

Course Description

Casualty Simulation Workshop (CSW)

Description

This workshop will permit the participants both instructional and hands on experience with Casualty Simulation for operational based exercises. Workshop participants will be able to understand and explain the purpose of exercise simulations and define exercise roles and responsibilities for exercise simulation. Workshop participants will be expected to participate in the hands on exercise to include receiving casualty simulation on them.

Target Audience:

Students for this course must have responsibilities in victim controller, moulage artist, or exercise design. The course is not intended for exercise players or response personnel unless they are expected to become involved in exercise development. Organizations or communities should consider selecting core personnel who are responsible for exercise planning that can form the nucleus of an exercise design team when they return.

Prerequisites

IS-120.C: An Introduction to Exercises

The course is available at the link below:

<https://training.fema.gov/is/courseoverview.aspx?code=IS-120.c&lang=en>
