		Schoharie	Oswego	Ontario
		St Lawrence	Otsego	Orleans
		Warren	Tioga	Schuyler
		Washington	Tompkins	Seneca
				Steuben
				Wayne
				Wyoming
				Yates

### Reminders

**When checking into the NYS RACES net, please use the following procedure:**

Transmit "This is" *then unkey and listen for doubling* then give callsign phonetically. EXAMPLE: This is (unkey) Kilo Charlie two Foxtrot Tango Delta.... Over.

**Prowords:** Prowords are pronounceable words or phrases, which have been, assigned a very specific meaning for expediting message handling where radiotelephony (voice) procedure is used. A list of prowords authorized for general RACES use is in the appendix of this document. **Note on Prowords "Over" and "Out":** "Over" and "out" are never used together to end a transmission. Every transmission will end either with "over" or "out." The proword "over" is to be used when an answer is requested or expected. When no answer is expected, transmissions will end with the proword "out."

**Phonetic Alphabet:** The standard phonetic alphabet will be used when necessary for purposes of clarity to spell difficult words or groups, or to identify any letter of the alphabet. The word or group to be spelled will be preceded by the words "I spell." If the operator can pronounce the word or group to be spelled, this will be done before and after the phonetic spelling to identify the word. A single letter of the alphabet will be identified phonetically, preceded by the proword "initial."

**Band/Frequency Change:** Net Control Station has the authority to change bands or frequency at any time because of poor propagation or other unforeseen circumstance. If 7281 KHz has poor propagation, then 3993.5 KHz would be the ALTERNATE or vice versa. 60-meters channels 5346.5 KHz USB or 5371.5 KHz USB maybe used as CONTINGENT net frequencies.
