Advanced Active Shooters Scenario (A2S2): Tactics & Operations

September 27-29, 2016

Course Description:

Advanced Active Shooters Scenario (A2S2): Tactics and Operations provides training to combat potential complex, coordinated terrorist attacks against the United States, particularly the state of New York, in which small arms fire, automatic weapons, and explosives are used to attack a jurisdiction at multiple locations. The attack would be sustained for more than 12 hours, overwhelming any local jurisdiction's capability to effectively respond without significant assistance from other local, state, and federal agencies. Such an attack would probably occur without warning and would result in a high number of casualties among civilians, law enforcement officers, and other emergency response personnel. Although there would be fatalities, many casualties would suffer minor to life-threatening injuries, requiring on-scene emergency care in both direct and indirect threat situations, and evacuation to medical facilities.

Advanced Active Shooters Scenario (A2S2): Tactics and Operations relies heavily upon a scenario-based approach to guide students through a mix of situations involving multiple disciplines of emergency responders. Scenario-based training is intended to address specific areas of focus and to target higher-level objectives, especially those that involve judgment and decision-making. This course is physically demanding: every student should be aware of this and **consider self-exclusion** if s/he has concerns about their physical condition or suffers from any health or other physical abnormality that may place them at risk.

Topics Include:

General:

- Complex, coordinated attacks including Mumbai and Boston
- IED Awareness
- Rescue Task Force
- Tactical Emergency Casualty Care
- Intelligence Operations
- Responder Integration Across Disciplines

EMS:

- Ballistic/Blast injuries
- Triage
- Weapons Clearing
- Patient Evacuation
- Scene Management

Law Enforcement/Bomb Tech:

- Door Breaching
- Linear Target Clearing
- Patrol Officer Movement
- Room Clearing
