

## Course Description

### PER-221 Tactical Operations for CBRNE Incidents

#### Description:

The goal of this course is to provide tactical team personnel and emergency responders with the knowledge, skills, and abilities to safely and effectively respond to chemical, biological, radiological, nuclear, and explosive (CBRNE) incidents.

Through a combination of classroom sessions and comprehensive practical exercises, participants gain knowledge and experience in decontamination procedures; selection and use of PPE; tactical operations involving an IED; identification and characteristics of chemical and biological agents; identification and characteristics of radiological isotopes; use of detection equipment; and planning and performing tactical operations in a CBRNE environment.

#### Course Objectives:

By the end of the course, participants will be able to:

- Describe how this course will benefit them
- Recognize the threats posed by CBRNE agents
- Use detection and monitoring equipment appropriately in a CBRNE environment
- Use PPE appropriately in a CBRNE environment
- Operate safely and effectively in the tactical phase of response to a CBRNE incident
- Execute the tactical planning process, through integration of disciplines, in response to a CBRNE incident
- Effectively integrate various disciplines during response to a CBRNE incident
- Conduct tactical operations in a CBRNE environment
- Complete a comprehensive post-test and course evaluation

#### Prerequisites:

**You must be a US Citizen to take this course. If you are not please let us know by email for further instruction at [OEM.TRAINING@DHSES.NY.GOV](mailto:OEM.TRAINING@DHSES.NY.GOV)**

To enroll in this course, participants must be US citizens and must possess or obtain a FEMA student identification (SID) number.

**Length: 24 Hours**

#### Target Audience:

- Law Enforcement (Tactical)
- Haz-Mat
