

Course Description

MGT-440 Enhanced Sports and Special Events Incident Management

Description:

This course is scenario based, focusing on event planning, incident management, and policy level decision making. The course is intended to prepare participants for the response to a large scale incident during sporting or special events. Participants will engage in three all-hazard, simulation supported (Biological, Mass Casualty, Active Shooter, Improvised Explosive Device (IED), Hazmat, or natural disaster), emergency response exercises to hone individual and team decision-making skills from a Policy Group, Emergency Operations Center (EOC), and Incident Command Post (ICP) perspective.

Course Objectives:

- Identify concepts and processes needed to plan and prepare coordinated operations at a sporting or special event, including risk and hazard assessment, contingencies and objectives, and other considerations.
- Employ the Emergency Management Exercise System (EM*ES) Web to become familiarized with the web-based application, its functions, and its uses.
- Evaluate and plan for a simulated sports or special event using the event planning process from a Multi-Agency Coordination (MAC)/ Policy Group, Emergency Operations Center (EOC), and an Incident Command perspective.
- Identify, discuss, and apply the key concepts and processes needed to plan and implement a response to an incident during a sporting or special event, including risk awareness, incident management, resource management, crowd management, and evacuation.
- Identify and discuss issues relating to seven critical considerations that organizations face relating to governance and partnerships needed both when planning and managing sports and special events as well as during the response to incidents that occur during these events.

Prerequisites:

- MGT-404, Sports and Special Event Incident Management
