

PER-212 OPERATIONAL LEVEL RESPONSE TO HAZMAT/WMD INCIDENTS

NO. OF OPENINGS: MIN 25/MAX 40

WESTCHESTER COUNTY

3 DAYS

JANUARY 15-17, 2019

EASTERN HUDSON VALLEY

ANNOUNCED: AUGUST 29, 2018

Course Description:

This course provides the knowledge and skills needed to obtain certification through the National Professional Qualifications System (NPQS/Pro Board) as an Operations-level responder.

This three-day course focuses on the unique response and personal protection challenges that responders face during a Weapons of Mass Destruction (WMD)/terrorist incident or a Hazardous Materials (HazMat) incident. The Operations-level training prepares emergency responders from all disciplines to recognize and identify hazardous material and to mitigate a HazMat incident by preventing further contamination of people, property, and the environment.

Topics covered include: assessing WMD hazards, predicting the likely behavior of Hazmat/WMD materials, identifying defensive strategies for a WMD incident, effectively operating and communicating in a unified command structure of the Incident Command System (ICS), determining personal protective equipment (PPE) needs, donning PPE, and performing emergency decontamination.

Prerequisite:

The preferred course meeting the certification requirement is the Texas A&M Engineering Extension Service (TEEX) online course AWR160-W or the instructor-led AWR160-SAT (TEEX Course #OGT208).

You must be a US Citizen to attend. If you are not please let us know by emailing us for further instruction:
