

Jessica Kaputa

Jessica Kaputa has more than 25 years of Federal IT and communications program management experience and an additional 15 years of emergency communications experience within DHS's Cybersecurity and Information Security Administration (formerly Cybersecurity and Communications/National Communications System).

During her federal career, she was IT support lead for the Navy's Tomahawk Missile and Unmanned Aerial Vehicle Program Office, and provided network acquisition and provisioning services, training, and customer service support for the Federal Aviation Administration's unclassified and air traffic control networks. During her time at DHS, Jessica has provided engineering support to the Government Emergency Telecommunications Service and Wireless Priority Service programs, coordinated training and exercise programs for federal disaster emergency communications, and operational support to FEMA's National Response Coordination Center during Federal Emergency Support Function #2 activations. She currently leads efforts in Tribal Affairs coordination; interoperable training and exercise programs; National Council of Statewide Interoperability Coordinators (NCSWIC) planning, training and exercises; spectrum management; and emergency communications incident support.

She holds a Master's Degree in Telecommunications and National Security from the George Washington University. c
