7; 24 and 41]
