

AWR-331 WINTER WEATHER HAZARDS: SCIENCE AND PREPAREDNESS

NO. OF OPENINGS: MIN. 25/MAX.40
DECEMBER 19, 2017

WESTCHESTER COUNTY
EASTERN HUDSON VALLEY

1 DAY
ANNOUNCED: JULY 20, 2017

Description:

This course will prepare participants to understand the basics of winter weather science, the winter weather forecasting process, how winter weather forecasts are communicated, and the fundamentals of winter weather safety and preparedness. Since winter storms can strike every state in the United States, it is important that every community be ready for the hazards associated with them. This awareness-level course will fulfill the goals of the “whole community” approach to emergency management by reaching a broad sector of the community. Multiple core capabilities will be addressed, with particular emphasis on “public information and warning” and “threats and hazard identification.” Participants who represent sectors such as mass care services, health and social services, operational communications, critical transportation, and planning would further expand the discussions in this course to other corresponding core capabilities.

Prerequisite:

- None

Who Should Attend?

- Emergency Managers
- First Responders
- Small Businesses
- Corporations
- Federal/State/Tribe Governments
- NGOs
- Community Organizations
- Typical households who need to prepare and respond to winter weather hazards.
